

Q1 Prior to this survey, were you aware garbage containers cannot be placed curbside on collection day?

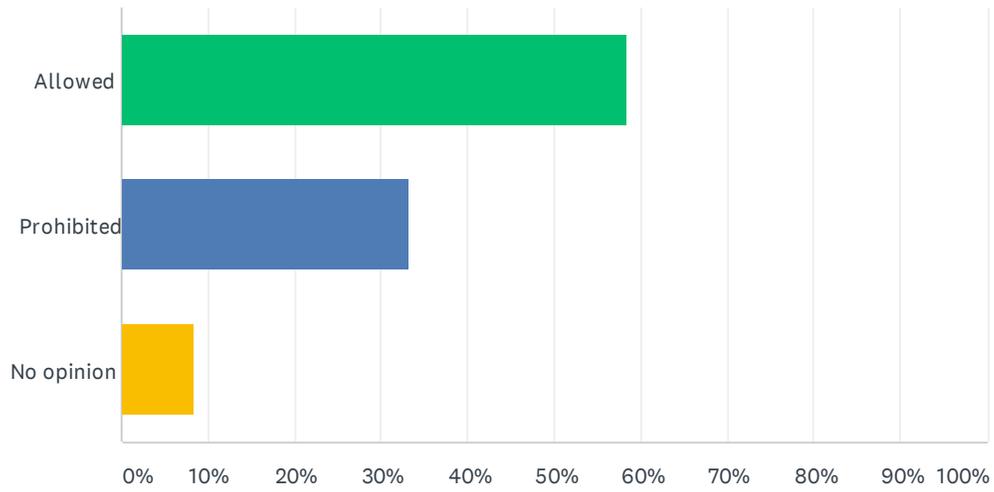

Answered: 4,070 Skipped: 24

ANSWER CHOICES	RESPONSES	
Yes	46.12%	1,877
No	53.88%	2,193
TOTAL		4,070

Q2 Do you think curbside placement should be allowed or prohibited in Sioux Falls?

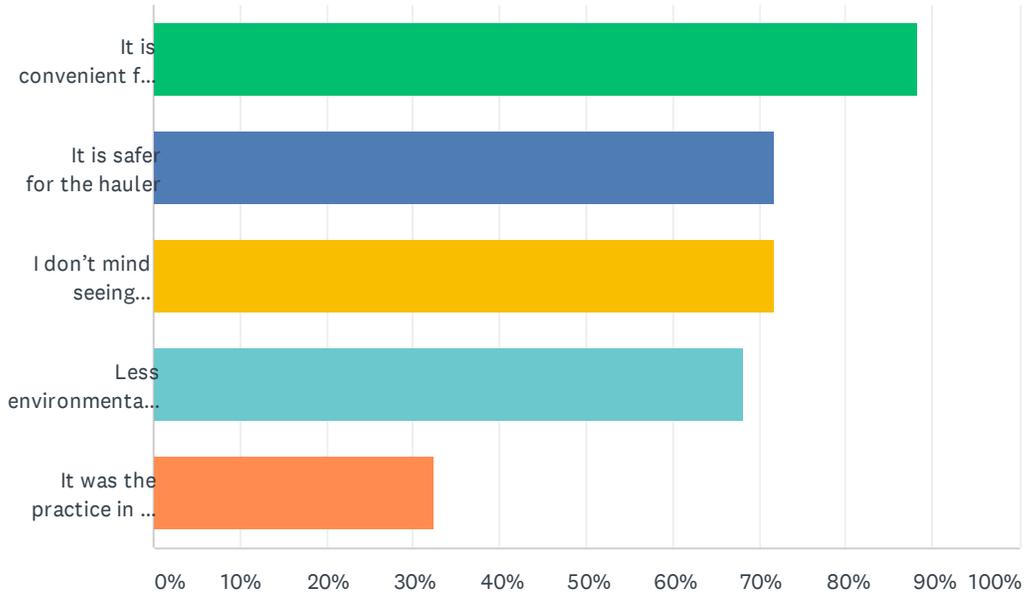

Answered: 4,094 Skipped: 0

ANSWER CHOICES	RESPONSES	
Allowed	58.38%	2,390
Prohibited	33.24%	1,361
No opinion	8.38%	343
TOTAL		4,094

Q3 Why do you think curbside should be allowed? Select all that apply.

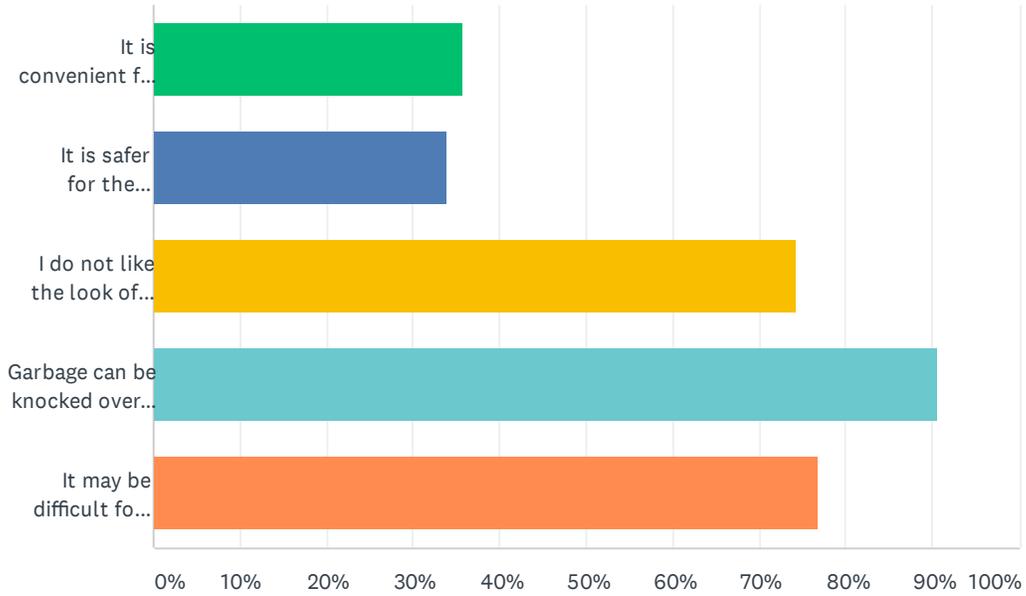

Answered: 2,375 Skipped: 1,719

ANSWER CHOICES	RESPONSES
It is convenient for the hauler	88.34% 2,098
It is safer for the hauler	71.75% 1,704
I don't mind seeing containers at the curb	71.75% 1,704
Less environmental impact (e.g., fewer emissions because garbage trucks aren't idling as long, less fuel used, less time garbage trucks are in neighborhood)	68.13% 1,618
It was the practice in my previous community	32.42% 770
Total Respondents: 2,375	

Q4 Why do you think curbside should be prohibited? Select all that apply.

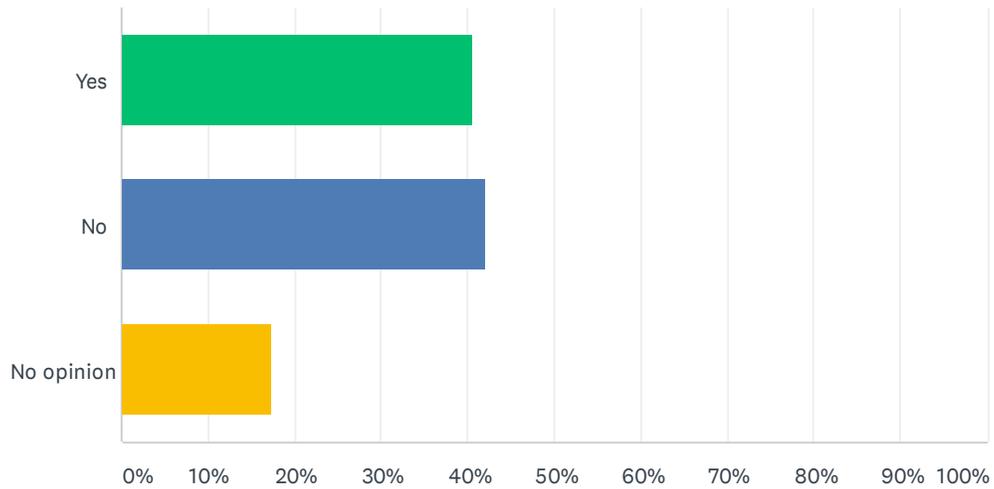

Answered: 1,356 Skipped: 2,738

ANSWER CHOICES	RESPONSES	
It is convenient for the customer	35.69%	484
It is safer for the customer	33.85%	459
I do not like the look of containers at the curb	74.34%	1,008
Garbage can be knocked over by the wind	90.63%	1,229
It may be difficult for some customers to bring garbage to the curb	76.84%	1,042
Total Respondents: 1,356		

Q5 Should haulers be able to decide where containers need to be placed for collection?

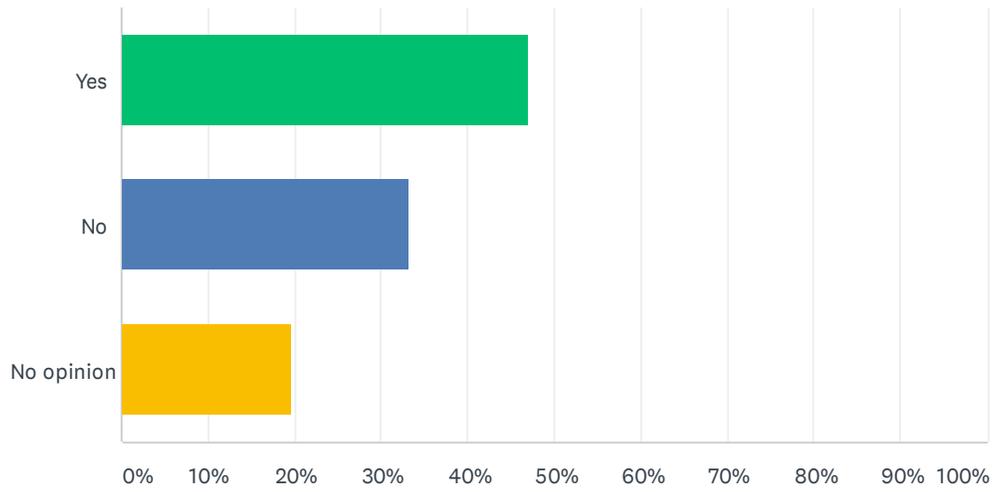

Answered: 4,053 Skipped: 41

ANSWER CHOICES	RESPONSES	
Yes	40.59%	1,645
No	41.99%	1,702
No opinion	17.42%	706
TOTAL		4,053

Q6 Should haulers retrieve their customers' waste containers from the structure (e.g., home or business) on the day of collection?

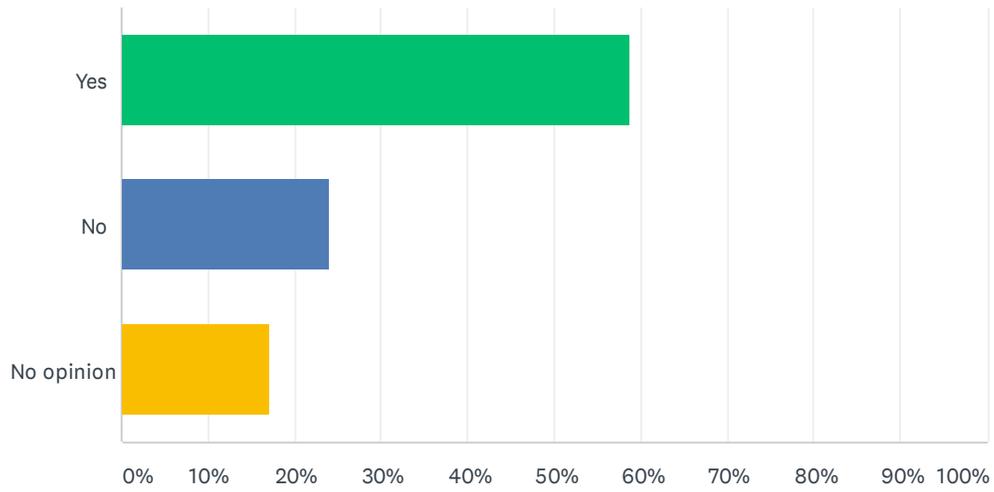

Answered: 3,894 Skipped: 200

ANSWER CHOICES	RESPONSES	
Yes	47.02%	1,831
No	33.26%	1,295
No opinion	19.72%	768
TOTAL		3,894

Q7 Should haulers return their customers' waste containers to the structure (e.g., home or business) upon completing collection?

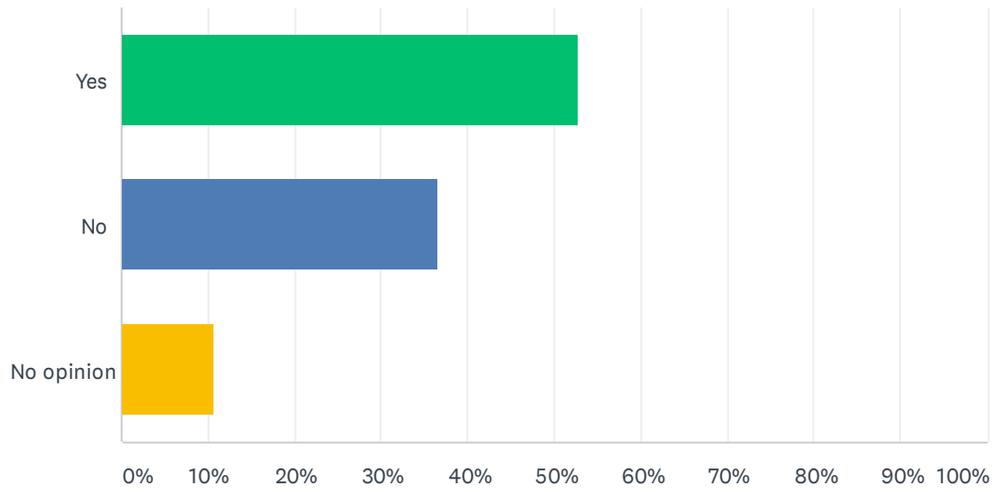

Answered: 3,898 Skipped: 196

ANSWER CHOICES		RESPONSES	
Yes		58.77%	2,291
No		24.11%	940
No opinion		17.11%	667
TOTAL			3,898

Q8 Should customers bring their waste containers to the curbside on the day of collection?

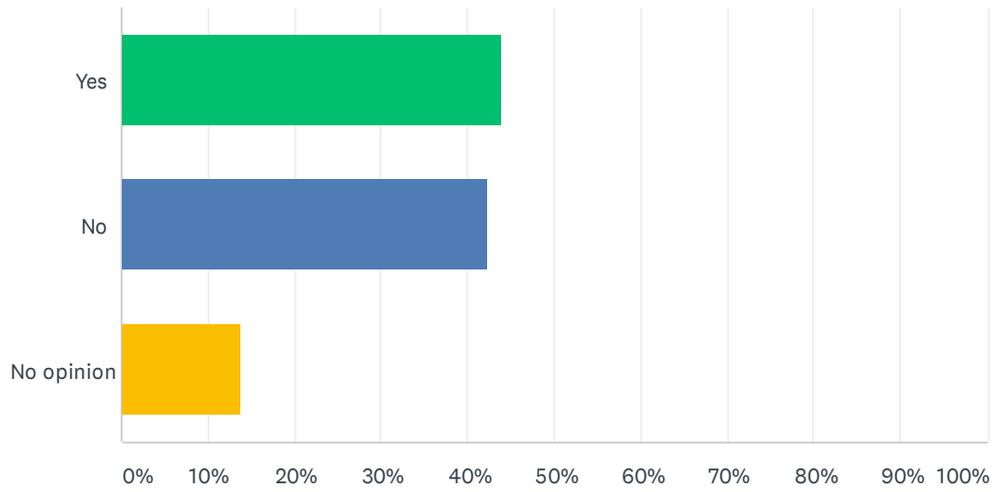

Answered: 3,901 Skipped: 193

ANSWER CHOICES	RESPONSES	
Yes	52.78%	2,059
No	36.61%	1,428
No opinion	10.61%	414
TOTAL		3,901

Q9 Should customers retrieve their waste containers from the curbside after the hauler has completed collection?

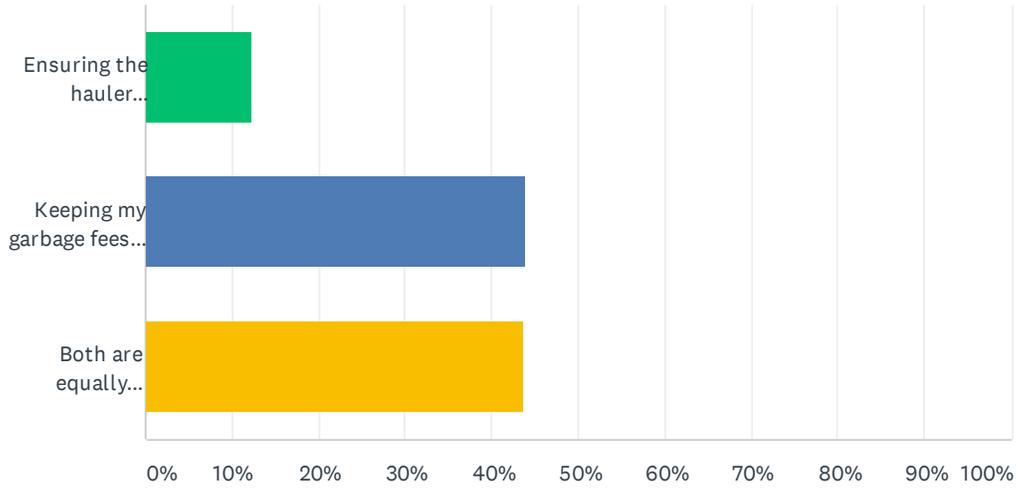

Answered: 3,899 Skipped: 195

ANSWER CHOICES		RESPONSES	
Yes		43.83%	1,709
No		42.29%	1,649
No opinion		13.88%	541
TOTAL			3,899

Q10 What is more important:

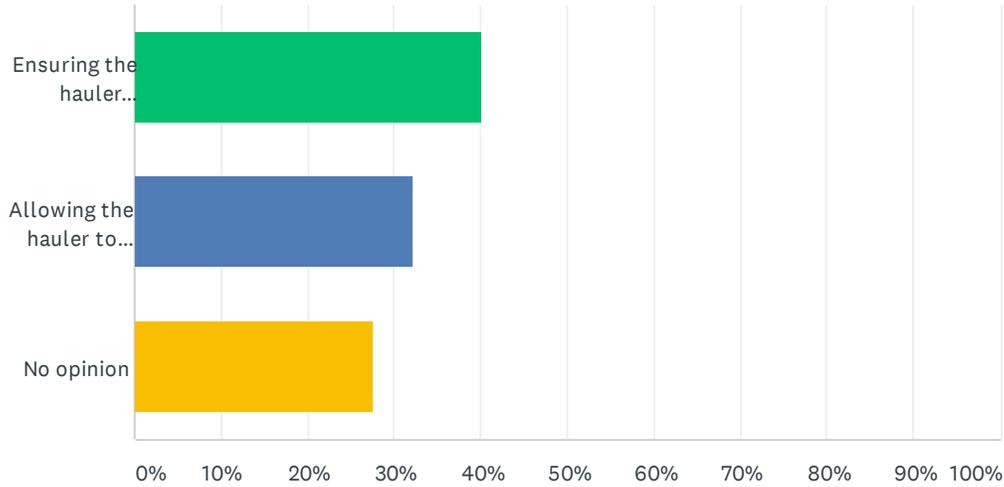

Answered: 3,878 Skipped: 216

ANSWER CHOICES	RESPONSES	
Ensuring the hauler retrieves and returns the container from the structure	12.43%	482
Keeping my garbage fees as low as possible	43.89%	1,702
Both are equally important	43.68%	1,694
TOTAL		3,878

Q11 What is more important:

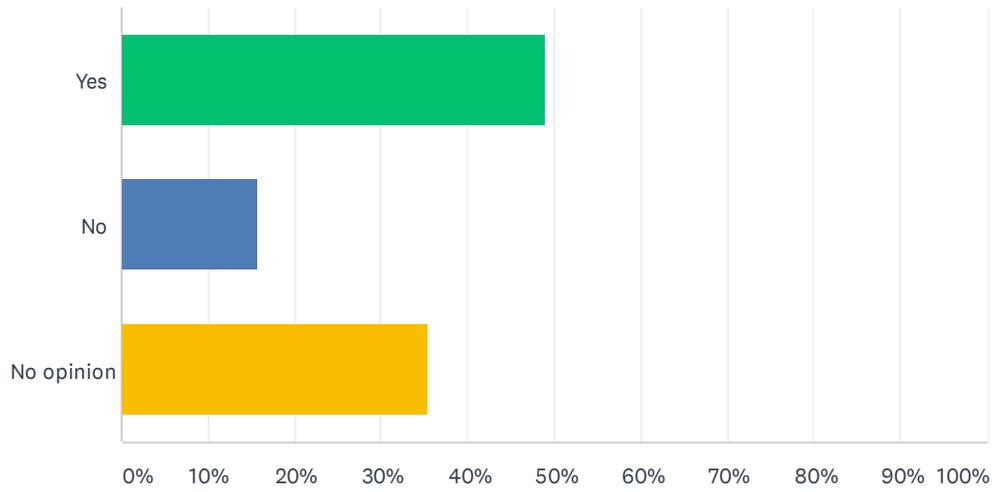

Answered: 3,856 Skipped: 238

ANSWER CHOICES	RESPONSES
Ensuring the hauler retrieves and returns the container from the structure	40.22% 1,551
Allowing the hauler to establish different levels of collection service with different rates associated with each level of service	32.26% 1,244
No opinion	27.52% 1,061
TOTAL	3,856

Q12 Should all the waste in your neighborhood be collected on the same day of the week?

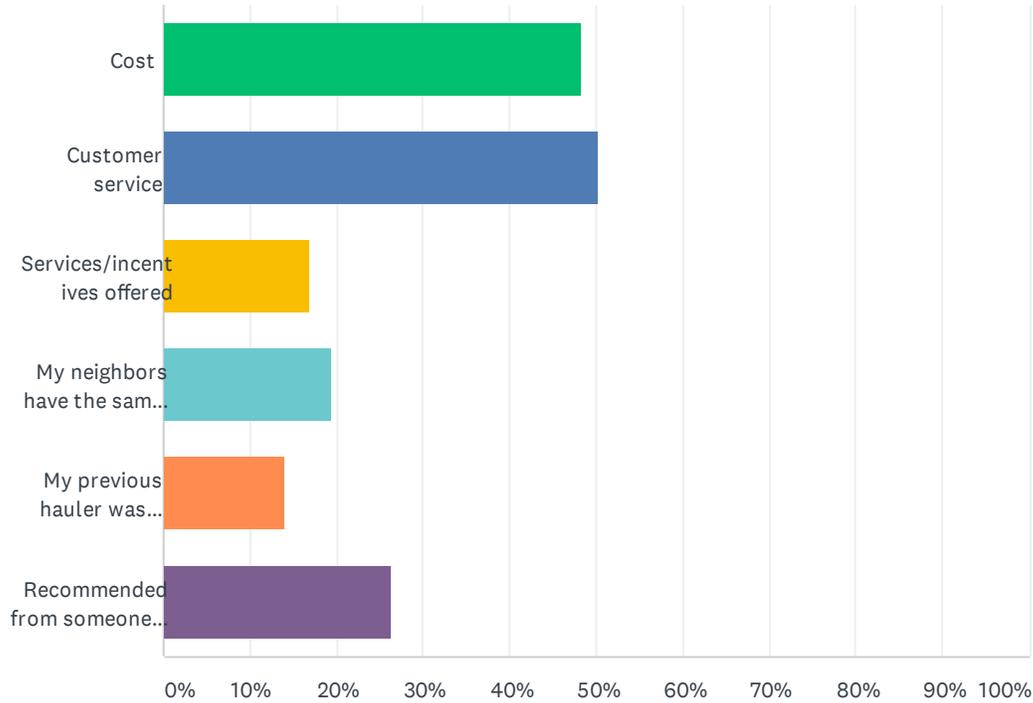

Answered: 3,895 Skipped: 199

ANSWER CHOICES		RESPONSES	
Yes		49.01%	1,909
No		15.66%	610
No opinion		35.33%	1,376
TOTAL			3,895

Q13 Why did you select your hauler? Select all that apply.

Answered: 3,842 Skipped: 252

ANSWER CHOICES	RESPONSES	
Cost	48.41%	1,860
Customer service	50.16%	1,927
Services/incentives offered	16.97%	652
My neighbors have the same hauler	19.52%	750
My previous hauler was purchased by another hauler	13.93%	535
Recommended from someone else	26.39%	1,014
Total Respondents: 3,842		

Q14 Is there anything else you would like to share regarding container placement or garbage collection?

Answered: 1,337 Skipped: 2,757

#	RESPONSES	DATE
1	It makes the whole town look terrible when garbage cans are setting out all night, including the whole next day till the homeowner gets home from work.	8/19/2021 11:33 PM
2	Let the haulers decide what is the safest and easiest way for them to serve their customers. I am confused as to why anyone would object to cans at the curb on days of service	8/19/2021 10:29 PM
3	if we put containers on street then there should only be one truck coming into our neighborhoods instead of all the different carriers. why change what has worked for years.if the companies do not like it they can leave as others would like the opportunity.	8/19/2021 10:27 PM
4	I would prefer when not on pick up days, containers cannot be left up by big garage door(s). Containers need to be stored in their garage or out of total site from the street.	8/19/2021 10:27 PM
5	No. You guys are doing a good job	8/19/2021 10:14 PM
6	Garbage services should determine if they want to have their collector moving the bins or simply collecting the trash and the customers move the bins.	8/19/2021 10:14 PM
7	Downtown alley ways need to find a way to consolidate the amount of dumpsters.	8/19/2021 10:11 PM
8	Not everyone has a place at curbside to put containers. My driveway slopes, so the only flat surface for me is the sidewalk. Can't block the sidewalk. Also, can't put on grass next to end of driveway due to unlevel ground.	8/19/2021 9:57 PM
9	I think that placing and retrieving garbage cans by the house/structure should be required with no extra charge if the person (homeowner, ect.) needs it due to their age, ability, ect. However, people should be able to place their garbage on the curb if they want to and the company wants it their because of the environmental impacts, ect that could benefit from it being placed on the curb.	8/19/2021 9:35 PM
10	Lend a helping hand whenever you can! If everyone does the very small task of taking their container to the curb on pick up day, that would make it more convenient for the haulers!	8/19/2021 9:24 PM
11	Keep the city out of this discussion. Leave it to each individual collection company to handle. The competition will keep the haulers in line.	8/19/2021 9:20 PM
12	There isn't a good place to store our garbage cans during the week so we would need someone with authority to tell us where to put them so we don't get fined. Our house is a small rectangle with no garage.	8/19/2021 8:58 PM
13	I do believe the cans can cause accidents my hauler always put the can in the middle of my driveway. It was frustrating to back both cars out. I asked if they could be placed off to the side but fell on deaf ears had to call the owner. Also i live across the street from a grade school and a middle school a block away now i have another thing in the driveway to look around kids cars and garbage cans school buses . Accident just begging to happen. Safty frist please	8/19/2021 8:50 PM
14	There is no reason for the haulers to risk their safety by having to walk to the homeowners structure. In our previous residence -which was out of state-we had no choice. It had to be at the curb.	8/19/2021 8:11 PM
15	If haulers don't pick up garbage occasionally they should be required to credit the customer account.	8/19/2021 8:05 PM
16	In many newer parts of town with few mature trees to block wind, garbage cans can be blown around, both filled and empty. Sioux Falls has developed neighborhood watch programs - going to one's neighbor three houses down the street to retrieve the can left on the curb is not the focus of being "neighborly". Think also of safety of cans possibly rolling around the street.	8/19/2021 7:36 PM

Garbage Container Placement and Collection Survey

17	Seniors appreciate haulers picking up & delivering as weather conditions pose a problem at times. If containers do get tipped over, it's harder for them to gather it. The neighborhood looks so much nicer not seeing containers. As far as selection of hauler we're connected to an HOA Thanks!	8/19/2021 7:33 PM
18	I think garbage companies took advantage of customers when curbside was allowed during the pandemic and the quality of service declined.	8/19/2021 7:23 PM
19	Prefer to set containers at the curb. Would like to keep the cost down and I am against multiple services at different rates.	8/19/2021 7:13 PM
20	Curbside makes the city look dirty. If independent haulers want to serve privately, they should provide the service of getting container next to the structure or house	8/19/2021 7:06 PM
21	N/a	8/19/2021 6:57 PM
22	No	8/19/2021 6:46 PM
23	I am fine with having it down by the curb, but for elderly people maybe give them an option. I have noticed my bill going up in the last year, not thrilled with that.	8/19/2021 6:46 PM
24	No but they should ensure they pick up the garbage on the service day and not use the excuse oh it was a new driver. Now the can stays full for another week without a place to put any more trash	8/19/2021 6:40 PM
25	Customers could bring their garbage containers to outside the resident doors but not to the curb. It is icy in the winter and not safe for me to take down my slanted drive to sit in the grass or snow where they more easily tip over	8/19/2021 6:39 PM
26	Makes city look terrible if garbage cans out all the time	8/19/2021 6:38 PM
27	No	8/19/2021 6:38 PM
28	I'm quite happy with haulers retrieving canisters from the structure. That is waaaay better than most cities.	8/19/2021 6:37 PM
29	Too much price for retired people. Make it easy. Especially in the winter	8/19/2021 6:34 PM
30	When we started everything was great and they neatly came up to the house and returned neatly to the house! Now things are thrown around and we are asked to vote for a lesser service! Do we get a price reduction?	8/19/2021 6:29 PM
31	I am 81 years old and have had three hip replacements. In the winter it is more likely that I will be injured than the healthier carrier.	8/19/2021 6:26 PM
32	We are disabled-wheelchair ramp in front yard. We were able to place bins at end of ramp for our convenience. Our hauler was always aware of our situation. No extra charge.	8/19/2021 6:25 PM
33	Placement at the curb makes most sense as hauler trucks become more automated that will be required anyway, poor practice to require hauler staff to come up to house or inside. Homeowner should take responsibility for curbside placement	8/19/2021 5:50 PM
34	Keep up the great work you do!	8/19/2021 5:45 PM
35	Please allow for curbside placement of containers on collection day.	8/19/2021 5:19 PM
36	I think it should be permissible to put the garbage and/or recycling container close to the curb. I put mine by the driveway (unless it is really windy), on the house side of the curb. I try to keep my containers there because I forget to put by the curb on my collection day. It is closer to the curb than being at the house.	8/19/2021 5:05 PM
37	Why now are you questioning our rates that you having been charging which are one of the highest we have ever paid. You were hired because of your service to the customer at a already higher rate than that other companies because you offered the service. Have had other people from other towns remark how nice Sioux Falls looks because of the lack of garbage cans sitting on the curbs. Let's continue making our city stand out because of it's clean appearance to everyone that visits us. And as a retired Senior citizens who has 2 total knee replacements and Rheumatoid Arthritis - we total appreciated the service you have provided and were relieved to have the service returned after the pandemic.	8/19/2021 5:04 PM
38	Have the employee get the cans from the structure-it is their JOB!	8/19/2021 4:56 PM

Garbage Container Placement and Collection Survey

39	As far as placement goes, I don't think it should matter where it is placed. I am capable and fine placing it curbside but if I forget, I am paying for service so it should be taken even if they have to come up to the house. and the receptacles should be returned to where they were picked up. For the elderly or handicapped, it may be more dangerous for them to place trash curbside so it's not just the haulers safety that needs to be considered.	8/19/2021 4:39 PM
40	Pickup recycling every week	8/19/2021 4:35 PM
41	Covid is still out there. Also less fuel emissions when trucks do not have to idle as long is safer for air quality. Safety of my garbage hauler is very important. I hold them in high regard for doing a job that many would not do.	8/19/2021 4:33 PM
42	Curbside!	8/19/2021 4:30 PM
43	healthwise..I am unable to pull the containers out each week. My wife is 78, she should not either. We would switch garbage people if we had to.	8/19/2021 4:30 PM
44	Have a disability and it's nice that they come up to the house to get and put back, it's really appreciated.	8/19/2021 4:23 PM
45	curbside service would be difficult for us, as we are elderly	8/19/2021 4:20 PM
46	Think it is safer and quicker for drivers of trucks and safer for traffic to not have trucks sitting in one spot so long	8/19/2021 4:15 PM
47	As long as the homeowner does not leave the container in there longer than necessary, I am fine with placing it near the street.	8/19/2021 4:01 PM
48	I've been confused. My neighbors take their trash to the curbside, and sometimes I do this as well. Wherever the collectors find them should be the place where they put them back. I really have no opinion on this ordinance...I can put the containers at the end of my driveway or leave them where they are by the garage door. But often there is trash flying around the neighborhood that was not properly collected nor disposed of...this is very poor collection. Often we find the container not completely emptied, and have to wait another week to get the job done. I understand this is not a job that people enjoy doing, but it should be done properly if it's going to be done at all. Whatever your job is, it should be done well. I only take my containers to the curb out of consideration for the collectors, to make their job easier. Plus it's a job that really needs to be done...this is not India.	8/19/2021 3:59 PM
49	n/a	8/19/2021 3:41 PM
50	Very happy with my service and the communication you offer to everyone should you need to tell us all something.	8/19/2021 3:38 PM
51	The city government should do the garbage collection.	8/19/2021 3:37 PM
52	if customers are to put /collect trash containers at curb, exception should be made for elderly or others with disabilities for haulers to take care of containers (get and return from house)	8/19/2021 3:30 PM
53	Yes Close the lids to the garbage cans don't leave them open	8/19/2021 3:25 PM
54	Some customers are elderly so if they place their trash by their structure the hauler should return the waste container to where it was, once the trash has been collected. If a customer brings the trash to the curb the hauler can leave it at the curb. Obviously use best judgement based on weather conditions if you know the trash container is going to blow away if left at the curb once trash has been removed.	8/19/2021 3:23 PM
55	Garbage collection should be as efficient and safe as possible. I would much rather haul my bins out on trash day and have collectors move safely and quickly through my neighborhood, as opposed to requiring garbage haulers to come find my cans and return them to my home. Additionally, my home (and many in my neighborhood) does not have a convenient place to store garbage cans, except behind the house. I have a long drive leading to a detached garage, and I do not want haulers to have to cross what amounts to the entire length of my lot to collect my garbage. Taking the garbage to the curb is not an onerous burden for most homeowners, and I'm sure an exception can be made for those who it does burden.	8/19/2021 3:13 PM
56	No	8/19/2021 3:04 PM
57	Container cleaning service for additional fee	8/19/2021 2:57 PM

Garbage Container Placement and Collection Survey

58	I prefer curbside. In winter I have less worry about someone slipping on my driveway. Even with the best effort there are days when it can be slippery. There is nothing wrong with having garbage containers by the road. It is part of life.	8/19/2021 2:54 PM
59	Over the past 25 years I have lived in 5 different cities all over the country (in the states of GA, IA twice, WA, and MD) and Sioux Falls was the first city that did not require the customer to place the container at the curb. I did not know why, just thought maybe it was because of the wind to limit spillage of garbage. I've always been fine with taking containers to the curb and I think it speeds up the collection process.	8/19/2021 2:53 PM
60	Recycling every week.	8/19/2021 2:51 PM
61	Haulers have a tough enough job. We should make it as easy as possible. Having "custom" options seems like it might be confusing and unnecessary. It's once a week, so if people can't manage it, they can hire a neighbor or teenager to help. It's a garbage and recycling service, not an a la carte restaurant. Keep it basic-simple, clean, and safe.	8/19/2021 2:51 PM
62	Curb side in winter is a problem	8/19/2021 2:48 PM
63	I live on a busy street; therefore, I believe the garbage containers should not be close to the sidewalk/street.	8/19/2021 2:40 PM
64	I'd like easier and cheap way to get rid of tree and shrub clippings.	8/19/2021 2:40 PM
65	It would be great for all haulers to service an area on the same day. Garbage containers in the area could be placed on the curb on the same day, leaving the rest of the week less cluttered.	8/19/2021 2:31 PM
66	I would like to know why hauling was skipped if applicable, and when it will be picked up if missed.	8/19/2021 2:27 PM
67	We have medical issues that sometimes make it hard for us to get containers to the curb.	8/19/2021 2:26 PM
68	I don't think so much concern should be placed on where garbage containers are placed, especially on collection day - make it easy for the haulers and have it be curbside. There are other more important things to worry about.	8/19/2021 2:25 PM
69	Maybe the garbage haulers could offer a discounted price for curbside pickup options.	8/19/2021 2:25 PM
70	The city should NOT allow for garbage cans to be visible from any angle of the street, aside from the day of pickup. Then --- ENFORCE IT!!!! If someone has too small a garage to keep garbage cans inside and they think they have to set them outside, they should set them behind their garage or house, (in their back yard if necessary). Visible garbage cans begin the demise of any nice looking neighborhood, regardless of the income level!!!	8/19/2021 2:21 PM
71	I don't mind taking garbage and recyclables to the curb. However I do worry about wind and having to retrieve recyclables from my neighbors yards due to the wind. That's my only reasoning behind haulers taking both from the house to the truck. I can retrieve the cans from the curb	8/19/2021 2:18 PM
72	I can see that it makes more sense for us to have our containers curbside for you, especially in the winter. But the opposite holds true for us if we are older and have difficulty moving it out to the curb.	8/19/2021 2:18 PM
73	I think it should be up to the customer if they want to place containers curbside or not. I say this because some elderly are not able to place containers curbside but I have been doing it for four years. Didn't know I was in violation of any law.	8/19/2021 2:17 PM
74	If we can keep people safer we should. Safety should come first. Curbside allows for quick, safe collection.	8/19/2021 2:15 PM
75	What about neighbors that have dumpsters? Shouldn't dumpsters have to be inconspicuous and lids closed, not exposing trash to neighbors? Landlords of houses and complexes in residential neighborhoods need to be held more accountable for their garbage nuisance!	8/19/2021 2:14 PM
76	I think this is ridiculous and we clearly have more pressing issues as a city. Everywhere I have lived it has been the residents responsibility to take their garbage to the curb and move it back to the house. It is more efficient and I don't really understand the issue.	8/19/2021 2:13 PM
77	It would be less traffic going thur neighborhoods especially when you have kids out playing or walking to/from school if all garage was picked up in same day.	8/19/2021 2:13 PM

Garbage Container Placement and Collection Survey

78	why suddenly is it more expensive to access the containers from the structure? If that is the case then our service should have been discounted during covid. If we will need to put containers curbside, will you fetch the containers and garbage when the wind blows them over? before and/or after pickup?	8/19/2021 2:13 PM
79	This all seems to be a way of charging more for a service that was already apart of the original cost.	8/19/2021 2:11 PM
80	Curbside placement is harder in windy or stormy weather when the container is more likely to blow over—especially after collection. I'm happy to place curbside when the weather will be calm, or take it out and have the hauler bring back to the house when it is windy.	8/19/2021 2:08 PM
81	I think the city should be divided into districts with one hauler for each district. Currently I have over 8 haulers driving past my house each week. What a mess. Having districts with one hauler would be more efficient, cheaper and less stinky garbage truck traffic. Each hauler would have to bid on a district. City would be responsible for the number of districts. Also all garbage would be collected on a single day!! [REDACTED].	8/19/2021 2:07 PM
82	Containers should be placed curbside by customer and returned to the house by hauler on collection day	8/19/2021 1:58 PM
83	Let the hauler decide what they want to do or are ok with. The wind has never blown over a full trash can that I have ever seen. Maybe an empty one... but that isn't that big an issue. I understand people with mobility issues may need/want to have the haulers pick the trash up from the house, but the majority of people can take it down to the curb themselves out of courtesy for the haulers.	8/19/2021 1:57 PM
84	The staff at Novak are always so friendly!	8/19/2021 1:57 PM
85	Make pick up more efficient. Cans at the curb on service day. That way the hauler is in and out of the neighborhood faster and idling for a shorter amount of time.	8/19/2021 1:56 PM
86	I see now reason why the city should prohibit curbside pickup. There are many more important things to focus on.	8/19/2021 1:56 PM
87	Melissa Wenck Is AWESOME. Great responsiveness. Always pleasant.	8/19/2021 1:52 PM
88	During covid & bringing containers to the curb & back. I did not see a decrease in cost of decreased service only increases. Same when price of fuel went down.	8/19/2021 1:51 PM
89	I have never lived in a community where garbage containers couldn't be placed on the curb. It seems absurd to have haulers get the containers and bring them back. Very inefficient.	8/19/2021 1:46 PM
90	While it's nice to not be out of luck if we forgot to put the bins at the curb (as in every other community), it's safer for the workers to not have to drag the bins back and forth.	8/19/2021 1:45 PM
91	I don't see a problem putting cans on the curb.	8/19/2021 1:44 PM
92	Curbside is a no-brainer. Minimal effort on homeowner, but crucial time savings for hauler.	8/19/2021 1:43 PM
93	Curb pickup with trucks that grab the containers and dump. Then it is faster, safer and cheaper!	8/19/2021 1:42 PM
94	We live in the country and have periodic burn bans so garbage had tendency to build up. Love the service.	8/19/2021 1:42 PM
95	I place our cans along the side of our house. Sometimes hard to get to the street. Not a very long approach.	8/19/2021 1:41 PM
96	Curbside is a poor option to survey. We paid for pickup from the structure to begin service. You shouldn't use it as an excuse to increase cost. Garbage cans and trash blow all over and into streets, causing driving hazards, especially in winter.	8/19/2021 1:41 PM
97	Haulers should refrain from missed garbage collection days with no service billing adjustments provided.	8/19/2021 1:40 PM
98	More issues can arise from needing to haul and have your garbage by the curb. it should be the intent the hauler retrieves it and puts it back otherwise i should just haul my garbage to the dump myself.	8/19/2021 1:39 PM
99	We gladly bring our container to the curb each week and will be happy to continue to do so as	8/19/2021 1:38 PM

Garbage Container Placement and Collection Survey

long as there is no penalty on the odd occasion that we forget which day it is. The only issue I have is it tipping over when it's windy or it blocking the driveway so we have to get out to move it in order to pull into the drive.

100	Trash bins, especially overfilled bins are UGLY. They are prone to blow over and trash then blows all over. Too many people are just SELFISH SLOBS. in other words, very TRUMP like. Return bins to the structure!!	8/19/2021 1:37 PM
101	I will put my containers where it is easiest for my hauler! How about we all work together, make this world a better place.	8/19/2021 1:36 PM
102	I am able bodied and can get my garbage to the curb but there are too many elderly in the city who cannot. This is a big risk to the elderly especially in the winter. Even able bodied people risk slipping on the ice when they come home from work, still have slippery work shoes on, and move their garbage. My husband fell this way last winter. Plus the SD wind on many days causes garbage that is on the curb to be blown all over and then eventually the empty cans end up in the street causing a hazard for drivers. Thanks for asking for our opinion.	8/19/2021 1:35 PM
103	As I get older the need to move collection containers back and forth is just one more thing to do. It also increases opportunities for injuries to the homeowner who may have issues with mobility. Perhaps senior citizens could be excluded from having to get containers to curb, but have them readily accessible to the hauler say at front of residence on collections day. My late mother would leave her walker at the backdoor, then walk unaided from backyard to front curb and then walk unaided to backdoor again.	8/19/2021 1:34 PM
104	Let the hauler decide the level of service available and the customer decide on the hauler based on the level of service wanted.	8/19/2021 1:34 PM
105	Very happy with NSS!	8/19/2021 1:33 PM
106	It is much safer for the hauler and employees especially in the winter if the containers are curbside.	8/19/2021 1:31 PM
107	The haulers should transport garbage receptacles to and from the houses because garbage service costs are extremely high.	8/19/2021 1:31 PM
108	Both should be allowed, but if they will not take my trash because i forgot to put it in curb they should retrieve it.	8/19/2021 1:30 PM
109	I imagine older folks would appreciate not having to haul the container to the curb. I also imagine folks would want to ensure the security of their home. I personally appreciate the ability to leave the containers closer to the house on heavy snow days. We completely appreciate our haulers!	8/19/2021 1:30 PM
110	I've been putting my cans curbside for 15 years, and so has everyone else in my neighborhood. It is just common sense to put the cans at the curb, and the fact everyone does it already pretty much says it all. Change the ordinance.	8/19/2021 1:27 PM
111	We are both elderly and one of us is in a wheelchair making moving the cans difficult and it is unfair to charge more for the valet service due to age and disabilities	8/19/2021 1:26 PM
112	I feel that just having the garbage/recycling containers sitting at the curbside on your pick-up day is awesome! I don't feel that the haulers need to take the extra time to come up to your house, drag the garbage containers to the truck, dump them and then have to haul them back to your house is a big waste of time for the haulers. It does not bother me to take my containers to the curbside and then when they are empty bring them back to the house. I don't have my containers sitting outside anyway, until the day scheduled for pickup. Plus in the winter time will help the haulers not slip on ice when walking up your driveway.	8/19/2021 1:26 PM
113	I don't mind bringing them to the curb most days. But on extremely windy days I would prefer to leave them against the house and have them be returned to the house so they don't blow into the street.	8/19/2021 1:21 PM
114	The color of containers should be up to the customer.	8/19/2021 1:10 PM
115	I don't mind that containers be kept out of sight on non collection days but I do think that, if able, the resident should move the containers to the end of the driveway on collection days. It's a benefit to the collectors and isn't really a nuisance to the neighborhood in the short amount of time that they are out.	8/19/2021 1:07 PM

Garbage Container Placement and Collection Survey

116	The current ordinances seem to be ignored as most of my neighbor's keep their trash cans out in the open every day. An awareness campaign is needed.	8/19/2021 1:03 PM
117	This is a mess. In SD it is windy. Leaving garbage near the road is a good way to spread trash all over the neighborhood. I pay for someone to get my trash, inlay them to get it and return it to my home. Money well spent. Not to mention garbage out front tells burglars that u are not home !!!	8/19/2021 1:03 PM
118	I honestly think it should be up to the residents to decide where they put their garbage containers for the waste employees.	8/19/2021 12:36 PM
119	Re: answer 12. WE just bought this house 2 years ago and kept the same service	8/19/2021 12:25 PM
120	If we can get garbage haulers through neighborhoods faster and more safely by putting cans out at the curb, then I'm all for it.	8/19/2021 12:12 PM
121	Most of my neighborhood brings the containers curbside on trash day and put them back that afternoon. I do not like garbage trucks through the neighborhood every day of the week.	8/19/2021 11:31 AM
122		8/19/2021 11:14 AM
123	I've had garbage cans blown over and it's a mess! Also, it's more obvious that no one is at home when the empty garbage cans are at the curb.	8/19/2021 11:05 AM
124	There are workforce shortages across all industries. We (taxpayers of Sioux Falls) need to support our garbage collectors. I can imagine the challenges they face with staff recruitment and retention.	8/19/2021 10:06 AM
125	Before the pandemic, I knew we were supposed to put garbage near the house and not on the curb. Some neighbors still put it on the curb and it would sometimes bother me. During the pandemic however, I've become used to placing it on the curb and don't see the reason to not allow this. If it is easier for the hauler and could potentially have cost saving benefits to the consumer, i'm all for it.	8/19/2021 9:43 AM
126	I feel there is no harm in curbside pickup, better for drivers safety and efficiency. However, receptacles should be stored next to the structure every other day of the week, not left curbside on non-pickup days. In a perfect world, an entire neighborhood would be picked up on the same day, allowing the other six days of the week to be free from containers on the street. Truthfully, most already do not follow the current ordinance and have not for years! Drive around some neighborhoods and you could write plenty of citations, but is it really worth it, no. Most people keep things tidy, bring their trash to the curb and remove the receptacles at the end of their pick-up day. I place mine at the end of the driveway at the start of my pick-up day and usually Novak brings them back up towards the house when they are picked up. They are great!	8/19/2021 9:34 AM
127	They will skip our house if we have forgotten to put our garbage at the curbside - not acceptable	8/19/2021 9:19 AM
128	I think it makes sense to bring garbage to curb but with becoming elderly and possibly not able to do in the future would like option to not bring it to the curb especially in winter. So made it difficult to answer many questions. We are happy to put garbage at curb if we are physically capable but will become more difficult especially in winter months.	8/19/2021 9:18 AM
129	Older people can have a difficult time taking their garbage to the curb. I know, at times, I do.	8/19/2021 8:52 AM
130	No one wants to go pick up the garbage that blows around if the wind blows the can over. And the wind blows them over a lot	8/19/2021 7:32 AM
131	I'm on disability. On a good day I put can out. Other days I leave by the house. I have aok. Ron is/wasmy garbage man. He is awesome. But this is his last week. He put a note on my account to retrieve if I'm unable to put by the street. Mondays rbs comes. Tuesday aok and Novak and Roos. Wm another day. Rbs is notorious for coming at 5:30am. I have called them 3 times. The lady says she will talk to the guy. Nothing changes.	8/19/2021 7:29 AM
132	The older I get the more concern I have of putting the container at the street level. I do not have a lot in them and have had to pick them up after they have blown over.	8/19/2021 7:09 AM
133	My current job requires a lot of traveling, having the hauler get and return the container from the house is a great value when I'm not home until end of week.	8/19/2021 7:08 AM

Garbage Container Placement and Collection Survey

134	In SF we have a lot of wind and storms brew up often at night. Neighbors have had garbages tip over and it's a HUGE MESS! Who has time to run around picking up their garbage that blows around if this occurs, AND who wants their own or someone else's garbage in their yard to pick up? I for one, will not be retrieving tipped garbage...GROSS!!!! This shouldn't even be a thing. Garbage in this windy area needs to stay by the structure like it's been in the past. It's also an eyesore looking down streets at garbage cans. My parents, who are elderly and thankfully living well in their own, haul theirs to the curb but they struggle in the winter when it's icy, as their driveway is sloped and it's hard for them at ages 89 and 91! PLEASE do NOT require garbage at the curb. If someone wants to put theirs there, is capable of doing so, or wants to pick up their garbage if their can blows over...have at it. But this should not be required. Garbage at curbs...lousy idea!!	8/19/2021 6:41 AM
135	i have had my containers left right in middle of my drive... no one can come or go without moving the containers first. MY garbage does not get picked up until around noon, life begins begins before noon and to have to move things several times a day just so i can come and go, NO!	8/19/2021 6:28 AM
136	Its not an eye sore to have the containers out by the curb on collection day. I think it would slow garbage haulers and cause more costs and discourage the haulers if they have to retrieve the garbage if they are next to the houe	8/19/2021 6:16 AM
137	I'm so shocked by this ordinance! Because all the garbage companies I have ever had REFUSE to pick up my garbage unless it's at the curb AND when you sign up for service with these companies, it says if you don't put your garbage to the curb, then they won't pick it up. I have forgotten several times to put it to the curb and my garbage didn't get picked up and this has been with at least 3 big, local companies in Sioux Falls. I can't believe there is an ordinance saying you're are not supposed to put it to the curb but these companies are telling you that you HAVE to. This has been going on for many years, well before Covid-19 existed,so it's not just because of the past year, it's always been like that. Someone should investigate this and figure out why all these companies are making people put their garbage to the curb or they won't pick it up, when it's against an ordinance!	8/19/2021 4:46 AM
138	Homeowners should >> NOT << keep the containers in the front of the structure outside on non-collection days. Homeowners should place the containers out of site except on collection days.	8/18/2021 11:30 PM
139	Waste management would not take my trash unless it was at the very end of the driveway in the past few years so we had to move it from the front of the garage, then down the drive way and lastly to the end if the driveway or they would not touch it. The haulers need to to their jobs then.	8/18/2021 11:07 PM
140	My hauler (Waste Management) will not empty my trash bins if they are not placed on the curb. If I am out of town on trash day and don't bring them to the curb, they are not emptied.	8/18/2021 11:03 PM
141	I'd like to see more details on recycling and what to put in and how to clean it.	8/18/2021 10:58 PM
142	If a Santation Employee would fall or injury themselves then the City shall be held responsible since it is there ordinance and not home owner . The curb is where is belongs. Curb is the right way.	8/18/2021 10:56 PM
143	We don't have room for the receptacles anywhere else.	8/18/2021 10:48 PM
144	My garbage hauler (Waste Management) put notes on my bins since April saying it was required that I put the bin curbside. Which is, apparently, contrary to city ordinance, though I never knew it.	8/18/2021 10:45 PM
145	Essentially, all I care about is if the bins are not blocking the sidewalk nor my walkway to the front door. Neutral otherwise.	8/18/2021 10:39 PM
146	I'll do whatever my hauler/city tells me to ensure continued trash pick up with the same excellent service I have had with both curb and structure placement	8/18/2021 10:22 PM
147	Being disabled makes it difficult to put the containers at the curb and bring them back to the home	8/18/2021 10:13 PM
148	The faster the haulers can get through their route, the lower the cost for us and the better it is for the environment. Also, us hauling our garbage to the curb may make us a little more mindful of how much garbage we're generating.	8/18/2021 10:04 PM

Garbage Container Placement and Collection Survey

149	I would prefer to leave my garbage containers by my residence. If it is windy they will blow over and garbage will be everywhere. I am also older and it is hard for me to pull them out to the curb. I live in a cul-de-sac so it is fairly easy for the garbage haulers to go around our little circle.	8/18/2021 10:04 PM
150	Price should go down if costumer places by curb and brings back after service. Saving the company time should reflect on the customer for helping out	8/18/2021 9:26 PM
151	If curbside pickup is allowed they will save money i.e. their profits will rise. This will not lower rates, they will keep the additional money and raise prices for a valet type service. I think it's best to leave the ordinance as is.	8/18/2021 9:20 PM
152	Curbside placement does not seem like a big deal, in particular on garbage pick up day or the day prior. I think the benefits outweigh any issues.	8/18/2021 9:17 PM
153	We chose our hauler based on process of elimination. We started with Novak but their billing system was so poor and they did not keep accurate records. Then we went to Sioux Falls sanitation and they went bankrupt. That was a nightmare. Finally we went with A-ok and they have been wonderful. They are always responsive when we call for questions or help. We keep our cans by our house and the men always pick them up and put them back.	8/18/2021 9:16 PM
154	Not all residents can physically move the bins back and forth!	8/18/2021 9:14 PM
155	I keep mine in my garage there is only putting it out to curb for pickup that makes sense.	8/18/2021 9:10 PM
156	Garbage haulers walking on my property to get the can means I can be liable if they are injured. You never know when ice will happen during winter time.	8/18/2021 9:03 PM
157	My Garbage Hauler is Waste Management. Today 8-18-21	8/18/2021 9:02 PM
158	Periodically we are out of town on Mondays (our day of pickup) and Tuesdays so we leave our cans up against our garage and visible on Sunday evenings. A number of times recently - under the temporary mandate - we returned on Tuesdays or Wednesdays to find our receptacles blown down the block (we're on a hill) and once a neighbor retrieved them for us. On two other occasions our hauler had an issue and delayed pickup a day or two and we spent over an hour each time picking up a full load of recyclables that the wind had spread over our and an adjacent yard! One of those times was a snow-filled winter and the other after a spring heavy rain. Each time would have been totally fine if they had been left parked up by our sheltered garage area. On two other parallel occasions to what I mentioned above, I helped elderly neighbors who experienced the same issues retrieve their garbage / recyclables.	8/18/2021 8:44 PM
159	I can put the garbage can by the curb, but would like the hauler to put it back by the house. If I am out of town the can sits by the curb for several days.	8/18/2021 8:41 PM
160	My opinion me as a customer should bring it to the curb and they put it back by house but as for the elderly it would be nice that the hauler does both. I feel each company could come up with a pricing structure that cheaper if the customer does both parts or if you want them to do both or part it would be structured as so	8/18/2021 8:31 PM
161	I don't mind the look of curbside garbage bins, and if we adopted city wide curbside pickup, those who are bothered by the look of it would get used to it. The reduction of truck emissions would be a huge benefit - we need to do everything we can to cut emissions.	8/18/2021 8:25 PM
162	We , as a community, talk about our "civic duty" frequently. Doesn't that mean helping out each other? I want to put my garbage on the curb just because doing so shows respect for our haulers and in a very small way, I'm helping out someone in my community.	8/18/2021 8:14 PM
163	For safety of workers, the trucks could have automated arms that come out, lift the container from the curb, dump contents, drop the container down.	8/18/2021 7:17 PM
164	Wind blowing over containers is a factor, and even though the city says we are not allowed to put the cans at the curb the waste management garbage collector left a note on the garbage can that said we had to bring it to the curb.	8/18/2021 7:02 PM
165	Do not bend to pressure from the hauler's. They are amply paid to provide their services,	8/18/2021 6:55 PM
166	I was honestly not aware this was not allowed as waste management required this at our previous address which was inside a mobile home park	8/18/2021 6:46 PM
167	We need to return to enforcing the existing ordinance! Many times homes have excess	8/18/2021 6:42 PM

Garbage Container Placement and Collection Survey

garbage from large purchases and/or family gatherings that can't fit into their containers. Those can be included and trapped when containers are up by homes, but become troublesome neighborhood debris when placed curbside. It also makes it hard for me to see kids when containers are curbside and blocking my view.

168	CLOSE THE LIDS AFTER DUMPING !! Place containers back were you picked them up! With the lids closed	8/18/2021 6:29 PM
169	I hope those of us who have difficulty putting the containers at the curb are given the option without added cost.	8/18/2021 6:24 PM
170	Close the lids after being empty so they don't fill up with water on a rainy day! Plus looks better and not so trashy in the neighborhood!!!	8/18/2021 6:23 PM
171	Redundancy in garbage collection. Waste and fees high related to multiple services to same area multiple days and times during the week. Increased road usage as well related to cost higher than 2 prior locations. Don't need Cadillac quite of service for garbage that isn't efficient for multiple reasons. Every area of country has same container and garbage wind concerns but this doesn't determine policy w cost that r higher for this service. 3 services x 3 = lower cost. Yard waste fees excessive. I like idea of prepaid bags for excessive yard waste. Can be placed at anytime without extra phone calls etc. Convenient and better meets clean up needs for none yard waste cystemers.	8/18/2021 6:23 PM
172	Placing garbage containers at curbside should be the norm, as it is easier for the haulers, and very little inconvenience for the patron to do this. Large cities in the country already do this. I moved here from Arizona 7 years ago and they picked up curbside ...no problems	8/18/2021 6:22 PM
173	.	8/18/2021 6:13 PM
174	Garbage containers left at curb for days after garbage day. Is unsightly. Is hazardous as it blocks view.	8/18/2021 6:11 PM
175	Des Moines, IA have trucks that have side container lifts. Driver never gets out of truck. Does same side of street. 1 service through city. Cost are more resonable than SF. Containers in grassed areas verses driveways for single driveways etc. Haven't really seen issues when visiting area. Service is speedy and efficient. Paper bags are prepaid including additional landfill fees at time of purchase. Minimizes charges & 5 bags under \$9.	8/18/2021 6:11 PM
176	We need it to be as it was before Covid-19 and enforced by the city. Containers at curb are an unsafe traffic view obstruction and eyesore.	8/18/2021 6:06 PM
177	I would like the option to place them on the curb but should I forget the hauler needs to get them. I would be doing this as kindness and not as an obligation. After all not everyone can do this.	8/18/2021 5:36 PM
178	reasonable to allow for collection at the curbside but not required. with possible incentives that each hauler could provide to customers -- then consumer can decide if cost vs convenience more important to them	8/18/2021 5:30 PM
179	Require use of hauler containers. No piles of bags and trash filled boxed along side the containers. That is ugly and more prone to wind movement.	8/18/2021 5:23 PM
180	They are lazy if they dont want to walk up the driveway. The excuses they are giving for curbside dont float.	8/18/2021 5:03 PM
181	Same garbage service for 20+ years. Fair price for service. Don't like the gigantic containers some services use(ie Waste Management) Not all garages can accomodate these large sizes.	8/18/2021 5:03 PM
182	It should be at the curb for safety. Some driveways are steep, and driveways can get slippery. Who pays if the hauler gets hurt?	8/18/2021 4:54 PM
183	Currently, as I understand it, If you are living in a mobile home park the ordinances do not apply. I am a handicapped resident living in a mobile home and the hauler/landlord has the say. I think all residents, regardless of location, should be treated equally!	8/18/2021 4:46 PM
184	In the community where I lived before, a suburb of Chicago, there was one hauler for the entire community with a day assigned for the area. Cans were put out the night before, and had to be retrieved by the homeowner within 24 hours. It is ridiculous for everyone to have a different hauler on a different day. It is a waste of fuel and too many exhaust fumes.	8/18/2021 4:35 PM

Garbage Container Placement and Collection Survey

185	We live in South Dakota where the wind is typically blowing. Curbside pickup might cause people not to recycle as much because you can't always fit everything in the bin. During covid when you could put your trash bins at the curb there were days when we had a large amount of cardboard that wouldn't fit in the bin. On these days I would leave the bin by the house and use the trash bin and recycling bin to keep the cardboard from blowing around the neighborhood. Typically when trash blows around it doesn't stay near the bin which then means it becomes someone else's responsibility to pick it up.	8/18/2021 4:31 PM
186	I would prefer haulers get the garbage from curbside placement, especially in winter as our driveway no matter what is slippery in the winter due to facing north. I would rather slip and fall than having a hauler get injured.	8/18/2021 4:19 PM
187	I see that WM stated that with the liners in the cans nothing should blow around. But they fail to mention for recycling there are no liners allowed and "If WM employee sees a garbage can overturned they may pick up the trash around the can." May is the key word and we all know that means they won't bother to pick up the trash. Not just WM but other Hauler employees.	8/18/2021 4:17 PM
188	I got an email last year I believe stating that many of our haulers had torn shoulders due to dragging cans in the snow. I think it is the least we can do by putting our cans curbside.	8/18/2021 4:11 PM
189	if the garbage hauler is going to charge extra to walk up my driveway to retrieve the garbage cans I will cancel service with them	8/18/2021 4:10 PM
190	I believe the old system worked fine and kept the city looking better than all the containers at the curb. Many were left for days by a homeowner out town or just plain lazy to have them back at least to the building's perimeter.	8/18/2021 3:53 PM
191	My collectors -- Dorian and all with Waste Management-- are awesome!	8/18/2021 3:22 PM
192	The large containers are unsafe curbside as they can (and do) block the view of kids in our neighborhood. Please return to enforcement of existing ordinance without changing it.	8/18/2021 3:21 PM
193	If curbside placement is prohibited, then why in the hell is Waste Management forcing people to place it at the curb. Nasty notes, leaving containers at the bottom of the driveway after emptying them -- even refusing service for some people! First they buy up all their competitors, now it looks like they are buying city government. How much is this mafia operation paying YOU?	8/18/2021 2:55 PM
194	Ideally trash haulers should be by area of city to reduce the number of trucks on a neighborhood street and minimize truck noise throughout the day.	8/18/2021 2:54 PM
195	I feel so strongly that the City of Sioux Falls should not have garbage tubs on the curbside. When I have been in other towns/cities on "garbage day", I think it looks really BAD. Since all the service is private, we all share the cost of the extra work to keep our city looking neat. And, the consumers can shop around for the best price.	8/18/2021 1:52 PM
196	Once cans are placed curbside, customers tend to leave them there	8/18/2021 1:43 PM
197	There are people in my neighborhood that put their trash out by the curb and cans get blown over. The person it came from is never responsible for picking up the garbage because it blows down the street.	8/18/2021 12:51 PM
198	The city should do something about all the people who dump their garbage into the park dumpsters.	8/18/2021 12:47 PM
199	Auction off one hauler per development to save money and roads	8/18/2021 12:27 PM
200	I will do what ever is needed to have my garbage containers by my back door. Garage is not attached and located a ways from house. Especially hard in winter. Have fallen taking garbage out to garage.	8/18/2021 12:15 PM
201	Personally I do not have an issue with garbage containers sitting at the end of the driveway. In my neighborhood pretty much everyone moves them back by the end of the day. The containers are housed either along the side of the house, in front of the house, or in garage and I think the home owners should be able to decide where they would want to keep their bin.	8/18/2021 11:58 AM
202	I do not want to see our beautiful city turned into the city dump. When the wind blows the container over all unsecured contents can be strewn and varmints can carry the contents away.	8/18/2021 11:53 AM

Garbage Container Placement and Collection Survey

203	Safe working environment for the garbage haulers needs to be paramount in this decision.	8/18/2021 11:44 AM
204	Container placement at the curb is an eyesore! Many times the container blocks the sidewalk for outdoor walking. I have seen numerous containers blown over, garbage strewn all over the street and also into other neighbors' yards. It is the responsibility of the homeowner to be aware of how and what they place in their garbage and be aware of what happens to that container.	8/18/2021 11:43 AM
205	Many elderly are simply unable, especially in the winter months, to get the can to the curb. That should be of top importance and consideration!!	8/18/2021 11:43 AM
206	I agree the shorter idle time the better. Have the home owner go curbside within 24 hours of pickup. But must warn everybody not to block mail boxes.	8/18/2021 11:12 AM
207	I've lived in Boston, Chicago and Portland and always put my containers at the curb on garbage day.	8/18/2021 11:11 AM
208	THE CONTAINERS SHOULD BE INSITE OF THE STREET FOR THE HAULER ON DAY OF PICK UP.	8/18/2021 10:20 AM
209	City should remind the haulers that they are to return carts to house/structure. Had to retrieve my cart from down the street, because of wind.	8/18/2021 10:09 AM
210	Its fine pulling out on day of collection, and would like to have hauler push it back when we know its collected	8/18/2021 9:55 AM
211	Sioux Falls is the only place I've ever been that doesn't do curbside service. It would be nice to preserve our streets with less trucks.	8/18/2021 9:54 AM
212	WE are very capable of putting the containers out and returning them inside of our garage. However the elderly or disabled may not be. I think this should be an individual situation with their hauler.	8/18/2021 9:40 AM
213	I don't mind putting the containers by the curb, but I would like the hauler to place them nicely back in place, out of the way of where we drive on our driveway, not just toss them in the middle of the driveway	8/18/2021 9:37 AM
214	It is more friendly to the environment to allow curbside.	8/18/2021 9:26 AM
215	I try to remember to bring it to the curb for the collector the night before, but I do NOT want to have the ordinance read that I can be charged more for forgetting.	8/18/2021 8:34 AM
216	I think it is OK to place the containers at the curb on pick up day but have the hauler return it to the structure after being emptied.	8/18/2021 8:33 AM
217	why did you keep asking some of the same questions	8/18/2021 8:10 AM
218	In my previous community you had to bring the container out and bring back yourself. Especially on holiday weeks garbage cans were placed out at wrong times all the time. When we moved here we didn't know you didn't have to bring it out, in fact we found out by accident because we forgot to put it out. It is such a great service to not have to think about when to put it out and especially putting it back. It's the little things sometimes, but it certainly is something we love about living here. I will say that it is super annoying that garbage is not picked up on the same day by all on our street. Having garbage trucks on our street every day of the week is a hazard and loud. I do wish the companies could coordinate the same day for the same area.	8/18/2021 7:52 AM
219	Different neighborhoods have different needs. If you have a driveway that leads to the street it is easy to do curbside. Other houses have no drive so that practice would be troublesome for the home owner. Haulers and customers should negotiate the bin placement that works for everyone and if it is curbside so be it.	8/18/2021 7:38 AM
220	Waste Management is my hauler and they always leave the cans on the bottom of the street and never put anything away. Half the time I can't even get in my driveway because it's blocked because I leave them right in the middle when I get home. This is ridiculous.	8/18/2021 7:28 AM
221	IF THE CITY CARES WHY ARE THEY LETTING THE HAULERS SET THE STANDARD, PICK UP, EMPTY, PUT BACK. !!!	8/18/2021 7:20 AM
222	no keeping containers in front of house on non-collection day.	8/18/2021 7:06 AM

Garbage Container Placement and Collection Survey

223	Dislike having multiple garbage trucks in the neighborhood every day	8/18/2021 6:45 AM
224	Garbage should be allowed to be placed by the road for haulers, but if I happen to forget, the hauler should retrieve my waste from beside my house at no extra cost. The convenience for the haulers should not come with a cost difference for me!	8/18/2021 6:42 AM
225	I like how our garbage hauler does it now: we place containers curbside and they leave empty containers by garage when done. Win win.	8/18/2021 6:17 AM
226	I think homeowners should be able to put bins on the curb. However I don't think the hauler should be able to bypass bins that are left near the home if a homeowner forgot to move it to the curb.	8/18/2021 4:59 AM
227	Why is there not just one hauler in Sioux Falls. Crazy the number of trucks running on streets for trash. Use one and less trucks beating up streets.	8/18/2021 4:52 AM
228	I need my garbage can up by my house, as I am handicapped and it is very difficult for me to put it curbside and then try and get it back up my driveway.	8/18/2021 1:00 AM
229	I chose my garbage hauler because they are locally owned. I like to help by putting my trash at the curb but like it close to the house on windy nights or when I leave it out and leave town.	8/18/2021 12:25 AM
230	There are far too many companies offering the same service each of which collects from one or two houses in the neighborhood. This results in a half dozen different trucks up and down the roads over different days. Not only are there cans and piles of trash throughout the neighborhood multiple days a week but the heavy truck traffic obviously has an impact upon our roads. Companies should bid on areas or districts within the city so there are no more than three or four haulers in each area. This ensures there is competition but reduces the total number of trucks driving up and down the roads. Also each area or district should limit garbage collection to one day a week so cans and trash piles aren't on continual display.	8/17/2021 11:39 PM
231	I am happy with current ways. We set containers in driveway near sidewalk and hauler kindly returns them closer to garage.	8/17/2021 11:02 PM
232	Please start fining people that keep their garbage cans in front of their house/garage 24/7!!	8/17/2021 10:56 PM
233	Residents should be more aware when closing collection receptacles due to littering and windy days and the leaky mess and grease spots all Over the streets from the unmaintained trucks.	8/17/2021 10:55 PM
234	Garbage cans should be off the curb by evening of the day it was picked up.	8/17/2021 10:44 PM
235	Curbside day of collection only. Otherwise stored up at structure.	8/17/2021 10:43 PM
236	Why are we wasting time on this? The previous policy kept the city looking nice without trash on the streets and the haulers were in business so they must be making money. Now big debate on needing to raise prices to go back to the way it was? Ridiculous, all these utility type service constantly trying to get another filler out of the consumer.	8/17/2021 10:37 PM
237	City should have One Garbage Hauler for each Neighborhood, too much damage to roads having 6 or7 Hauler driving down same roads to pickup. Choose One.	8/17/2021 10:27 PM
238	Garbage hauling costs didn't go down when customers were forced to take containers to curb which allowed garbage companies to get more done in a day. Yes help is hard to find but the place where I work is runny crews with one to three people short, we just deal with it. Why should garbage haulers be able to cut back on service, not lower prices for less service. When covid hit our company we had less hours of work which means less income but garbage companies got to get same money from customers for less service. Also garbage containers on curb side looks ugly and it happens everyday, SF is a nice looking city let's keep it that way. Garbage pickup all on one day, with the number of garbage haulers SF has, will create chaos on some streets as most haulers come between 6 am to 9 am in our neighborhood.	8/17/2021 10:25 PM
239	I live on a busy street, when garbage bin left in curbside, sometimes they dont leave it on the side making it difficult for me to enter in my drive way. I have found it fallen many times, not sure if just careless or the wind.	8/17/2021 10:23 PM
240	It seem like there are far too many garbage trucks on the road in general. I know garbage trucks put a ton of strain on road conditions which are obviously expensive to repair. I would like to ultimately see contracted garbage service similar to utilizes so only 1 truck drives down our street each week.	8/17/2021 10:09 PM

Garbage Container Placement and Collection Survey

241	The city of Sioux Falls ordinance on garbage containers is absolutely ridiculous especially since you allow telecommunication companies to put hideous green boxes in front yards for all to see.	8/17/2021 10:05 PM
242	Edge of the driveway on the homeowner side of the sidewalk seems to be a solution and doesn't block sidewalks or driving areas	8/17/2021 9:57 PM
243	Older people find physical difficulties hauling containers to and from curbside I would not be able to do it.	8/17/2021 9:55 PM
244	City should let bids out for neighborhoods for providers or provide garbage service to residents to decrease traffic, road deterioration and should easily improve price	8/17/2021 9:52 PM
245	With the terrible windsand weather we have in South Dakota it seems to make the most sense to not have a required location. Bringing to the curb or leaving at the house should be acceptable. On nights when I know it's going to storm or have high winds I keep the cans next to the house. This limits the risk of the garbage/recycle cans tipping and blowing trash all over. On not windy days I dont mind bringing it to the curb to cut back on time and cost for the hauler.	8/17/2021 9:48 PM
246	I'll do whatever I can to make an already hard job not any harder than it has to be. I'll happily bring my containers curbside on collection day, there is absolutely no reason I can't. Also, it makes it faster for the driver therefore safer in my eyes because they're not blocking driveways/traffic as long in one place	8/17/2021 9:36 PM
247	We need to have the same hauler in our neighborhood.	8/17/2021 9:32 PM
248	If hauler spills any garbage, they should pick it up	8/17/2021 9:10 PM
249	I have a neighbor that leaves their containers in their front yard near the sidewalk ALL the time! They don't care where they are at. Disgusting!	8/17/2021 9:05 PM
250	I'm more concerned about people not concealing their waste containers. Too many are left in the driveway or front yard. Looks horrible	8/17/2021 9:04 PM
251	Limit haulers to a neighborhood. Every day my street has different vendors picking up. It is wasteful to see so many vendors all drive through and waste their gas, disrupt the early morning hours and damage roadways. One hauler one each block. Let them bid on a neighborhood	8/17/2021 9:01 PM
252	Neighbor hood looks bad with all the trash cans sitting curbside. Trash cans are in way for leaving or returning when sitting in the end of driveway.	8/17/2021 9:00 PM
253	Te wind blows trash all around my community. This last year has been horrible I would link that to the curbside mandate. And then no one else picks it up. It makes it look very trashy.	8/17/2021 8:27 PM
254	It doesn't seem cost effective to have so many haulers for the city. The number of trucks that go over the same street per week is hard on the streets.	8/17/2021 8:16 PM
255	The workers who provide garbage collection provide an invaluable, disrespected, and often overlooked service to our city. The least we can do is bring our trash to the curb for them. Regardless of ordinance or law, I will continue to do so.	8/17/2021 8:04 PM
256	We really appreciate our small business haulers, D and C Solid Waste.	8/17/2021 8:03 PM
257	I think it should be left up to the home owner where to place the container on collection day: at the curb or not. The container should then be returned to the storage location by the end of the day, if placed by the curb on collection day. I think a bigger problem is with home owners that do not store their containers in an inconspicuous location.	8/17/2021 8:03 PM
258	While I feel it is matter of courtesy to put my cans of the curb I hesitate to make it policy. I think about my elderly neighbors or a fir neighbor with a disability tgat may not be ableto get their garbage cans to the curb. They would also be the ones least likely to afford additional costs to have their cans taken and brought back to their homes by haulers.	8/17/2021 8:02 PM
259	Surely the city can find other more important things to worry about than where garbage cans are on collection day.	8/17/2021 8:00 PM
260	We have our garbage cans next to the garage. It is convenient for us. Our haulers get the cans and bring them back. The are a great company.	8/17/2021 7:44 PM

Garbage Container Placement and Collection Survey

261	Go to only one hauler city wide.	8/17/2021 7:43 PM
262	I think the biggest question on this survey is #11 because my neighborhood has pickup five days a week. If it was all on one day, receptacles wouldn't be an eyesore every day of the week. If possible, pickups early in the week are preferable to end of the week pickup as well.	8/17/2021 7:43 PM
263	I think it should be up to the home owner if they want to take it to the curb.	8/17/2021 7:26 PM
264	My biggest concern is containers being blown over by the wind or knocked over by vandals after they're placed for pickup at the curb. (Many people put their receptacles by the curb the night before pickup). This is much more likely compared to receptacles placed next to a structure. Beyond that, placing receptacles by the curb looks ugly. The city's recently rescinded requirement to place receptacles at the curb is going to hurt the residents in the form of rate increases because the haulers prefer not to pickup and return receptacles to the structure. I don't have much faith that haulers are going to do a very good job of returning receptacles to the structure even if the homeowner pays extra for that level of service in an a la carte service scenario.	8/17/2021 7:25 PM
265	First and foremost, safety first. General healthy situations are just as important. If trash is only curbside day of pickup, there are no piles of trash more than that day of pickup, & all trash is securely contained in either bags or bins, it shouldn't be a health or safety concern.	8/17/2021 7:23 PM
266	Hi I think the garbage companies should be able to operate as they choose. If the consumer isn't happy with their service, they can see what the other companies have to offer. Free market.	8/17/2021 7:21 PM
267	Same day collection within the neighborhood by all haulers would be great. We have trash collection every day of the week and it is a bit of a noise nuisance.	8/17/2021 7:19 PM
268	Should be an option to not have to do curbside	8/17/2021 7:01 PM
269	Naval has not been returning cans to an inconspicuous spot, they leave them by the curb in my neighborhood after collection even when I have mine place up by the house for pick up	8/17/2021 7:01 PM
270	I wish there was only one or two haulers so that we did not have an Armada if garbage trucks chugging through our neighborhood weekly. I also wish they were emissions tested as some of the smaller trucks are air pollution hazards.	8/17/2021 6:59 PM
271	The customer should bring their can to the curb, only reason they shouldn't is if they are disabled or elderly.	8/17/2021 6:50 PM
272	If the hauler is still using metal trash cans then they should be kept by the home.	8/17/2021 6:48 PM
273	If ordinance stays, then haulers need to actually attempt to look for the trash cans on the side of the house, not assume they weren't put out.	8/17/2021 6:48 PM
274	With most houses these days the front door is set back further than the garage. A home owner shouldn't have to step out his front door and look at neighbors garbage piled up beside the neighbor's garage. Garbage cans should be stored out of view except for pickup day. No exception. I'd rather see garbage cans on the curb for one day instead of having to look at them 7 days a week because it is left in front of or beside the garage.	8/17/2021 6:48 PM
275	Neighborhoods should be same day collection not 3 or 4 different days of week	8/17/2021 6:41 PM
276	Allow bags in recycle as it makes a mess if you have to take your recycle out of the bag every day	8/17/2021 6:40 PM
277	I have over 20 trucks come down my road. Different companies that pick up garbage, recycling and yard waste. Each garage provider should bid neighborhoods. Would save money for everyone, time for haulers and roads wouldn't have all the weight on them.	8/17/2021 6:38 PM
278	As a senior citizen it is sometimes very difficult to bring our trash and recycling to the curb. I don't want to bring it down the night before because once the wind blew it over and damaged my mailbox and I had to pick up trash from the street and from my neighbors property. This is also a problem in the winter with a slippery driveway.	8/17/2021 6:24 PM
279	Survey Monkey? REALLY?? You intend to base your public policy decisions on a damn online poll????? What idiot came up with that idea? Does survey monkey tell you that this is a statistically valid sample of public opinion? If they do, sue them! This poll is nothing but junk. If curbside placement of containers is currently illegal, then why is the city not enforcing it's	8/17/2021 6:20 PM

Garbage Container Placement and Collection Survey

ordinance????? I'm tired of nasty stickers on my containers from the mafia dons at Waste Management. Do they run this city now????

280	It's the least we can do. We live in a retirement community so I feel For the older ones who are unable to easily move their cans so I make it my job to help them every week. They don't even know it's me moving them back for them.	8/17/2021 5:38 PM
281	City should only have one service serving neighborhoods to save wear and tear on roads. Our neighborhood could be done in an hour if all were with one service; now it takes all week with 4 or 5 services.	8/17/2021 5:26 PM
282	In hot or cold weather, let customers put it out by the curb for convenience of the workers. What is not mentioned here is that it is easier for slobs to use our garbage can if it is next to the street (don't know if that has happened to us).	8/17/2021 5:02 PM
283	I live in a core neighborhood with a small garage with no room for storage. All of my block leaves our collection containers out always. We don't mind!	8/17/2021 4:38 PM
284	I really hope we do not change this policy - the brightly colored trash containers are already so ugly and having them at the end of the driveway will be so unsightly. The garbage haulers already charge enough to be able to walk a few extra steps - that the service we pay for.	8/17/2021 4:25 PM
285	Garbage cans should only be closer to street on collection day. I would prefer someone not walking around my house or garage looking for garbage cans. Prefer putting my cans in driveway or somewhere away from garage on collection day.	8/17/2021 4:18 PM
286	Haulers should receive fines if garbage is not collected during the dates agreed (+/- a few days)	8/17/2021 4:02 PM
287	I think it should be curbside. I think its part of owning a home your responsible for having your trash out for the hauler to haul away. Its not the haulers that need to chase down containers of each residence. I think the each counsel member should ride along with those haulers at least one day to see what they endure every day.	8/17/2021 3:50 PM
288	I believe an ordinance is appropriate that prohibits conspicuous placement of garbage containers any day except collection day.	8/17/2021 3:46 PM
289	I don't understand why Sioux falls has privatized garbage collection. Plenty of other cities of similar sizes have garbage and recycling serviced by the city.	8/17/2021 3:40 PM
290	For residential neighborhoods, curbside placement should be allowed on collection day and not allowed on days that collection does not occur. This is a win-win (and honestly what happens already in my neighborhood regardless of the ordinance in place).	8/17/2021 3:26 PM
291	Being a corner lot on a busy street, we tend to get a lot of garbage blown into our yard. That amount increased a lot when everyone moved to curbside during Covid. I think that might have been due to the garbage cans blowing over in the wind.	8/17/2021 3:15 PM
292	I don't mind taking my trash to the curb as much as I do returning it after the garbage has been hauled. Also, my company never told me that I was not supposed to keep it near my structure. It seems as though they took advantage of expired COVID protocols to reduce their level of service.	8/17/2021 3:09 PM
293	It is the nice thing to leave your garbage at the end of the driveway. I try to help people as much as possible.	8/17/2021 2:53 PM
294	Anything we can do to make garbage collection more efficient while considering the physical effort required of our providers should be considered. Think about collection after a major snowstorm or ice event.	8/17/2021 1:47 PM
295	I do not like that they want to place at bottom of driveway. Why can't the haulers but on boulevard instead	8/17/2021 1:43 PM
296	i was a hauler for 12 years. all that time the hauler is walking back and forth, the truck is running. think how much fuel would be saved, as well as the wear and tear on the hauler themselves. i took a pedometer with me for quite a while, i averaged 7 miles walking everyday. think about that.	8/17/2021 12:27 PM
297	Should be placed in garage or secure location not visible to those passing by.	8/17/2021 12:18 PM

Garbage Container Placement and Collection Survey

298	The city has more pressing issues than this such as crime, pot holes, bad streets, or out of control drivers.	8/17/2021 11:55 AM
299	I am disabled and can not push all those cans out. In neighborhood people will tip over or mess with anything by the street.	8/17/2021 11:48 AM
300	do not go to tiered pricing depending on where the containers are placed!	8/17/2021 11:23 AM
301	My hauler needs them to be on a concrete surface for safety of thier employees. I normally have them on the grass next to my driveway.	8/17/2021 10:53 AM
302	I should be able to place my container curbside if I want. If I forget my service comes up to the house. As far as I am concerned the ONLY ISSUE is where the containers are placed on days not scheduled for pickup. By the house is my preference.	8/17/2021 9:48 AM
303	I wish the ordinance would be enforced. Garbage cans sit out in our neighborhood all the time, not just on the day of pick up.	8/17/2021 9:21 AM
304	I have no problem bringing garbage to curb but feel hauler should return them to front of garage. It just does not give a a very good image to the neighborhood especially since it can happen every day of the week. Also feel strongly that they should all pick up the same day of the week. Start enforcing the law of storing people's garbage containers at side or back of house or inside garage	8/17/2021 8:48 AM
305	Keep the containers out of sight between collection days.	8/17/2021 8:36 AM
306	I feel we should place our garbage containers near the curb for the hauler, then they can place it back....but only if weather allows. If its windy, I think it should be left by the house so it won't blow over. Just use common sense on what makes most sense that day.	8/17/2021 8:02 AM
307	It really is no big deal to place the containers at the street. We have been missed on trash day even with containers at the street so I worry it will be worse if they are not curbside.	8/17/2021 6:53 AM
308	Business are short help now a days. Whatever we can do to help out and keep a worker from leaving the better off we all are. It's such a small task. And COVID is far from over.	8/17/2021 6:31 AM
309	Some elderly customers cannot physically move their garbage cans to the curb and back. That should be the garbage collectors job	8/17/2021 6:22 AM
310	I have seen my hauler leave the containers all over the curb not at curb spot where I left them - knocking over the bins and trash and recycle Every where - on snow days hauler left them every where so risk of customers having to get out of car and move and haul Back to structure - they want us to help them when they don't - I had a broken foot and had to try and haul Containers away so I could Park - they do not respect the customer - when by structure never has this issue	8/17/2021 4:45 AM
311	My driveway is very long, slanted, and narrow. It is the only one on my street like that. Under the current rules, the garbage collector would have to retrieve my bins from way up by my backyard, pulling the bins in a narrow space past my car. I don't like the risk of my car getting damaged, so I have and will continue to place my bins at the section of my driveway that opens into the street. My garbage collector always returns my bins and leaves them behind my car, so I am able to safely maneuver the bins past my car to put them back in their place.	8/17/2021 12:27 AM
312	Garbage containers should be brought to curb or end of driveway as it is safer for quick pick up and keep traffic holdup at minimum. Safer for driver in winter also by not having to hurry to run up icy driveways.	8/16/2021 11:04 PM
313	I don't mind either way if they are collected from the curb or house. The hauler putting them back is nice because then you know it has been done when you get home.	8/16/2021 10:58 PM
314	The curb side would be safer for the drivers in the winter months when driveways may have hidden patches of ice and packed down slippery snow.	8/16/2021 10:31 PM
315	Seems ridiculous to even have this ordinance.	8/16/2021 10:22 PM
316	I keep my containers next to the garage, in the garage or right by the garage. It's gets windy where I live because it's open so leaving them by the curb can make them fall over at times. I don't like leaving them there. I would do it though if required.	8/16/2021 10:20 PM
317	It's anti-free market but I think it'd be better if one hauler serviced each neighborhood. There'd	8/16/2021 10:02 PM

Garbage Container Placement and Collection Survey

be less heavy truck traffic and probably more efficient for the hauler as they could pick up waste from all homes / businesses in one pass thru.

318	No. 7. They should be allowed to put garbage containers out the night before pick up. Sometimes he puts it out on Sunday evening, sometimes Monday morning. In case they come early. The way we did it in Wgtn. Speeded up the whole process.	8/16/2021 10:00 PM
319	Elderly have trouble putting/retrieving cans to/from curbside. This should be the hauler's responsibility	8/16/2021 9:52 PM
320	This seems like a silly ordinance to enforce when the greater good can be made with some simple effort by homeowners. It is a sad state when we dont take care of our haulers and need a survey to know what the right thing to do is.	8/16/2021 9:28 PM
321	At our winter home in Arizona, we may put our garbage containers out after 4pm on the day before pickup. Then the containers must be put away by the homeowner by 4pm on the day of collection. Seems to make it much more efficient for the hauler.	8/16/2021 9:17 PM
322	I have always taken my containers to the street (I didn't know that wasn't allowed before). I the collector saves time collecting and it's better for the collecting staff it should be reflected in their pricing which should be lower.	8/16/2021 8:58 PM
323	People should put their cans out until the late evening if it is to be picked up the next morning.	8/16/2021 8:37 PM
324	I do not want the liability of the haulers coming on my property to my house to retrieve and put the cans back. Especially in the winter when a slip and fall can easily happen. We keep our cans in the garage in the winter because we don't clean half of the driveway. There is not a convenient place to put the cans in the winter where the hauler can get to them without dragging them through the snow. I would have to back out of my driveway, get out of my car, get the cans out, before I could leave for work, and the opposite when I got home. I have been putting my cans at the end of my drive way for 20 years, why is this an issue now?	8/16/2021 8:32 PM
325	I fell sorry for the trash haulers in the winter some of these neighbors leave there cans in snowbanks behind cars etc.	8/16/2021 8:29 PM
326	I have physical issues which make it impossible for me to take waste and recycle containers to the curb . I pay a good price for this pickup service and I am not going to risk my physical safety to save 1 or 2 minutes of time for a well-built, healthy young man. I hope that individual circumstances are taken into consideration making this decision. I implore you to keep this matter so that it complies with the long- standing ordinance. Thank you.	8/16/2021 8:23 PM
327	streets look better with out trash cans on the curb side	8/16/2021 8:19 PM
328	I've seen people search in garbage containers when left at curbside.	8/16/2021 8:01 PM
329	each Monday, we have 3-4 different trash haulers come down our short 4-block street. I've always wondered why the city doesn't assign a certain hauler to a specific 'district'/ area of town, so there is only one hauler, that can just pick up the entire street's trash, w/out the trucks from different companies on the street each week.	8/16/2021 7:49 PM
330	We were told by Waste Management that although the city wasn't requiring garbage cans be placed on the curb any more because of Covid, that we should still do it. Don't think many people know about the law. Most in our neighborhood put theirs on curb and we have many different haulers. Will be nice not to have to do that. Hope all the haulers know.	8/16/2021 7:47 PM
331	I don't want my 86 yr old Mom walking down her steeply graded driveway to place or retrieve her bins, esp. in the wintertime!! Not safe for her!	8/16/2021 7:28 PM
332	I have a steep driveway and it will be almost impossible for me to move the garbage containers up and down it in the winter.	8/16/2021 7:27 PM
333	I am elderly and have health issues which makes it difficult to transport the garbage to the road.	8/16/2021 7:08 PM
334	Customers should place their containers curbside on collection day. Haulers should return the containers to the house after collection. Let owners store their containers wherever they deem best adjacent to their home on non-collection days. Every home and neighborhood is different. Let Residents do what is best for them. As for hauler service, err on the side of market forces after establishing minimum standard.	8/16/2021 6:21 PM

Garbage Container Placement and Collection Survey

335	I wish the haulers would pick up trash that blows out of a container they are dumping into the truck. We have problems with neighbors trash always blowing into our yard.	8/16/2021 5:56 PM
336	When my neighbors and I are outside talking to each other and a garbage truck goes by, we have to stop talking. Having them pick up garbage on only one day of the week would cut down on noise pollution.	8/16/2021 5:55 PM
337	Keep the existing rules in place. No need to change. We lived in Omaha where curbside service was required. It was ugly with tipped over containers and excess garbage along side the containers.	8/16/2021 5:16 PM
338	What's more obtrusive than garbage cans lining the curb is so many different haulers coming through 6 days a week. Environmentally and financially, a city run waste removal would be best. The different haulers could be assigned neighborhoods. They would save money on gas.	8/16/2021 5:11 PM
339	Having talked to the provider after the temporary Covid change, was told by them that would continue pickup and return to the curb, unless I would pay for a specialty service (more money) because their insurance liabilities ended at the curb. After I talked two city department people they told me to return to the permanent ordinance instructions. Waste Management told me they would only do it for an additional cost. I'm going back to the previous way (not putting them at the curb). If they don't pick them up I will be talking to the city commissioners.	8/16/2021 4:46 PM
340	I hate seeing garbage cans in driveway all the time people need to put the elsewhere makes the neighborhood look messy	8/16/2021 4:44 PM
341	It does not belong out in front of the home. On windy days garbage blows all over. Our neighborhood already looks like a junk yard. Old cars, campers in front of homes, parked in driveways for months, years. Then those people park in front of the house next door so those home owners have to find somewhere else to park. Plus those folks bars the same ones that never move their cars during snow removal. Sioux Falls needs to do a better job of enforcing the ordinance!!!	8/16/2021 4:38 PM
342	Waste Mangment bought our GOOD garbage company and is awful to work with. Too lazy to pick up recycling, they just put it in the garbage.	8/16/2021 4:00 PM
343	I prefer the option that is safest for all parties involved	8/16/2021 3:49 PM
344	I have no preference on where the containers are picked up or dropped off. Whatever works for the company will work for me.	8/16/2021 3:45 PM
345	In the past, my hauler would go up to the side of my closed garage door and then empty it— leaving it at the end of the driveway where it would sometimes tip over or even end up in the middle of the street. I pay enough money for the garbage to be picked up Right outside the garage door and replace it back there when it is empty.	8/16/2021 3:15 PM
346	Please keep the ordinance in place as is and do NOT allow curbside pickup. It was very difficult when we had to do the curbside placement. Our containers were knocked over many times by the wind and recycling contents went flying all over the neighborhood. Also, it is very difficult for us to bring the containers down to the curb.	8/16/2021 3:12 PM
347	Make the damn garbage haulers follow the law!!!! Why is this even an issue? Who is behind this effort? I'm not getting any younger, and I refuse to drag their containers all over the place. I want the city to ensure that I get the service I AM ALREADY PAYING FOR!	8/16/2021 2:28 PM
348	Many residences in central Sioux Falls share a driveway with their neighbor. When garbage hauler leaves the empty container in the driveway, it blocks the usage of the driveway for both homes.	8/16/2021 2:11 PM
349	I don't want garbage service to refuse to pick up garbage if can is not brought to curb.	8/16/2021 2:07 PM
350	Haulers should retrieve the containers from a visible spot outside the structure and return them to the same place.	8/16/2021 2:06 PM
351	The minimum standard in Sioux Falls should be this: 1) Containers kept discretely near the structure either in front of, beside, or behind at the discretion of the Resident; 2) Resident brings container curbside on collection day; and 3) Hauler returns container to structure immediately after completing collection. If Resident desires Hauler to retrieve container and bring it curbside on collection day, Hauler should be able to charge extra. The wind is a special circumstance in Sioux Falls that requires Hauler, as minimum service, to return containers to	8/16/2021 2:02 PM

Garbage Container Placement and Collection Survey

structure immediately after collection to avoid the wind blowing empty containers down the street.

352	I do not think the containers should have a permanent place on the curbside but only brought there on collection day	8/16/2021 1:31 PM
353	Traffic disruption is a concern I haven't noticed being mentioned in this survey. Trucks making stops at residences on main roads (e.g., Cliff Ave.) block off a lane of traffic during a time (morning) when other drivers are commuting to work.	8/16/2021 12:44 PM
354	I am in an HOA. They decided on the hauler!	8/16/2021 12:43 PM
355	Whatever is decided-homeowner should keep their containers out of site except on collection days.	8/16/2021 12:25 PM
356	The neighborhood looks better when garbage containers aren't sitting by the curb. Some sit there all day long from 6 AM or earlier and remain until the owner comes home after work to retrieve it. It may be evening for some homes. Wind sometimes catches the garbage when it is at the end of the driveway since it isn't as protected there as near the home or business structure.	8/16/2021 12:15 PM
357	I will likely see this discussion related to Citation [REDACTED]. If we cannot get this resolved I will be getting KELO TV involved. Everyone needs to know about the city's behavior. Call me at [REDACTED] if you have any interest in getting this resolved.	8/16/2021 12:06 PM
358	If cans are expected to be returned to the building structure by customers many will be left at end of drives for days. Some neighborhoods will not look as tidy.	8/16/2021 11:40 AM
359	I believe that since the garbage hauling is a service paid for by the homeowner that if the homeowner wants to bring the can to the curb they can. However since it is a paid SERVICE it should not be mandatory. This also creates a increased risk of the can blowing over and garbage blowing around the neighborhoods. Will the garbage haulers come back and pick it up? Will the monthly bill be far cheaper? (since they are only doing half the job I would expect my bill to be half of the current cost.) This is the garbage haulers JOB and has always been so. Of course everyone wants their job to be easier and get paid the same :)	8/16/2021 11:29 AM
360	I did not place my can near the curb in June (after the emergency ordinance ended) and was given a notice by my collector that the can should be play by the curb.	8/16/2021 11:13 AM
361	It was confusing when the emergency order was in place for us to take to curb, it has not been real clear that the order was changed back to the original policy. There needs to be more publicity about this change. I think it is an issue for some elderly to get the containers out to the street and when there is snow it is difficult to find a place to put the garbage containers on the curb.	8/16/2021 10:44 AM
362	When you see the mess that shows from multiple garbage containers lining the streets in other cities I do not want our city to look like that.I believe it is a quality of life issue.Let's keep Sioux Falls that step above.	8/16/2021 10:15 AM
363	I would love for garbage hauling to be a service provided by the city rather than private companies - there are too many garbage trucks on our street, every day - would make much more sense to have one company handling it all.	8/16/2021 9:58 AM
364	There are bigger things in life than worrying about garbage containers on the curb. Let's make life easier for the haulers.	8/16/2021 9:54 AM
365	It would be nice if we could encourage weekly recycling as well.	8/16/2021 9:48 AM
366	I was notified last month by my hauler (Waste Mgmt) that I must put it curbside or they will not pick it up anymore. I do not like this, as I have had to pick up garbage in the street, tipped cans, have helped haul many neighbors cans due to this situation and their poor health issues, plus having it curbside is not pleasant for those walking on the sidewalk in the evening and in the morning as it sits for a longer period of time there as we work long split shifts. Thank you. Please keep the ordinance as it stands.	8/16/2021 9:45 AM
367	My hauler (garbage man) has put stickers on our containers stating that we MUST bring them to the street or they will not take the garbage.	8/16/2021 9:39 AM
368	One of my biggest reasons for the haulers to come to my house to get the garbage is my safety. Especially during the winter months, it is very difficult for me to get the container	8/16/2021 9:37 AM

Garbage Container Placement and Collection Survey

through the snow and place it at the curb.

369	Placing trash bins curbside leaves them vulnerable to others dumping their waste into the bins. This has happened to me several times. This may not seem like a problem, but it is if rubbish is tossed into the recycling bin, or items that aren't supposed to be trash (e-waste, batteries, etc) are dumped into either bin. It wouldn't be as big a problem if my trash hauler didn't pick up my recycling bin at 6 AM.	8/16/2021 9:36 AM
370	Trash bins at curbside are unsightly. Bins at curbside may signal to thieves when homeowners are not at home.	8/16/2021 9:26 AM
371	Only change to allow curb placement on collection day.	8/16/2021 9:25 AM
372	No	8/16/2021 9:23 AM
373	I think having the same hauler in a neighborhood would be an excellent idea. It ridiculous the amount of garbage trucks that go down the street daily. I work from home and my office is by the front of the house so I can hear them and it's just ridiculous how many there are a day. That has to hard on the street and the environment as well as noisy. It does not bother me that the cans are placed curbside but I don't like them sitting out in front of houses on non collection days.	8/16/2021 9:21 AM
374	We have 20 haulers in the city because of competition. That's a good thing. Garbage bins are unsightly and should remain out of sight	8/16/2021 9:20 AM
375	I don't have a lot of space on the side of my house to keep containers, I don't want to build a specific spot, nor do I want a hauler trying to haul containers from the side of my house. Putting containers on the side of my house would increase the risk of the hauler damaging a parked car or tearing up my lawn. Unless there is a purposely built space for containers (think apartments) I feel the occupant should bring containers to the curb and hauler can return the containers to the structure. I believe this is the best of both worlds. The hauler doesn't need to "search" for a bin and you get it back closer to the house to put back in it spot, or in my case back in the garage. Also making a hauler search for a container can cause missed pick ups. I have A-OK and they have always been fantastic. I also have had Waste Mgmt and it was hit and miss. I have been putting my bins curbside for years, we have larger things to worry about like proper traffic control on 41st street vs having to stop at every light.... I don't understand what the big deal is. For this topic the "rule making" up to the HOA's since these are the folks that will probably be most concerned about it anyway.	8/16/2021 9:17 AM
376	Setting garbage cans at the curb on the day of garbage pickup should absolutely be allowed. It saves the garbage hauler time, is better for the environment, and just makes logical sense.	8/16/2021 9:15 AM
377	I think in outlying areas it's better to keep the garbage cans next to the house. We have no tress established so if it's windy there are always garbage cans flipped open and garbage blowing around. I don't enjoy picking up my neighbors garbage that is in my yard. Keeping it next to the house cuts down on that.	8/16/2021 9:12 AM
378	I think it is fine to bring your garbage to the curb on the day of pickup, but the other 6 days the cans should not be seen from the street.	8/16/2021 9:04 AM
379	waste management says it will not pick up if located by our house unless we pay an extra fee. so we place by the road.	8/16/2021 8:56 AM
380	Although it is physically possible for me to move my trashcan to the curb. There are many people in Sioux Falls who would physically find it difficult or dangerous to do so. I.e. the elderly etc.. I also think it would be easy for people to forget to move the trash cans and then if they miss their pick up you have overflowing trash by the next pick up or have to pay for an extra one	8/16/2021 8:55 AM
381	When you put your garbage cans out for the hauler...put at the end of driveway not on the slanted driveway approach where they are apt to roll out into the street. Common sense applies. Why not make it a little easier for our garbage haulers.	8/16/2021 8:54 AM
382	I don't mind putting the container at the curb, but I don't want it as a requirement. If the garbage is placed at the curb, I want the hauler to returned to my house after collection.	8/16/2021 8:51 AM
383	I don't care if I have to bring my cans down to the street or not but I don't think companies should be able to charge different rates based on where they pick up the cans from (street or	8/16/2021 8:42 AM

Garbage Container Placement and Collection Survey

structure). We currently leave ours in front of our garage and the company pulls them down and put them back after.

384	I watch as some carriers with there automated lift and dump work on windy days and see the garbage blowing all over the neighborhood and they do nothing about it.	8/16/2021 8:36 AM
385	We have AOK and they are fabulous!! We have been with them for almost 20 years. They always walk our garbage bins up to our house after dumping, so I feel common courtesy is to walk them to the end of driveway (before sidewalk begins) to help them - especially when they have double pick up days due to holidays.	8/16/2021 8:23 AM
386	I believe it shouldn't matter where the trash bins are located, as long as they are outside and visible, they should be picked up. Who cares if it's by the curb or by the house!	8/16/2021 8:16 AM
387	This battle comes up quite often. If you make it mandatory to have at the curb...the corporate haulers will take over the industry and regulate price. This isn't about convenience. It's about control. My personal opinion, there shouldn't be an ordinance either way. It should be left to the customers discretion.	8/16/2021 8:08 AM
388	I have no problem taking my garbage to curb. If I can help someone I will. Winter months cause ice and I for sure would not anyone falling in my driveway. I would not want to walk up to the business or house when it is 30 below I feel we can help them out by taking to curb.	8/16/2021 8:03 AM
389	Question #11 would be ideal and should be enacted as an ordinance immediately. I came from a much larger mid-western City than SF and that was how they operated.	8/16/2021 7:55 AM
390	lots in our older neighborhood are close together. There is not much space between our driveway and neighbor's driveway and we both have large old trees growing curbside so not much room for garbage and recycle cans for our houses and for some of our neighbors. At least 3 different garbage haulers collect on our block Lots of heavy garbage trucks probably hard on the streets. Prior cities where we lived the garbage was municipal like water and sewer. One wanted trash cans curbside and very ugly as some built picket type containers to keep the garbage cans from blowing away but cans were always visible. For some people or certain times in our lives, getting our garbage to an outside container might be difficult but maybe leave that up to companies if they will service within the residence or garage. My mother got such service at duplex where she lived because of her health conditions. Garbage service let her know when headed her way and she would remote control open her garage door. Her recycles were separated into different colored plastic boxes and her trash container maybe 20 gal metal. They would just lift the plastic garbage bag liner out. She had to use a walker or cane and portable oxygen. Mentally she was able to live alone but she did hire someone to help clean her duplex and change sheets on her bed and do her heavier laundry. Would hope that all garbage services could provide special service in special cases. One young couple that lives in our neighborhood helps us out when we are dealing with recovering from surgeries and other health problems as needed but not everyone has such wonderful healthy young neighbors.	8/16/2021 7:45 AM
391	Let this be between garbage company and home owner. City should have nothing to do with it.	8/16/2021 7:43 AM
392	no	8/16/2021 7:30 AM
393	My neighbors always have their containers half down their driveway. It looks horrible and lazy. All containers should be out of site.	8/16/2021 7:26 AM
394	I have medical issues that make it hard to take trash out and bring up to the house. With my husband often traveling for work especially in winter or when there is poor weather, it is a hazzard for me and very difficult to get my trash cans to and from the curb. Let alone the countless times I've had to chase down bins or trash due to wind	8/16/2021 7:26 AM
395	Placing garbage containers curbside saves time (less needed at each stop) which in turn helps decrease the amount of time the trucks are in the neighborhood. Makes so much more sense to have the containers at the curb.	8/16/2021 6:53 AM
396	No	8/16/2021 6:41 AM
397	I enjoy pulling my garbage out in the driveway for my haulers. It makes me think I'm helping them. However, there are days I forget to bring it out and I appreciate they go up my driveway to retrieve it. Its more important that residents know not to place their heavy garbage cans over rocks, etc. as its harder to move and leads to more injury. This should be made more	8/16/2021 6:39 AM

Garbage Container Placement and Collection Survey

aware than the "hidden from site" that is pushed. This world needs more of the everyone help everyone mentality.

398	I've noticed when we brought the cans to the street there was really no good place to put them. In my driveway it blocked my car and sometimes the garbage wasn't picked up by the time I needed to leave my house. I'm also worried when snow comes how that will affect garbage can placement if it were near the street. Garbage cans will be rolling all over town if it's windy and they need to be brought to the curb. There's always that one person who never puts there cans back up by their house and the can sits by the street for weeks or longer, for example my neighbor.	8/16/2021 6:39 AM
399	Many don't know the emergency order ended, and our hauler never publicized this.	8/16/2021 6:32 AM
400	This issue has everything to do with haulers overworking their employees and maximizing profits, not driver safety or staffing shortages. I used to work for Novak. Most days I could do 40 stops an hour at a casual pace. On Tuesdays I had to do 50 per hour to get my route completed from 6:00 AM to 4:30 PM. I barely had enough time to use the bathroom and eat lunch. I had to be to the landfill by 5:00 PM. Sometimes I still had stops to finish. I did all of this in steel-toed boots. By the end of the day my shins hurt terribly and I was exhausted. The only way I got it all done was by leaving the carts at the end of the driveways. Novak didn't like that, but they wouldn't decrease the number of stops either. I had 450 stops and I did it all for \$100 per day. Something else to keep in mind here is that every 50 residential stops is about one ton of garbage. You can only load about seven tons onto a truck before being illegal (I think). It also takes an hour to run to the landfill, dump, and be back on route. I worked based on a daily rate. Most days I worked 10 hours and got paid the same as someone who worked eight. I say all this to frame up a few different points: 1. Government should make no law determining where a resident needs to leave their garbage cart. That's a matter of choice which is a freedom that should not be controlled by government. 2. A garbage hauler should not be restricted by government as to where they must retrieve and leave carts. That's a matter of customer service where companies can differentiate themselves from their competition. If a hauler demands that a customer leave their cart at the curb and they leave it there too, then they're overloading their employees to maximize profits. If a hauler has drivers completing a reasonable number of stops, but the driver continues to leave carts at the end of driveways, then the employee is either being lazy, trying to get off earlier, or taking more down time. 3. Instead, government SHOULD restrict how many stops a company can require an employee to SAFELY complete in an eight hour work day that includes travel to and from route, to and from the landfill, and a lunch break. This is what will resolve the the issue of drivers being able to have the amount of time necessary to retrieve carts and put them back without wrecking their shins, driving over the legal tonnage, or risking their health and safety by running on ice, snow, etc.	8/16/2021 6:20 AM
401	I'd be interested in seeing what Garbage would be like if it were a public utility. It would cut back on emissions if there were only one truck driving to the neighborhood each week instead of as many trucks as there are companies. I imagine it would also be less expensive as trucks are stopping at each house instead of just some of the houses.	8/16/2021 6:18 AM
402	I feel like there are more important issues facing the residents of Sioux Falls than where the trash cans are placed. This all seems a little petty and someone complaining because they have too much time on their hands. Garbage collection is part of home ownership. I'm happy the trash is getting picked up weekly & not littering the city.	8/16/2021 5:15 AM
403	I can't move recycle down to our curb side. On windy days which is a lot and where our house is, the wind would blow our garbage all over hands down. Recycle comes so early we have it out the night before so I couldn't imagine what it would look like on windy days.	8/16/2021 4:33 AM
404	I get very tired of cleaning up my neighbors garbage because they set it at the curb at night and it falls over and blows into my yard.	8/16/2021 4:14 AM
405	I think people should be able to do what they prefer to do with their trash receptacles. Some older or disabled people may find it harder to move it around as much, while others like to make it easier on the collectors. Why put a law on where the trash can is? However, leaving the can curbside should only be allowed on the day of pickup. I could see it looking sloppy if they were that visible all week.	8/16/2021 4:09 AM
406	I have put my garbage and recycling curbside for 23 years in SF as a courtesy to my hauler. The ordinance, as it's stated, is ridiculous. Homeowners and their garbage haulers should be the ones determining placement. If it is routinely unsightly or a specific residence is routinely	8/16/2021 3:16 AM

Garbage Container Placement and Collection Survey

messy with disposal of garbage/recycling, a neighbor can call in a complaint or work with their neighbor to resolve the issue. The fact that this is even a "thing" was very surprising to us. We'd never heard of this prior to the removal of the temporary exception in April 2021.

407	Keeping the charge reasonable for those on fixed incomes	8/16/2021 2:35 AM
408	Why don't the city take over collection of garbage like other towns and just have one bill	8/16/2021 1:16 AM
409	My husband and I both have arthritis and other painful conditions. Although he lives in a almost constant state of pain, he works. I bring in the cans right now. I have difficulty maneuvering our large recycling bin, but we need the largest bin. My only concern for our refuse man is our garbage gets picked up once a week; in the summer, that's gross. He's had to retrieve garbage full of maggots, but we have no idea how to avoid this as even our garage is hot inside. We certainly aren't going to freeze our garbage to prevent this. I hate it for our hauler.	8/16/2021 12:57 AM
410	The hauler should not raise prices just because they have to walk a few feet more to grab the garbage bin. Street snow removal could also be a problem if bins are placed near the curb.	8/16/2021 12:52 AM
411	This should be an ordinance that trailer home parks need to abide by also. The streets in trailer parks are too narrow to start with and then have some idiot driver hitting them is a mess.	8/16/2021 12:42 AM
412	My garbage collector doesn't require me to put my container by the curb. But if they did, I can see how that would be more practical. Everyone knows what the containers are and why one would be sitting next to the curb. In my opinion, it is petty for the city to waste time on an ordinance to make the city more "visually appealing" by requiring residents to hide their trash cans.	8/16/2021 12:20 AM
413	The bin should be placed at the curb by the resident for pick up (to show they need collection) and they bring it back when empty. Not like the bin is at the curb all week and not as ugly as the permanent cable boxes the city allows!	8/16/2021 12:07 AM
414	I hate seeing garbage at the street most days since our neighborhood had many different haulers and different collection days.	8/15/2021 11:40 PM
415	Setting trash out at the curb the night before pick up is no big deal. I've been doing it for years, mostly to be nice.	8/15/2021 11:38 PM
416	During Coved OK, now definitely from structure	8/15/2021 11:38 PM
417	I would rather NOT have the hauler make the rules. We all know that if the haulers get to make the rules, it will only benefit them and not the consumer and additionally allow them to charge more for different levels of service AND potentially penalize consumers for not following their rules. "We didn't pick up your garbage today because the bins weren't in the specified area." Or "An additional charge was added because our employee had to go get your bin outside the placement area." It turns the collection process into a potential argument because an employee didn't feel like getting out of the truck. Companies can save time and tonnage by skipping peoples bins while still charging same monthly fee, plus maybe additional penalties. Plus, during windy days, having bins out by the curb causes them to blow over and spread garbage throughout the area. If the bins are outside, I want them picked up, period.	8/15/2021 11:29 PM
418	I live on a block where houses are close and driveways and yards are small. My neighbors is small enough their cans are often left in my driveway even though I've called multiple times. The driveway being blocked is unsafe as I live on a busy street where it is almost impossible to safely exit my car, move cans and turn into driveway if I'm away from home during pickup (every day during school year). A huge garbage truck that can stop on the street is a much much safer person to be moving cans. In addition, I've contacted my company about "valet" service as they call it, to return my cans to starting point. The cost was an additional \$12 a month on my \$22 a month bill. And with my tiny driveway, it's the difference of one side of the sidewalk to the other or about 3 ft. The only thing that has improved my companies behavior was the lifting of the covid restriction in April. Even though my service predates covid. Ultimately garbage hauling is a for profit business, if given the freedom, businesses will take the quickest cheapest route. I hugely appreciate that the city of Sioux Falls has stepped in and vocalized this ordinance this year. I truly hope nothing changes on the ordinance. It being enforced makes the city look tidier, driveways safer and keeps us from having to do the ridiculous chore of lifting and setting a full can on several feet of snow on the side of our driveways during winter.	8/15/2021 11:27 PM

Garbage Container Placement and Collection Survey

419	am disabled hard in the winter to move garbage	8/15/2021 11:17 PM
420	Most importantly, we can't have the city requiring one thing and the hauler requiring another. That's how it is now. Thanks for sorting this out.	8/15/2021 11:09 PM
421	Please just get the city and haulers on the same page! Very frustrating on both sides! If we leave our can by our house, RBS leave our cans IN THE MIDDLE of the end of our driveway, making it so we can't even pull in without moving them... this has happened every time we have tried returning to leaving them by the house.	8/15/2021 11:00 PM
422	100% all trash should be picked up on same day in neighborhood. Prefer this more than where the bins are or who's collecting them.	8/15/2021 10:57 PM
423	Hate being woke up at 6am by garbage haulers	8/15/2021 10:46 PM
424	I have lived in several cities across the country and I have always put my bins out by the curb. If it is easier for the haulers, I think it is the right thing to do.	8/15/2021 10:44 PM
425	I didn't know there was an ordinance about not placing garbage cans at the end of the driveway. This is the first town I've experienced that in. It is nice for customers, especially those who may not be able to move the cans themselves.	8/15/2021 10:41 PM
426	1. Not everyone will put their garbage at the curb every week. This can become a health issue. 2. Empty garbage cans left at the curb can become hazards if they are blown into the street. 3. Many people are unable to move heavy items to the curb. 4. Waste management companies are the only ones to benefit if we change the ordinance. They will be able to employ less people. By cutting their payroll, they will be able to increase their profit. They also will be able to charge additional fees to those residents who can't or won't take their garbage to the curb. If the ordinance is changed to curbside pickup other issues could become problematic for the city. Dept of Health complaints and traffic accidents in residential areas could see an increase just with changing one simple ordinance that isn't broken. The current Sioux Falls ordinance is just fine.	8/15/2021 10:26 PM
427	It should be placed by the end of driveway the evening before or morning of pickup. It is courteous to the employees and I don't mind doing my part. I don't care if we have to grab it and out back after either as long as they put it back in the driveway off of the sidewalk a ways. Less time the noisy garbage truck has to be in the neighborhood the better and it saves gas.	8/15/2021 10:18 PM
428	We just moved here from KCMO, where garbage is part of taxes. Everyone's allotted 2 bags were at the end of their driveway on garbage day and the hauler came through once and took everything from every driveway. A recycling truck came through and did the same. So, I already think it looks cleaner here with the bins at the end of the driveway compared to bags! Also, so my evil the SF haulers that I have seen are very inefficient compared to how fast and hard the haulers in KC work to take our trash.	8/15/2021 10:13 PM
429	All of the different companies driving around town on different days has to be terrible for the roads. I understand that on windy nights or days, containers by the street might get dumped.	8/15/2021 10:08 PM
430	Regardless of where the collector picks up the garbage containers, they should always be placed back up by the structure.	8/15/2021 10:07 PM
431	It's quieter when haulers pick up bins near the curb. I work at home and don't like hearing bins rolling up and down driveways all day long.	8/15/2021 10:05 PM
432	Please do not allow curbside pickup. It is very difficult for me to place my containers curbside.	8/15/2021 10:02 PM
433	I am worried about liability of the home owner having haulers on my property, such as ice and snow, clearing the driveway, etc. I do expect that me placing the garbage at the curbside will lower our cost.	8/15/2021 9:56 PM
434	Keep them away from the street. It looks trashy. People are going to leave trash bins out there for days at a time. I don't want to dodge stinky trash containers when I'm out for a run or walking my dogs.	8/15/2021 9:54 PM
435	The hauler WM routinely advises that trash cans are to go to the curb despite my repeated advisement this violates Sioux Falls ordinance. They've even placed stickers on my cans on multiple occasions advising I break the ordinance. Their call center staff also advises breaking the ordinance. Very frustrating, and COVID has cause much confusion.	8/15/2021 9:52 PM
436	I place curbside to make it easier for hauler, to be nice! Save these hard working people steps.	8/15/2021 9:51 PM

Garbage Container Placement and Collection Survey

They should be placed curbside, and after retrieving brought up next to the structure. I wouldn't do this for a discounted rate- simply courteous. I think city should drop the ordinance and allow customers to work directly with their garbage service upon placement.

437	I have an incline driveway. Service pickup is usually early in the morning. If I haven't cleared the driveway of snow and ice in the winter months it presents a considerable health and safety hazard to the haulers. The decision of the pick up and return should be left up to the haulers and the customers.	8/15/2021 9:46 PM
438	When you place them by the curb snow plows come by and hit them. Pickup is quicker and more helpful to drive when by the curb.	8/15/2021 9:44 PM
439	We live close to edge of town so more problems with wind. When containers are by curb we have had way more garbage blowing around the neighborhood	8/15/2021 9:42 PM
440	This survey could be manipulated by those who seem to tirelessly campaign to have curbside trash pick up.	8/15/2021 9:40 PM
441	i am concerned about elderly people that cannot move their garbage cans to the street. Sometimes mine are very heavy and I cannot move them easily.	8/15/2021 9:29 PM
442	There are SOOOO many more important issues to worry about. I take my cans to the curb to make it easy for collecting, my hauler replaces them by my house, which I appreciate.... It's a win-win arrangement and doesn't hurt anyone. That this survey is even necessary is ridiculous...	8/15/2021 9:28 PM
443	If we haul the garbage down they can haul it up. If we don't haul it down, they don't have to haul it up.	8/15/2021 9:26 PM
444	There are more pressing issues that need to be dealt with in Sioux Falls than garbage can placement.	8/15/2021 9:23 PM
445	I think it's a good idea to have the garbage cans next to the curb because it also helps the process go quicker and allows the streets to flow easier traffic wise	8/15/2021 9:21 PM
446	Having them out by the street can create safety issues with visibility for backing in and out of driveways and for people walking across.	8/15/2021 9:15 PM
447	When containers were placed by curbside they sometimes blew over and we had recyclables all over. Neighborhood was a mess.	8/15/2021 9:15 PM
448	Home owner should be able to place by the curb and collector place it by the home save time and is considerate on both parts	8/15/2021 9:01 PM
449	I live on Minnesota Ave. It wouldn't be safe for me to leave my bins on the curb on the collection days, but I keep them in an easily accessible place for both the haulers and myself. On snowy days, there would be no safe way for me to have my trash removed if I had to move them from their current position.	8/15/2021 8:58 PM
450	Easier for garbage hauler to have Cans curbside. Not a big deal to take cans curbside.	8/15/2021 8:58 PM
451	Easier collection curbside, less truck noise, efficient use of time and staff	8/15/2021 8:54 PM
452	Can should be returned close to original location. Novak just leaves on curb, instead of returning to house as others do. Unhappy with several aspects of service so plan to switch.	8/15/2021 8:54 PM
453	I just find it to be more 'kind' to the garbage hauler to retrieve the garbage/recycle cans from the curb, rather than having to maneuver a possibly heavy can from farther away. I don't mind seeing the garbage cans near the curb on the respective collection days. In fact, it's reminded me a few times that I needed to put my garbage out (normally keep cans inside the garage). Sure, if garbage is constantly piled up every day curbside at a particular residence, to the point where it's unsightly, then the city could step in, but I've not seen that problem in my neighborhood.	8/15/2021 8:44 PM
454	I specifically chose the company, before Waste Management bought them out, for the customer service and fact that they would retrieve and put back my garbage can! I travel a lot, it makes it challenging when my current company (Waste Management) does not put it back. (They retrieve but leave it on a busy sidewalk!)	8/15/2021 8:42 PM
455	During COVID-19, I received a letter from my garbage company stating that I need to put my	8/15/2021 8:42 PM

Garbage Container Placement and Collection Survey

containers at the end of the driveway / curbside and I have not received further instruction not to do so. I feel that this is safe not only for the hauler but also the customer. I used to like the hauler to come up to my house and get the container and bring it down and dump it and bring it back up but I don't mind bringing it curbside. I did read an article in the newspaper a month or so ago saying that this has been repealed but other than that I have received no notice to not put my containers at the end of my driveway.

456	I be think it's a crazy rule to be required to have your containers 'hidden' or not in plain view from the street. I have not had this issue, but learned about it recently. Kind of a crazy rule.	8/15/2021 8:38 PM
457	I don't want to have a separate structure for my garbage.	8/15/2021 8:31 PM
458	If the garbage hauler slips on the ice and injures himself, the home owner would be responsible. Placing it at the curb would greatly reduce that liability for the home owner.	8/15/2021 8:27 PM
459	Garbage can on curb side only on day of collection. Returned to structure the same day.	8/15/2021 8:24 PM
460	Pretty sure there will be hundreds for curbside and they will all be garbage haulers. They have one year of it and now don't want to go back to the way it should be. Garbage cans curbside are a safety issue and garbage will be everywhere. It's so windy here. They had curbside at my previous city, it was terrible to see trash and cans lined up and down the streets..	8/15/2021 8:20 PM
461	You can not predict the wind and I have had to move contains off the street and picked up the garbage that has blown out of a full container or one that has been blown over. Some people leave the container out by the street for days.	8/15/2021 8:20 PM
462	I want curbside pickup to, at a minimum, not be prohibited. My home sits on a tiny 2,200 sq foot lot which is very hilly. I have NO option but to place my bins curbside for collection. My front 'yard' consists of terraces, a full flight of concrete stairs leading to my home at the top of the stairs, and a driveway with a 15 degree slope leading to a tuck under garage.... it would be incredibly dangerous for a garbage hauler to climb my concrete stairs while carrying full garbage bins. I place them curbside the morning of collection and bring them in the same day. I do the best I can but I am technically in violation. That should change. Most of our city code assumes everyone lives in a tract home in a subdivision. There are some properties in the core neighborhoods which have no inconspicuous spot to hide garbage bins.	8/15/2021 8:18 PM
463	Just make up your mind what you want us to do and when its decided make sure we all have the information.	8/15/2021 8:15 PM
464	I don't think it should be required or not. If you want to bring it down no worries. If you forget they should still pick it up. I would prefer they for sure put it back so the can does not blow down the street. Most days everyone in my neighborhood everyone puts the trash out at the curb after the ordinance was lifted last year. People have just kept doing it. Not a big deal.	8/15/2021 8:13 PM
465	I am sure the garbage haulers had the service of getting the containers from buildings or houses built into their cost structure before covid since it was a SF ordinance and since prices didn't go down during covid when customers brought containers to the curb this should of allowed the individual truck drivers/haulers to get more accomplished for the day. Why should the the garbage companies come out ahead in operational efficiency and the business' and home owners get less service for the same money, many of us worked less during covid and made less income. One should not be able to profit from this unless the company is providing a common good or helping the medical concerns to stop the medical problem when the garbage haulers were allowed to break SF law. By rights everything should go back to what it was like before the covid out break. And really every company is having trouble finding employees right now, just ask all the construction companies and retailers in SF.	8/15/2021 8:10 PM
466	Environmental impact important, and impact on garbage haulers/workforce. COVID demonstrated citizens could push garbage bins to curb and back with no lives lost. Having bins out at curb vs outside of garage is inconsequential If I want to keep my rates stable I can take them to curb - and less wear and tear on roads, less pollution, reduced workforce hours and human capital for extra steps.	8/15/2021 8:08 PM
467	It makes sense the trash set out with trash in can and is heavy to resist the wind. Then return the can to a spot to where it won't blow around when empty.	8/15/2021 8:03 PM
468	After the Covid ordinance to put our cans at the end of the driveway expired Waste Management left a note on the can telling us to put it at the end of the driveway. I printed the ordinance saying we're not supposed to do that and placed it on the can the following week.	8/15/2021 8:02 PM

Garbage Container Placement and Collection Survey

469	It is safer for the hauler to have containers at the curb and more time efficient that the trucks are on the route and uses less fuel so less pollution.	8/15/2021 7:57 PM
470	The curbside containers is not efficient for haulers and could allow use of a robotic arm. Both of these keep costs lower.	8/15/2021 7:49 PM
471	I think there should not be a city ordinance which requires or restricts how garbage containers are placed. It should be whatever works best for the hauler and homeowner.	8/15/2021 7:47 PM
472	I would like the city ordinance to read that trash should be brought down to the curb by the customer on the neighborhood trash day and must be taken up from the curb by the end of the day. Trash cans should not be left sitting curbside for multiple days or permanently.	8/15/2021 7:45 PM
473	As someone who had a single driveway I don't mind bringing my containers down to the curb but they are frequently in the way when we come home so we have to "park" in a turning lane or on the street around the corner to move our containers to be able to get in our driveway	8/15/2021 7:42 PM
474	A OK is awesome they would probably grab our trash up at house anyway- our neighbors I think its good if they grab for the older people but we can bring it out to the curb if it saves 5 mins for them- otherwise how do they know if it needs to even be grabbed?	8/15/2021 7:42 PM
475	I had waste management They wanted to charge me a fee to replace and collect my can I swiftly remove them just because they found it was more profitable and efficient if I took the can. They are big money that will persuade how the can issue will happen and they'll just charge more and not call it a fee to collect and restore the can They seen the money was there. I found a local guy He's \$25 cheaper and I'd rather support local businesses. I thought waste management would be the right choice because they're so big they would be able to cut costs like Walmart and Sam's but they don't and I hope they don't influence your decision because there's a lot of old people that can't afford garbage service. The little guys are busy because the big guys waste management keep pissing off customers We need more local vendors to offset the monopoly. [REDACTED]. I'm willing to sign this because I believe It shouldn't be just pay the bill and move on because this is how we're going to do business. Don't let them control you just because of the bottom line. Thank you for your survey.	8/15/2021 7:34 PM
476	If someone is unable to bring their garbage can to and from the curb, they shouldn't be charged extra. I think it saves time for the hauler and saves gas and emissions from their trucks if the garbage can is curbside. Aren't we supposed to slow down global warming? A cpl. Times I have forgotten garbage day and the hauler came up and grabbed my garbage can, which I appreciated. I don't want stinking garbage sitting there 2 weeks. I would think most of us can bring our containers to the curb. It is dangerous for them in snow/ice ; rainy conditions to have to go up and down peoples ' driveways. Or if vehicles are in the way.	8/15/2021 7:26 PM
477	Covid was used as the excuse for curb placement. I NEVER interact with my trash provider so their SAFETY as the excuse was and is a lie. That said, I would not be opposed to placing my trash at the curb in Winter when it really could be a SAFETY issue.	8/15/2021 7:25 PM
478	Be clear with the decision	8/15/2021 7:24 PM
479	I think it should be up to the home owner if they want to pout the trash at the end of the drive way or leave it by the garage	8/15/2021 7:24 PM
480	Yes. Garbage collection statutes were relaxed for COVID-19, but the prices of those companies did not reflect the difference. I expect the same level of service with the same price as prior to COVID-19, or a rebate for reduced services rendered.	8/15/2021 7:23 PM
481	No	8/15/2021 7:14 PM
482	Having multiple haulers on my street all with different collection days is annoying, loud and hard on our streets.	8/15/2021 7:12 PM
483	I believe in collection day it shouldn't matter where the container goes by home or street. When it's not on your day keep the bin put away. Why make this such a big deal.	8/15/2021 7:12 PM
484	Some never remove their garbage from the curb even on days when there is no collection. This speaks badly of the values of the community. One should have pride in one's home and pride in one's community. That is difficult when the first thing one encounters when entering your property or your neighborhood is garbage cans.	8/15/2021 7:12 PM

Garbage Container Placement and Collection Survey

485	Not every one has an inconspicuous place to put their garbage containers. Remember not everybody is that fortunate.	8/15/2021 7:11 PM
486	Number one reason for this ordinance should be to keep the wind from blowing trash around the neighborhood.	8/15/2021 7:08 PM
487	contents of garbage cans placed near their dwelling remain private property until the trash collectors cart the material away.	8/15/2021 7:08 PM
488	Our hauler has asked us to bring our garbage curbside.	8/15/2021 7:04 PM
489	I will do whatever is decided. I always thought I was helping my kind garbage collectors by putting by the curb but will do whatever is best and required	8/15/2021 7:04 PM
490	Curb side pick up is dangerous in the winter and makes a neighborhood look trashy. Excuse the pun.	8/15/2021 6:56 PM
491	We already have too many trucks collecting waste in the neighborhood daily. More time pulling and replacing cans by the drivers will only add time for the trucks being in the neighborhood. This will drive up cost and create more environmental impact from the trucks running longer while the drivers move cans.	8/15/2021 6:54 PM
492	As an 80-year-old who has a hard time walking it is dangerous especially in the winter to haul it out to the street and back. I was asked a couple of haulers ago to take it curbside so have been doing it for some time. I have lived in this home since 1972.	8/15/2021 6:54 PM
493	Public needs to be educated about securing garbage on a windy day.	8/15/2021 6:54 PM
494	WIND makes a mess especially with recycling. Please consider wind and dumped containers when making ordinance.	8/15/2021 6:52 PM
495	Help the haulers out as much as possible to keep our rates low. Have never lived in a community that maid the hauler retrieve and return garbage can.	8/15/2021 6:48 PM
496	If all service was on same day and garbage containers moved back to residence either by resident or hauler containers would not be sitting out around neighborhood all week.	8/15/2021 6:48 PM
497	Unfortunately our area of the country does get windy. In the last year, with curbside being helpful I have seen a number of cans blown over and garbage blown around the neighborhood.	8/15/2021 6:45 PM
498	Containers may be placed at the curb if desired by the homeowner; however, at my property, there is no way for me to place containers at the curb in front of the house due to terraces in the front yard. My current hauler was chosen because they were willing to pick up waste from the back alley. I don't want to see a situation where I am required to haul three waste bins across two flights of stairs for weekly pickup, especially in the winter.	8/15/2021 6:29 PM
499	We been putting the containers along our driveway but not by the curb since we lived in Sioux Falls. This worked well. Why change something that works. Plus the containers by curbside look unsightly, could be tipped over by wind or mischievous individuals and cause more troubles to keep yards and streets clean. The cost shouldn't be increased either, it only takes couple more steps to retrieve and return containers.	8/15/2021 6:29 PM
500	recycling should be prioritized and picked up every week.	8/15/2021 6:26 PM
501	I live in a home with a detached garage and have a longer driveway. I am also disabled so taking my garbage cans to the curb is very difficult for me. I please ask that if the ordinance changes, which I pray does not, that there will be an exception for the elderly and disabled.	8/15/2021 6:17 PM
502	Make it one way and keep it that way. I have lived here for 60 years and no idea there was a law where your garbage cans should be.	8/15/2021 6:13 PM
503	Don't mind bringing containers out away from home down driveway alittle. Don't like putting almost into street as they could tip in storm and some homeowners let them sit there for days even after it's picked up. Looks bad	8/15/2021 6:12 PM
504	I do not like cans placed on the curb because they tend to blow over and make a mess and litter.	8/15/2021 6:11 PM
505	While the containers were being placed curbside containers in the area often tipped. I never had to pick up other people's trash before but it has been very frequent with containers placed curbside. Talk about gross and a huge health safety hazard. I am not a garbage hauler but I	8/15/2021 6:02 PM

Garbage Container Placement and Collection Survey

have felt like one at times with the wind blowing trash between houses and even into back yards.

506	There is so much liability in haulers going up and down a driveway during bad weather that I don't want to see someone get hurt for one because of the weather and two I don't want the company to charge more because their haulers get hurt. It's much faster to get haulers off narrow streets if the bins are by the curb. Do you see USPS go up to every house in town to deliver mail? No you don't because it's a liability. There are too many negative variables for a hauler to approach a persons property versus taking something from the curb.	8/15/2021 6:01 PM
507	As for the haulers returning the cans I think they should leave them wherever the customer left them (curbside or by the home).	8/15/2021 5:45 PM
508	not at this time	8/15/2021 5:45 PM
509	Worked at John Morrell. When customers came to Sioux Falls, they mentioned how CLEAN Sioux Falls was (and still is). Customers flew in to Sioux Falls, stayed and ate downtown. We need to keep it that way, especially as the city is growing and new businesses and people are coming. I have seen containers at the curb overflowing with garbage. We NEED to keep our city CLEAN.	8/15/2021 5:41 PM
510	Neighbors that bring their garbage to the street blows all over everybody else's yard.	8/15/2021 5:36 PM
511	if its placed on the curb the wind will blow it over	8/15/2021 5:33 PM
512	Really the mayor has nothing else to do	8/15/2021 5:29 PM
513	Mine sits by the side of the house. They get it there and return it. I am 74 and on 24 hour oxygen after Covid 19. The winter is slippery and dangerous for us old folks.	8/15/2021 5:25 PM
514	We are often out of town on collection day. Thus, having haulers pick up and return to home is very helpful.	8/15/2021 5:22 PM
515	I don't mind the garbage cans being placed by the curb on collection day, but I do not like to see them outside other days of the week. The cans should be stored in an inconspicuous location (not visible from the street) otherwise.	8/15/2021 5:14 PM
516	Thankful for having garbage service	8/15/2021 5:12 PM
517	It is so crazy to me that Sioux Falls has multiple Garbage companies working in the city on any given day of the week. My trash day is Wednesday and the company I work with comes down my street along with 2-3 other companies and other days of the week trash trucks are driving around too. Trash service should be municipal and cheaper and we should also have leaf service. In the fall you move your leaves to the curb and the city has a truck that comes and sucks up the leaves. It's super easy and makes everyone's life simpler.	8/15/2021 5:12 PM
518	Our garbage hauler left a note on our garbage can stating that the bin should be placed at the end of the driveway. That contradicts the city ordinance. We aren't sure which rule we should follow.	8/15/2021 5:09 PM
519	I am a little gal with 2 teenage boys whom lost their dad. I always had Craig's for over 20 years and was actually able to get more trash in my container than the ones provided. I would just pull them yards to where they needed to be. No lifting. Now I have to try to lift over my head into the provided bins and can only get one bag in the container. I am a little gal. But what about the elderly come on we all pay enough for our garbage haulers it is a service not us to service them	8/15/2021 5:07 PM
520	Why can't we have one primary garbage hauler to reduce the number of trucks on the road - reduce noise and emissions, increase productivity	8/15/2021 5:04 PM
521	All trash and recyclables should be in a covered container. There are apartment buildings in our area that just let the stuff fly all over and we are very tired of picking up other peoples trash.	8/15/2021 5:04 PM
522	There are times when I am out of state on collection day. It would be nice if I didn't need to worry whether my garbage was being taken care of if they just came up to the house to get it. I didn't realize the curbside pickup was over with as I didn't receive a notice like I did when Covid hit. It was a hassle doing curbside with being gone a lot.	8/15/2021 4:58 PM
523	Too many trash cans fall over, then open and garbage is all over the place. I don't like the look of trash cans out there every day of the week.	8/15/2021 4:56 PM

Garbage Container Placement and Collection Survey

524	I really don't like when the cans block the sidewalk or are practically in the street.	8/15/2021 4:55 PM
525	It's one day a week, bring your cans to the curb and keep trash costs down.	8/15/2021 4:54 PM
526	There was never an issue before covid having our holler go back and forth with the cans. For there's not much of a chance of the wind knocking on over and blowing garbage all over. Since it has been made mandatory to put them by the curb our neighborhoods are filling up with garbage.	8/15/2021 4:51 PM
527	We had a recent scheduled garbage day pick up on the same day as we had 70mile an hour winds. The Garbage collector did not pick up our garbage and recyclable containers since they were not placed curbside but they were not curbside due to high winds also there had been a holiday Monday which altered the pick up schedules that week. Since our garbage and recyclables were full I had to call for an extra pick up which companies want to charge extra fees for however I pushed back and there was no extra fee charged. We might be switching service to one our neighbors are using which is locally owned and more competitive pricing. I almost switched previously but there had been news about some having trouble with garbage pick up that was causing overflow and unsightly and unsanitary circumstances so I put it off.	8/15/2021 4:51 PM
528	Wind has been a huge problem. There have been multiple occasions where the wind has blown over the neighbors trash into my yard and the entire neighborhood.	8/15/2021 4:50 PM
529	Explain to me why is it so important for you where they are placed. This should not factor a price increase. My concern is Sioux Falls is getting crazy. Setting out by the curb vandalism will occur.	8/15/2021 4:44 PM
530	Having empty containers on the curb on high wind days would be incredibly problematic. They would certainly end up in the street.	8/15/2021 4:41 PM
531	Hard to move containers to the curb in the Winter. I am elderly and have bad leg.	8/15/2021 4:41 PM
532	It is a liability issue for haulers to walk on my property, especially during the winter. I really don't want haulers on my property.	8/15/2021 4:41 PM
533	In front of garage is fine for storage. 90 degree temps make garage and house stink when stored inside.	8/15/2021 4:40 PM
534	Keeping the container near my structure makes me liable if a garbage worker slips on my driveway and gets hurt. Also make hauling grass clippings cheaper.	8/15/2021 4:40 PM
535	For the insane prices we pay, they should clean the cans out every few months too! It's insane.	8/15/2021 4:36 PM
536	I don't want garbage being blown out of containers. As long as there is an assessable and easy path to the cans, they shouldn't be placed a long the curb before emptying. This is just for keeping litter and trash out of our city and parks.	8/15/2021 4:29 PM
537	The most efficient & safest for the haulers is to pick up from the curb but if others want their garbage picked up from close to their structure they should be able to pay more for that service option.	8/15/2021 4:28 PM
538	sometimes when the hauler arrives at my house the dog is out on a leash and barks like mad at the hauler, therefore, at my house it is best I take the containers to the curbs and I will bring them back to the back yard for the week.	8/15/2021 4:23 PM
539	We have more pressing problems like crime, pot holes, rough streets, excess noise, speeding cars, garbage in the streets, trees blocking stop signs, etc, to worry about little things like garbage cans placement and collection.	8/15/2021 4:22 PM
540	Our garbage collector will not empty containers if they are not on a hard surface (concrete) due to work injuries. If we leave our containers on the side of the house, it will not be taken, since it is in the grass.	8/15/2021 4:21 PM
541	What studies have been conducted on considering the impact of longer valid shorter average stops for haulers and the change in transmissions? Should be a fairly easy calculation. If choices for where customers place bins in collection day will be stripped, perhaps require hauling companies to provide notices to customers who violate the requirements, followed by not collecting trash on subsequent violations.	8/15/2021 4:19 PM
542	I think your questionnaire is biased. I felt there should have been another choice. if u want to	8/15/2021 4:15 PM

Garbage Container Placement and Collection Survey

bring your cans to curbside u can. If u don't want to or can't then u don't have to.

543	I am definitely opposed to containers curbside. With one major hauler in town, since we started curbside during the pandemic, I found my containers in my grass, in the middle of the driveway so I couldn't pull in. Always very unkempt looking, scattered. I changed services and had been with them 29 years. I tried to talk to them about it several times and it never changed. Prior to curbside pickup I had never had any issues with this company.	8/15/2021 4:13 PM
544	Residents should be free to place garbage bins by the curb on garbage day, inconspicuous on other days. Some residents may be unable to do this, but those who can should.	8/15/2021 4:12 PM
545	Too much trash flying around when trash is put at the curb	8/15/2021 4:11 PM
546	I feel there should be once consistent approach across all carriers. I would further recommend exploring having one hauler for a neighborhood. As I have been working from home a lot due to covid, before 9 am I can have 8 different carriers drive by my house. now take that times 2 or 3 for recycling and grass clippings, that is a lot of wear and tear on our roads. Could be a way to cut costs also for a carrier.	8/15/2021 4:09 PM
547	I am partially handicapped and it's very important to me to have the garbage can brought back up to the house otherwise I have to call one of the neighbors come and bring it up for me	8/15/2021 4:06 PM
548	I think the major issue is garbage containers in view every day. Mine are in my garage.	8/15/2021 4:06 PM
549	Why does the city care? There are much bigger issues to concern yourself with.	8/15/2021 4:03 PM
550	I believe we should give them a break. They work just as hard, if not more due to weather conditions. If me walking the 10-15ft to put out my garbage helps them in any way getting done early or less foot work, great!	8/15/2021 4:02 PM
551	My garbage collector put a sticker on cans requiring cans be curbside.	8/15/2021 4:00 PM
552	Sioux Falls needs to start recognizing noise pollution as a problem. The number of minutes a hauler is in the neighborhood impacts noise pollution. Perhaps haulers should get contracts by neighborhood, allowing for competition yet also keeping carbon emissions by haulers to a minimum since they won't be doubling up on neighborhoods.	8/15/2021 4:00 PM
553	The older you get, the harder it is to haul garbage cans to and from the curb, especially in winter.	8/15/2021 3:59 PM
554	I'd prefer to place the garbage bins in front of garage/or where they have them as easier for older homeowners. The way it was before Covid change. If garbage hauler charges more then homeowners have choice to change garbage haulers.	8/15/2021 3:55 PM
555	I think the wind knocking over full containers on a windy day would be the biggest issue I would have with curbside. So leaving them curbside after service would not present a free flying garbage risk, although the can itself could tip over and possibly create a hazard in the street or on the sidewalk. But I'd be most open to picking up an empty can at the street.	8/15/2021 3:53 PM
556	The main issue I have is they should return to the house after pick up so on a windy day the garbage can isn't blowing in the stret	8/15/2021 3:51 PM
557	Each company should be able to establish their own policy. Garbage containers have no impact on my daily life. Has been made into a bigger issue than warranted	8/15/2021 3:46 PM
558	Fees have gone up during the pandemic anyway, so if the haulers use that as an excise, they are being dishonest.	8/15/2021 3:46 PM
559	I understand how the hauler would prefer curbside but is very inconvenient and possible falling hazard and weight restriction issue for us older clients. And our garbage bill keeps going up and up and up.	8/15/2021 3:44 PM
560	It is safer to keep the cans by houses. The wind and rain has blown cans over in my neighborhood when cans are put by curb. Also I live on a slope so cans brought to curb are not on level ground. There should be no change in cost as the garbage companies had always had to come to the houses to get the cans prior to 1 1/2 years ago.	8/15/2021 3:40 PM
561	Instead of placing containers by curb, place them on private property side of sidewalk - approximately ten feet towards structure from curb.	8/15/2021 3:32 PM
562	Question 11 is very important to me as it would keep truck noise limited to only one day	8/15/2021 3:29 PM

Garbage Container Placement and Collection Survey

instead of 4 days in my neighborhood. That would be great at creating a more peaceful living environment.

563	I use a local hauler, not someone from out of state.	8/15/2021 3:26 PM
564	this seems like such a gross oversight by the city now that covid protocols are over and life NEEDS to resume to normal. There are more important things to focus on! Like our area homelessness, kids going hungry, abuse. Focus on real issues rather than these fake superficial items.	8/15/2021 3:25 PM
565	More recycling options, encourage more recycling and less trash.	8/15/2021 3:23 PM
566	Older person with health issues. Difficult to take trash down to the curb and bring it back up. I won't do it in the winter....to easy to fall. I am so grateful that I can set them right outside my garage door. Thank you!	8/15/2021 3:19 PM
567	If I forget to put my containers by the curb, my garbage doesn't get collected and I always forget if it's the week for recycling to be picked up too. I've also had my container blown over in the street when it was left at curbside	8/15/2021 3:15 PM
568	We winter in a city in Texas with cans at the curb and it can be a real problem in a wind or storm. It's always an eyesore	8/15/2021 3:13 PM
569	I think elderly or people with orthopedic disabilities should not be required to take their garbage to the curb.	8/15/2021 3:07 PM
570	Lived in Harrisburg and we had to bring container to curb. If we didn't, hauler would not collect. Super annoying when forgotten and then trash would overflow. Looked bad and more likely to blow out/away. Especially hard if vacationing/not home on pick up day; for recycling that meant a month between pick-ups.	8/15/2021 3:06 PM
571	Garbage bins next to a structure will help prevent loose garbage all over the neighborhood. Isn't that the point?	8/15/2021 3:05 PM
572	Having an ordinance saying people can't bring their garbage to the curb is such a frivolous ordinance. Let the collectors determine whether they want curbside or not. Doesn't the city have more important issues to deal with?!	8/15/2021 3:04 PM
573	I have waste Management they require me to put containers on the curb.	8/15/2021 3:03 PM
574	Wind (especially in SD) is important. Trash and containers can be all over the neighborhood on windy days when they are left curbside.	8/15/2021 2:58 PM
575	I normally place my bin at the end of the driveway (for hauler convenience). However, my hauler will retrieve my bin if left by my house. I don't want my trash be be left if it's not brought down the driveway and appreciate my hauler taking the bin in both locations (end of drive or by house).	8/15/2021 2:52 PM
576	If it's decided to have haulers pick up from the curb, please have them print a bold mag on their containers that the residents should place containers OUT OF SIGHT after collection. Many people in our area just leave their containers in the front yard where they're easy to find, but look terrible. Too lazy to put them away. City needs to cite residents for this, like the current ordinance requires! People don't take it seriously.	8/15/2021 2:50 PM
577	I am 93 and it can be very hard to get it to curb in the winter. And the containers do not sit well on the grass and the snow so you have garbage and paper blowing around the neighborhood	8/15/2021 2:50 PM
578	Our garbage cans should be allowed on our own property where ever we want them placed.	8/15/2021 2:48 PM
579	Health hazard especially with covid. Smelly garbage with people leaving containers out for days. Liter..often containers blow over and contribute to overall ugliness of street.	8/15/2021 2:48 PM
580	Safety/weather conditions should allow collection variations as the situation presents with specific time limits.	8/15/2021 2:47 PM
581	I think it is a kind gesture for home owners to take their garage to the curb. Have a wonderful day!	8/15/2021 2:42 PM
582	You shouldn't be able to see garbage cans from the street except on collection day	8/15/2021 2:38 PM
583	If we had robotic arms from trucks collecting trash, I would favor curbside. With high wind in	8/15/2021 2:36 PM

Garbage Container Placement and Collection Survey

my neighborhood, I prefer cans close to our home. When blizzard conditions occur, I can understand allowing haulers to pick up closer to the street.

584	One thing that is very important that is not mentioned in the survey is the impact of having a heavy garbage truck drive onto a person's driveway. We have always placed our garbage at the end of the driveway so that our hauler could not drive on our driveway. We do not want heavy trucks and/or oil stains on our driveway.	8/15/2021 2:36 PM
585	I have no problem taking my garbage cans to the street and returning to my garage till the next collection day. Helps the haulers get their jobs done quicker especially with the dramatic changes in weather we have here. Protects them from falling, over heating, etc	8/15/2021 2:34 PM
586	During Covid, on a particularly windy day, there was large trash strewn across 26th off of 229 because the home owners had to place the garbage at the curb. It was unsightly and had the potential to cause accidents. Safety hazard.	8/15/2021 2:31 PM
587	Question #10 should have the option of returning the container to the house not a question of price.	8/15/2021 2:27 PM
588	The collection containers should not be visible from the street on non-collection days	8/15/2021 2:25 PM
589	There are some very strong winds that we have and I'm tired of seeing my neighbors' garbage being blown down the street.	8/15/2021 2:23 PM
590	Leaving for work early & returning late leaves an empty garbage container to roll or be moved by SD winds. I don't like to garbage as a sign that we or neighbors are not at home. Charging more for haulers to do what they did previously will have many of my elder neighbors vote to save money vs personal safety especially in winter conditions.	8/15/2021 2:22 PM
591	I don't want garbage bins to be visible all week. Only on pick up day.	8/15/2021 2:19 PM
592	In Huron they have trucks with arms. The arms pick up the can and dump it then it's set back down on the curb. All the cans are the SAME! It's a much more efficient system than what Sioux Falls has. The driver never gets out of the truck or comes in contact with the can unless they drop the can in the truck. A lot safer for the drivers in my opinion.	8/15/2021 2:18 PM
593	In the winter it would be difficult to place cans by the curb, since the curb is full of snow. If I had to place them in my driveway I would not be able to get in and out of the driveway. Having to park my car get out move the bins just to pull in the car would be a pain and for some older people dangerous. On windy days we would have garbage everywhere.	8/15/2021 2:18 PM
594	You should be able to store garbage cans in front of your garage, as long as all garbage is contained within the bins. Summer temps and garbage cans in the garage are not a good combination.	8/15/2021 2:08 PM
595	As a compromise I would be with placing it at the curb but once empty, and lighter in weight, they return it nearest the structure so the wind won't blow it around.	8/15/2021 2:07 PM
596	It makes sense to have the garbage containers placed at the curb. However the haulers should put the empty containers by as close to the house as possible because when empty the containers could easily blow into the street due to less weight.	8/15/2021 2:06 PM
597	If containers are curbside, the hauler should take them back up by the house as once they are empty, the wind blows the garbage cans away.	8/15/2021 2:05 PM
598	Changing the protocol now will only add confusion to the neighborhood. Leave it the way it was during covid I don't appreciate the many many garbage trucks from many different haulers up & down our street. Some regulation on the permitting for different neighborhoods could reduce the excess traffic on the residential streets, keeping in mind each household is usually visited by 3 separate trucks (garbage, recycling, & grass collection. SF could do a better job of reducing traffic, reducing noise, & reducing street damage.	8/15/2021 2:05 PM
599	It is critical that the same container be returned to the customer. We have had to wash out two different containers because we did not get our own back.	8/15/2021 2:01 PM
600	The city should worry about real problems like the homeless issue and covid. The city worries about dumb crap	8/15/2021 1:57 PM
601	There shouldn't be an ordinance of where to place your garbage cans. As long as your area is clean and orderly it should be up to the garbage hauler on what is best and safe for them. This	8/15/2021 1:56 PM

Garbage Container Placement and Collection Survey

ordinance is absolutely ridiculous.

602	Not everyone has space in there garage to hide garbage cans when it's not collection day. It should not be required. There are more important things the city should be focusing on other than where I place my garbage cans.	8/15/2021 1:54 PM
603	Elderly can not haul those containers around...	8/15/2021 1:51 PM
604	I live where we have a HOA. I am sure we would be concerned about the price. If all the garbage trucks the had the arms (Like waste management) everyone would be sitting the garbage at the curb. My husband says they it should be by the house.	8/15/2021 1:49 PM
605	Enforce containers not placed next to structure on non-garbage days through citizen reporting.	8/15/2021 1:48 PM
606	I was told by our waste provider to place it curbside, I didn't know not to. They should be responsible for replacing and following the ordinance.	8/15/2021 1:47 PM
607	Senior citizens could get injured in inclement weather pulling a huge garbage can to the street & back. Also too many cans get blown over & land on sidewalk.	8/15/2021 1:47 PM
608	We prefer to keep our garbage next to our home and not on the curb to help prevent the containers from blowing over during windy days and spreading garbage throughout the neighborhood.	8/15/2021 1:43 PM
609	People are leaving their containers on the driveway in front of garage or parking them beside garage in plain view of the street. Makes the neighborhood look like a garbage dump. These contains blow over in the wind sometimes. I want the service returned to the way it was prior to Covid for the sake of an orderly and neat neighborhood.	8/15/2021 1:42 PM
610	Everyone should keep their neighborhood neat & orderly. No garbage falling out of their containers.	8/15/2021 1:42 PM
611	You are over thinking this. There shouldn't be an issue with pulling a garbage can to the end of the driveway.	8/15/2021 1:37 PM
612	From experience city run garbage is better. If one part of the city gets a spring cleanup day we all should. A one free pass to the city dump is not equal to a free curbside pickup (let the residents vote on this).	8/15/2021 1:37 PM
613	Lately my hUler on recycling puts my container in the middle of my driveway! I complained. My hauler with Covid asked us to place trash curbside. Not easy for me to retrieve	8/15/2021 1:36 PM
614	Where I live the driveways are narrow, there no room to sit 1 and on recycle days 2 cans curbside. I know it's easier for the collectors curbside, I've got arthritis so it's hard for me too. They tacked on a gas surcharge several years ago, but when gas prices came back down they never dropped that, so use that money don't increase rates!	8/15/2021 1:35 PM
615	I think garages containers should be able to be out on the curb but also i think it should be up to each individual. Someone may not be able to bring their garbage to the curb.	8/15/2021 1:29 PM
616	It's a part of living in a consuming society that we have trash. Bringing the trash can out to the curb on collection day is beneficial for the haulers in terms of time and money. Keeping the cost low should be a main priority to ensure everyone in the community can afford the services. Let's be practical about our services.	8/15/2021 1:25 PM
617	The only reason I think customers should not be required to bring trash out from their structure is if there is some social or environmental (less wind by the house) reason to do so.	8/15/2021 1:24 PM
618	It seems like a lot of extra time haulers have to take at each house to get the containers when each house could just set them out on collection day. In Rapid City, if you didn't set it out they would not pick it up.	8/15/2021 1:19 PM
619	it doesn't matter. I think that if people want to be helpful and bring their garbage can to the curb, fine. But elderly people might not be able to do that or some people might forget. In respect for time, allowing people do bring it to the curb on trash day should be fine and if you can't? It is alright also.	8/15/2021 1:18 PM
620	Definitely don't want to see trash or containers on the curb!	8/15/2021 1:13 PM
621	Containers on the curb get blown over almost every week. I would say I'm ok with moving them back by myself but I've seen too many times in my neighborhood where they are literally	8/15/2021 1:10 PM

Garbage Container Placement and Collection Survey

leaving them on the street and they are blowing around in the street. It's just a hazard and it trashes up the neighborhood.

622	I am 73 and physically unable to haul the cans back and forth, especially when full, so I leave them by the curb all the time. My street has no curbs or sidewalks.	8/15/2021 1:09 PM
623	My hauler retrieves my trash at 6 am, so I put it out the night before. Also, I have a very narrow driveway, and I dont want my hauler to damage my car when moving from my house to the truck and back again.	8/15/2021 1:07 PM
624	Is there an ordinance on where containers should be stored during the week. Our neighborhood has a lot of them placed in front of their garage all the time.	8/15/2021 1:06 PM
625	If garbage containers are put curbside & there are multiple carriers being used on that street/neighborhood then we would be seeing those containers by the curb side every day of the week.	8/15/2021 1:04 PM
626	Residents should put containers curbside for pickup on the day of pickup. Hauler should return cans to the home so they don't blow around on windy days. Doesn't seem to be any enforcement of the 'rules' anyway.	8/15/2021 12:59 PM
627	Placing containers at the end of the driveway is of some concern bc of the wind we deal with.	8/15/2021 12:58 PM
628	If haulers spill garbage during collection they need to pick it up not leave it there all day for the customer to pick it up later	8/15/2021 12:57 PM
629	We have a long elevated driveway, we are in our 70s and appreciate that Novak picks up our containers by our house. Also, as you drive through the neighborhood, it does not look good with all the garb ages out on the street!	8/15/2021 12:54 PM
630	I wish garbage and recycling cans would be inside a garage until pickup time, I don't like the looks of them sitting outside.	8/15/2021 12:54 PM
631	It makes the area look like a dump	8/15/2021 12:53 PM
632	I have visited a number of large cities Cleveland OH, Waco TX etc that have the requirement that customers bring thier container to the curb for haulers. The neighborhoods look like shit because all their shit is on the curb, their "extra" piled uncontained up against the containers that may or may not be still standing. The wind knocks containers over and trash blower down the neighborhood (no one picks it up, everyone thinks it is someone else's job). The containers blow into cars on the street. They cans are more accessible for transients to go thru. If there is a storm that delays pick up day, the garage sits and sits on the curb, looking like a dump and scattering. Our city stands out as different, cleaner! Go to other big cities, what stands out to me is the trash everywhere! Kingman AZ, I was appalled! Let do all we can to keep our city clean.	8/15/2021 12:49 PM
633	We don't need ordinances that are never enforced anyway. This just one. Homeowners and haulers don't need government involvement unless a REAL dispute arises. City government should find ways to reduce regulations.	8/15/2021 12:47 PM
634	I like the option to help speed the process up and keep the trucks moving as to not block traffic on the street. For those that maybe are handicap or may not remember to put trash out I like the option for the haulers to go grab the trash by the building. Not sure it needs to be so black and white where the trash is on trash day. But on off trash days i would prefer it hidden away.	8/15/2021 12:46 PM
635	Containers need to be out of site on non pickup days. Get them away from front the front of houses. Hate seeing garbage containers sitting in front of garages. Garbage containers sitting out take away the beauty of a development.	8/15/2021 12:44 PM
636	Could meet halfway with hauler. Bring container down to c l r b but hauler brings it up to structure. No additional charge as effort is shared. Thank you.	8/15/2021 12:42 PM
637	I think it should be up to the home owner.	8/15/2021 12:40 PM
638	I have an HOA that selected the hauler. Like that everyone is on same day for garbage collection but don't think it is practical to make areas without an HOA do that. Also windy days make a difference on curbside collection, containers get blown over but don't think that's a big problem Overall I think the homeowner should decide whether to set them curbside or leave at	8/15/2021 12:39 PM

Garbage Container Placement and Collection Survey

structure and the garbage hauler pick them up whether near the structure or curbside. They should put them back where they got them.

639	On recycling day, the worker who is picking up trash brings both containers (garbage & recycling) to the street. Then when the workers comes by to pick up recycling the worker brings back both containers near house. They help each other out.	8/15/2021 12:38 PM
640	I think placing the containers at the curb for just the day of collection doesn't affect the looks of my neighborhood. I wouldn't like the containers being kept at the curb all the time. After pick up they should be brought back to the building by owner or garbage hauler too keep curbsides free of loose garage.	8/15/2021 12:37 PM
641	Why so many different haulers? Put sections of town up for bid for the haulers to bid on and all garbage would be collected on the same day.	8/15/2021 12:35 PM
642	I don't like that I can't leave my containers outside when it's not collection day. They take up room in my garage. Maybe I don't understand the rules	8/15/2021 12:26 PM
643	Allow residents to leave them either next to the house or at the curb as they desire. Require haulers to return bins only to where they were.	8/15/2021 12:26 PM
644	Cans should be placed at the curb except on extremely high wind days or if the customer is a senior citizen or disabled. Cans should be at curb because it can be dangerous for the drivers to walk up north facing drive ways (ice)during the winter. Homeowners know the safe way to bring a can to the curb or they can even wait one week on the garbage.	8/15/2021 12:26 PM
645	Waste management has been placing notes on containers telling us that cans need to be placed near the curb to avoid disruption in service. I've written to them about this but am frustrated that they are actively disobeying the ordinance and trying to require us to.	8/15/2021 12:23 PM
646	There are several different garbage haulers that come to our neighborhood meaning if we do curbside pickup there are trash cans sitting out everyday which definitely looks tacky. On windy days the cans often blow over spewing trash around the neighborhood. Some neighbors leave them on the curb for several days, which also looks tacky. Finally it is often difficult for the elderly or handicapped to drag them to the curb. Please keep the ordinance as is, no trash cans curbside.	8/15/2021 12:23 PM
647	For homes on smaller pieces of land, it can be quite challenging to find an inconspicuous spot to store the containers.	8/15/2021 12:22 PM
648	During winter months it is more convenient for me to place container curbside, run out of room from snow and cars get banged up.	8/15/2021 12:22 PM
649	As long as the containers are easily accessible to the garbage company I feel they should be by the structure. This makes it easier for the elderly and disabled. I also di think the cost should go up as I already am paying almost \$50 a month.	8/15/2021 12:22 PM
650	I live in Cains View mobile home park. If I do not place my garbage cans at the curb they will pick it up my garbage this is for all collectors up here in Cains View	8/15/2021 12:21 PM
651	The real waste is having multiple hauler in the same area. Have seen communities which have municipal service	8/15/2021 12:19 PM
652	Placing behind or beside the structure is not always possible and I feel that is the part of the ordinance that should be changed. I realize that its yo keep neighborhoods looking nice; however sometimes there isn't a place beside or behind a structure that's convenient for the haulers.	8/15/2021 12:19 PM
653	I thought it was silly when s council man with a personal agenda pushed for the change years ago. It's an unnecessary and not equally enforced ordinance.	8/15/2021 12:12 PM
654	I've had problems with my hauler repeatedly damaging our grass on the boulevard because of the change to pick up at the curb and they take no responsibility or listen. Please keep the ordinance and put the responsibility on the hauler to pick up and put back.	8/15/2021 12:08 PM
655	The recycling bins should be larger than the trash bins.	8/15/2021 12:04 PM
656	everyone has trash. It doesn't matter to me where the trash cans live. Some people dont have an adequate place to put their cans outside, Also not having the city be responsible for trash	8/15/2021 12:04 PM

Garbage Container Placement and Collection Survey

removal is just weird. Everywhere else I have lived, it was a service the city provided (paid for out of taxes) and trash was collected 2x a week.

657	Homeowner should be able to determine where to place their cans.	8/15/2021 12:01 PM
658	I would prefer the container be placed back next to the house. Several times wind has knocked over the container on pick up day when we were required to bring it to the curb. Huge mess	8/15/2021 12:00 PM
659	Keep garbage collection as a private business, not a city service.	8/15/2021 12:00 PM
660	Waste Management has recently put sticker/warning on my garbage cans telling me I need to have them street side. They should be fined for lying to me.	8/15/2021 11:59 AM
661	Trash bin on the curb end up leaving more trash when blown over by the wind or improper curb area makes them unstable and they tip.	8/15/2021 11:57 AM
662	Cans blowing around in the street is dangerous and difficult for people to retrieve them. We also don't want garbage lining the gutters from cans blowing over.	8/15/2021 11:57 AM
663	Using an alley, if available, creates less garbage containers on the sides of the roads and doesn't require hauling containers far	8/15/2021 11:56 AM
664	Garbage costs were raised in 2020 and it will be very frustrating if costs raise again if haulers have to go by the original ordinance. During the temp ordinance change, I did not get a discount for having to bring my trash to the curb and to bring it back. I want them to go back to the origin service they were offering in that they retrieve from the house and return to the house as that is what I am paying for already. It's windy so it knocks bins over, an eyesore, and difficult for those with mobility issues to bring it to the curb and back.	8/15/2021 11:55 AM
665	Garbage trucks should only be allowed in streets, not in private driveways	8/15/2021 11:54 AM
666	I don't have a problem with taking the garbage / recycling containers to the curb nor returning them to my regular storage place on collection day. I also do not have a problem with my neighbors taking their containers on their collection day. I would prefer that containers are not left at the curb indefinitely.	8/15/2021 11:54 AM
667	No	8/15/2021 11:51 AM
668	People need to obey the standard of placing the bins in an inconspicuous place. Too many have them in the front yards and often open and overflowing. Garbage blows around and it hurts the look of the neighborhood. I think landlords don't inform their renters of the rules either as rental places sometimes are especially guilty of this.	8/15/2021 11:48 AM
669	No	8/15/2021 11:45 AM
670	The government needs to get out of this issue and let companies and customers handle their agreements. The government needs to step off this issue.	8/15/2021 11:45 AM
671	I really like the idea of having all collectors service the same neighborhood on the same day.	8/15/2021 11:44 AM
672	Waste Mgmt. should follow the ordinance. They leave you a note if you don't haul them to the curb.	8/15/2021 11:44 AM
673	I would like to see garage containers out of sight when not garbage day	8/15/2021 11:44 AM
674	I'm a retired single widow. I don't generate a lot of garbage. I think seniors should get a reduced rate.	8/15/2021 11:42 AM
675	Why is this an issue? You place it by the curb at night and pick it up in the morning. Don't really see the trash cans out.	8/15/2021 11:41 AM
676	No thanks	8/15/2021 11:40 AM
677	If they are allowed to place cans curbside there needs to be a time limit for returning the cans otherwise people will leave them out all the time.	8/15/2021 11:36 AM
678	The haulers need to stop leaving containers in the lawn, on the sidewalk, in the middle of the driveway, etc. They need to be bringing containers back to where they go.	8/15/2021 11:36 AM
679	If this ordinance is in effect now, why does waste management place stickers on my cans telling me that I need to place containers at the curb, to prevent service delays or other related	8/15/2021 11:33 AM

Garbage Container Placement and Collection Survey

pickup problems??? Someone needs to tell them that they are breaking the law by not following the ordinance and threatening its customers to BREAK the ordinance!!!

680	Would love to have recycling picked up weekly. Would love to have year round free recycling and yard waste drop off sites operated by city, similar to what Rapid City does.	8/15/2021 11:32 AM
681	I believe trash cans should not be left at the street...because trash cans are on wheels and can be rolled/don't have to be lifted.	8/15/2021 11:29 AM
682	Put them in your garage or out of view on non collection days	8/15/2021 11:28 AM
683	Stop being so anal about garbage can placement. It's a garbage can. Uppity BS	8/15/2021 11:27 AM
684	Same garage collector in one neighborhood	8/15/2021 11:26 AM
685	Ues winter time sucks getting them to the house in the snow. Not to mention the wind taking it down the street. Its not that far of a walk for garbage haulers.	8/15/2021 11:23 AM
686	When garbage cans are by the curb, there is a better chance that they will be knocked over by the wind and garbage/recycling flies around everywhere!	8/15/2021 11:21 AM
687	More efficient is better	8/15/2021 11:19 AM
688	I have no problem taking my containers to the curb for pickup. Our hauler returns them next to the house.	8/15/2021 11:18 AM
689	I believe it should be up to the haulers where the trash can is to be placed. I believe that if they are picked up at the curb that the home owner should remove the cans upon completion within the next 24 hours or so.	8/15/2021 11:18 AM
690	I have had the same provider for 25+ years.	8/15/2021 11:17 AM
691	Ive lived in SF 17 years and never knew there was an ordinance against putting bins on the curb on pick up day. Some people leave them on the curb and never move them. The city needs to be more vocal about rules and needs to drive around and hold people accountable for the ordinance to work.	8/15/2021 11:15 AM
692	Rapid City manages residential garbage collection. Garbage is part of the water/sewer bill, and everyone has the same matching trash cans. On trash day, customers must place the cans at the street 4 feet apart from each other and other objects so the automatic arms on the trucks can reach them. Residents are responsible for placing and returning cans. The city either collects or contracts collection out to private companies. This system seems to work pretty well, the cans aren't eyesores, and they're all collected on the same day, and you get one less bill and it seemed to cost less overall. I never once heard anyone complain about their system, and it operated pretty smoothly in my experience.	8/15/2021 11:12 AM
693	Too many garbage company's in town too many garbage truck going down my street - company's should have areas -	8/15/2021 11:12 AM
694	Waste management has informed me that if i do not place my cans at the curb that i will be charged \$12 per month valet service even tho curbside is against city ordinance. Unacceptable. I live on a busy street and do not want cans blowing over or being pushed over by school kids.	8/15/2021 11:11 AM
695	If container is required to be at curb, could exceptions be made for handicap and senior citizens?	8/15/2021 11:10 AM
696	Haulers can save time by picking up at curb let them	8/15/2021 11:09 AM
697	STOP LETTING GARBAGE HAULERS BULLY THE CITY AND THE RESIDENTS. We pay significant fees for trash collection, and they offer nothing in terms of credit for recycling, make zero allowances for disabled customers, and claim they don't have to follow ordinances-requiring customers to break them or the threaten to not pick up garbage. The City needs to back it's residents.	8/15/2021 11:09 AM
698	It's a lot safer to have the garbage hauler retrieve my trash can from curbside, than walk up my driveway in the winter and hurt himself on snow or ice. We grew up taking our trash to the street. It	8/15/2021 11:07 AM
699	My brother is a quadriplegic and it is difficult for him to push the trash to and from his house. I changed trash company's to accommodate his needs.	8/15/2021 11:07 AM

Garbage Container Placement and Collection Survey

700	Sioux Falls needs city trash. Our trash collection system is goofy and nobody should care if there are trash bins on the curb day of service.	8/15/2021 11:06 AM
701	Having the garbage can by the curb is both easier and safer for the haulers. The placement of the cans between the hauler and the customer. I don't mind having garbage cans being visible and placed in front of the house or being placed beside the curb as long as they are not physically blocking the sidewalk.	8/15/2021 11:05 AM
702	The number of trash haulers in Sioux Falls is asinine. There are 3 different haulers on my block on Friday mornings. I think is should be a city doing the trash hauling and get rid of all of these private businesses.	8/15/2021 11:04 AM
703	Curbside placement of the garbage cans allows the garbage collectors to collect & dump the garbage without leaving their trucks if the trucks have the correct equipment. This allows for quicker garbage collection & less labor cost for the haulers.	8/15/2021 11:02 AM
704	why have a survey for an ordinance that was made for specific reasons, the wind takes the garbage and blows it around, the extra stuff people pile around the can, is not good...	8/15/2021 11:02 AM
705	I'd rather have my neighborhood picked up by the same hauler to reduce fuel waste, and other environmental factors.	8/15/2021 11:01 AM
706	Inconspicuous isn't possible at some homes per slope of land or cost of building something to "hide" trash cans	8/15/2021 11:01 AM
707	We Do Not appreciate In any way Sarcastic Notes by the Hauler Company months later why they never collected our trash after we've been paying for their service just to tell us our garbage cans weren't on the curb exactly but on the grass and they could walk a few extra steps to retrieve them but they never did because they were lazy and didn't want to so therefore we never got our trash or recycle picked up for a couple months, instead got sarcastic notes taped to the can , it's not right and fair , it's absolutely ridiculous they would do that.	8/15/2021 11:01 AM
708	Increase what can be recycled.	8/15/2021 11:00 AM
709	There is too much wear and tear on our streets with so many garbage trucks in our neighborhood. We have at least five different companies driving on Tuesdays...and more on Fridays. The city should look at regulation to protect our infrastructure.	8/15/2021 11:00 AM
710	I will forget to bring it out, which is annoying, I love how they come get it.	8/15/2021 10:59 AM
711	Hauler already work 12 Orr more hours every day	8/15/2021 10:58 AM
712	Due to medical sometimes it is hard to put containers at the end of the driveway so setting right outside the garage on trash/recycle day works very good for us.	8/15/2021 10:57 AM
713	Not all people are physically able place cans at street due to age or other health issues. It is a real problem for those same people during the winter months with snow and ice and wind and cold. The system has worked for years no need to change the placement of cans . Let's think of our elderly neighbors. With haulers picking up on different days you have cans sitting by the curb everyday waiting to get picked up. Not a pleasant sight.	8/15/2021 10:57 AM
714	We switched haulers because waste management kept writing notes saying if don't bring our waste to the street they would stop our survive	8/15/2021 10:56 AM
715	I don't think it should matter where your container is placed. Trash is going in their rather than everyone in our community. There are bigger issues that should be addressed	8/15/2021 10:56 AM
716	Waste management will not pick up my trash if it's not by the curb. They then replace the trash cans in the middle of my driveway entrance so I can't get in my driveway. I cannot stop an park on Phillips to move them either so I have to park down the street to move them. Haulers come early in the day, move my trash cans to the edge of the street, mid driveway & pick up late afternoon. Leaves my driveway blocked all day & I need to move my trash cans usually twice that day. I did talk to management about this & it helped for a couple of months but now it's back to blocking my driveway. I'll need to change providers due to this constant issue but what if the others function like this too?	8/15/2021 10:55 AM
717	Container placement should be between the hauler and the customer.	8/15/2021 10:55 AM

Garbage Container Placement and Collection Survey

718	We prefer to place curbside as we have had our vehicles that were parked in our driveway scratched as the hauler was moving the containers. Putting them curbside eliminates this on both sides.	8/15/2021 10:53 AM
719	I have no space behind or next to my garage without the hauler entering my backyard where my dogs are and I would not want to take the chance that the hauler would not close the gate properly and have my dogs get out.	8/15/2021 10:50 AM
720	Wish we had compost pickup, or compost recycling. But that would require educating the public, which could be a good thing!	8/15/2021 10:49 AM
721	The city need to allow the garbage hauling companies the freedom to operate their business as they please.	8/15/2021 10:48 AM
722	Older people cannot manage curbside in bad weather. Steep driveways an issue for older people.	8/15/2021 10:48 AM
723	Give the haulers a break and let them retrieve your bins at the end of your driveway. They work really hard and a little courtesy goes a long way.	8/15/2021 10:46 AM
724	I think there still is shortage of haulers~and this is something we can do to make it easier and more efficient on them. If we had a set schedule where it was collected from the neighborhood on the same day, there would be no issues with how it "looks". That's a better solution.	8/15/2021 10:46 AM
725	Poor survey questions: "Should customers bring their waste containers to the curbside on the day of collection?" A better question is if customers should be ALLOWED curbside. Should haulers retrieve their customers' waste containers from the structure (e.g., home or business) on the day of collection? Better question: Should the haulers retrieve the containers wherever they are?	8/15/2021 10:46 AM
726	When I set my garbage by the garage, the hauler leaves the empty can at the curb. I am trying to follow the city directive but apparently my hauler is not. I an elderly and setting my cans by my garage is much easier for me	8/15/2021 10:45 AM
727	My home has steps to get to it. No ramp. I have no way of being able to store my cans next to my home let ask of them to carry them down steps when full.	8/15/2021 10:44 AM
728	I'm grateful that we have a choice of service providers in Sioux Falls (I may be changing mine).	8/15/2021 10:44 AM
729	We had curbside pick up in our previous community. Garbage haulers didn't even get out of their trucks...the trucks were equipped with an arm that lifted the garbage can and dumped it into the truck. We were just responsible to get our cans to and from the curb or driveway.	8/15/2021 10:44 AM
730	Protects my vehicles by putting at end of driveway! Also we dont know who the hire so the less time they take to look around the better.	8/15/2021 10:44 AM
731	Moble homes may or may not have decret places to put there trash & recycle containers. Also they may not be able to get to there trash/recycle containers until after work.	8/15/2021 10:44 AM
732	My company stated "as long as they can see the cans from the road they will collect them, no need to bring them to the curb" and we havent had any issues with it. They sit along side our driveway, up by the garage	8/15/2021 10:42 AM
733	The city of Sioux Falls should implement a city managed garbage hauling service. It is incredibly inefficient to have multiple garbage services serve houses next to each other on the same day.	8/15/2021 10:41 AM
734	We have a single car-width driveway. The request of placing the cans on the curb by our hauler requires us to place our garbage cans in the grass on our boulevard. Not only does this damage our grass, but it also increases the risk of injury for both the hauler and the customer. Especially in the winter.	8/15/2021 10:41 AM
735	I have no problem taking my trash to the curb to make pick up easier. Having them return it to my house is nice. I'm guessing like most businesses they are short staffed, I'm capable of helping them out by walking 10 steps to the curb. Plus it helps me and everyone remember it's garbage day when they are at the curb. Seriously Sioux Falls??? This is even a discussion?? There are other bigger issues to worry about.	8/15/2021 10:41 AM
736	I have changed garbage collectors due to some not placing my containers back by my house	8/15/2021 10:38 AM

Garbage Container Placement and Collection Survey

where they belong. I don't put my garbage in the curb and had a hauler that continuously left my containers in the middle or at the end of my driveway. Even after MULTIPLE calls to corporate I had to switch garbage companies just to ensure they were following the city ordinance. Having containers by the house reduces the chances of trash blowing all over the neighborhood on windy days

737	garbage hauler should be allowed to be as efficient as possible. Other businesses are able to be lean and efficient, garbage haulers should have the same option. Home owners should only be expected to have garbage at curb only for one day - maybe set out the night before and then can back away from curb at the end of the collection day.	8/15/2021 10:38 AM
738	There's no reason I should have to pay more for a service because of covid. Greedy bastards.	8/15/2021 10:37 AM
739	Would like to see recycling picked up every week.	8/15/2021 10:35 AM
740	Require containers as bags left out can be broken & scattered	8/15/2021 10:35 AM
741	Having garbage can brought back to house is nice, if people are gone. That way no one knows if someone is home or not.	8/15/2021 10:34 AM
742	We spend several thousands of dollars for a survey on many other things. Let's enforce garbage containers sitting outside around homes on days of no collection. It make the neighborhoods look so much NEATER and CLEANER!!!	8/15/2021 10:34 AM
743	I think it's fine to bring garbage to curb but want homeowners to store containers away, out of site, after garbage day.	8/15/2021 10:32 AM
744	I don't like the look of garbage cans close to the street. On windy days I have found my neighbors garbage and garbage can on my lawn. I have watched our streets being filled with garbage from cans being tipped over from wind. I have seen cars and snow plows almost running over cans that have blown down in streets and driveways. I live in a condo. We all have the same garbage service	8/15/2021 10:31 AM
745	It would be quite difficult for the elderly or disabled to place containers at the curb and return to house. Also, when we have high winds recyclables tend to tip over which results in a "snow storm"of papers flying down the street.	8/15/2021 10:30 AM
746	Let it be up to the home owner. Should not be mandatory and should not effect prices.	8/15/2021 10:29 AM
747	Not all houses have the same layout. I'm for efficiency. Leave by the curb, move back at the end of the day.	8/15/2021 10:28 AM
748	Putting the cans out by the curb is not a big deal. Especially during the winter for their safety. It should not be this difficult	8/15/2021 10:28 AM
749	Bring back driveway pickup. This is petty and ludicrous.	8/15/2021 10:27 AM
750	Allow some flexibility. Sometimes I have extra garbage and I like to pull it next to the street.	8/15/2021 10:26 AM
751	No	8/15/2021 10:23 AM
752	The lids must be closed no garbage sticking out to blow around	8/15/2021 10:22 AM
753	put garbage by the curb and have hauler return to the structure	8/15/2021 10:21 AM
754	Haulers charge per pick up but customers pay the same whether it's a 1-2 people house or 5-6 people at the house. Recycling reduces actual weekly garbage to a shopping bag size pick up. Also a city drop off place for various types of recycle would presort, improving the purpose of recycling.	8/15/2021 10:21 AM
755	I am disabled and need help and if on the curb it may not be back by the house for a few days and people walking need to go around them	8/15/2021 10:19 AM
756	It's ridiculous that there is an ordinance telling home owners what to do. If it's to keep trash cans from tipping, I get it, but most people don't need a worthless law...	8/15/2021 10:18 AM
757	I have been waiting to have this enforced as the city looks messy and trash is blown around with South Dakota winds. I do not want to make more work for our hauler, as I love our garbage company, but the appearance of the neighborhood is important to me as I work hard to keep my home looking neat and clean and the garbage by the road definitely detracts from the neighborhood.	8/15/2021 10:18 AM

Garbage Container Placement and Collection Survey

758	I would like the city to do garbage collection.	8/15/2021 10:18 AM
759	I myself cannot haul the garbage can to the end it's too heavy and my husband is a truck driver gone all week . Plus it's always windy and gets knocked over the little time we did put it down there	8/15/2021 10:17 AM
760	We have Crossman sanitation, the truck is quiet however, rbs and ace is our neighbors. The truck comes really early and is super loud and leaks. There should be rules on that	8/15/2021 10:16 AM
761	We have dogs and the only suitable place is behind a fence in the backyard. So it can be dangerous for them if the dogs are outside on trash day being they never come at the same time every week to pickup trash. Not right to keep the dogs inside until they are gone.	8/15/2021 10:15 AM
762	Garbage containers should be concealed from street view on non pickup days. The placement of garbage containers in the most prominent place in front of a residence is asinine and a direct reflection on the occupants!	8/15/2021 10:14 AM
763	Putting your garbage out to the curb is common courtesy for the haulers who work very hard. There is no reason to make their job harder than it is already by making them walk up to peoples homes to grab the owners trash and bring the bin back, that should be on the home owner.	8/15/2021 10:13 AM
764	Leave it as is	8/15/2021 10:08 AM
765	I like my garbage hauler more than I like my local politicians so don't mess with them	8/15/2021 10:07 AM
766	For an ordinance prohibiting garbage cans at the end of driveway, I have had my waste skipped if they are not ready and waiting at the curb.	8/15/2021 10:07 AM
767	Safety/falling on the ice plus the wind blowing the container over are the main issues for me.	8/15/2021 10:07 AM
768	It is dangerous when backing out of driveways to see any oncoming traffic. We don't need higher fees! We don't need noisy garbage trucks going up and down our streets every single day. Dangerous for kids too, if we know what day the haulers are coming on our street it makes it much easier .	8/15/2021 10:06 AM
769	I think it should be up to the hauler to determine how they run their business not government.	8/15/2021 10:02 AM
770	Should be the homeowners option. Some aren't physically able to put at the curb. Others prefer their own control to put it there. Curb is less time and faster for the hauler.	8/15/2021 10:02 AM
771	Better for elderly in winter and when storming or really windy if the garbage is picked up by house and returned to area near house.	8/15/2021 10:02 AM
772	We have the garbage container ordinance but it has never been enforced. Drive all over town. Garbage containers are sitting out in front of 75% of people houses. Garbage containers need to be kept either inside of garages or a fenced area beside house. Now most just leave the containers out front 7 days a week. Makes our city look junky.	8/15/2021 10:00 AM
773	I think all containers should be kept inside, until the day of collection. That would help keep garbage from blowing around the neighborhood. The lids blow open on windy days, and garbage is blowing all over the place.	8/15/2021 10:00 AM
774	I am keeping in mind that the city could help to mitigate any proposed fee increases by the haulers since the city controls the dumping fees charged to the haulers at the landfill.	8/15/2021 9:59 AM
775	Okay my husband is handicapped and I would like to have our containers picked up near our house it's easier I cannot press that prosperous	8/15/2021 9:59 AM
776	In my previous community, the garbage collection service had automated garbage collection trucks. The haulers did not even need to get out of their cab. Let's allow that same technology to come to Sioux Falls. I personally do not want anyone walking up to and around my home — they look like a thief! I would much rather the haulers stay by the curb. It is much more efficient for them, it has less impact on the environment, and it is NOT an inconvenience for me.	8/15/2021 9:58 AM
777	Should be allowed to go out to the curb. For those who can't take it out due to disability should have the driver come get it and return it	8/15/2021 9:57 AM
778	I talk to my neighbors and they take their cans to the curb as do I. Why not help the hauler?	8/15/2021 9:57 AM

Garbage Container Placement and Collection Survey

Might make the cost stay down! I've heard "bigger" cities in like California that if the cans are not by the curb they don't get picked up! Let the haulers decide not the city council!

779	One hauler for the whole city trash picked up once a week in the area . Too many trucks every day of the week . Huge problem tearing up roads spilling trash traffic safety	8/15/2021 9:55 AM
780	My garbage can is no more distracting to the neighborhood appearance than the green utility boxes in my front yard (every other house). At least my garbage cans are pulled back to my garage 6 days a week.	8/15/2021 9:54 AM
781	need to think the elderly and handicapped and what is convenient for them without extra charges since they are most likely on limited budget	8/15/2021 9:53 AM
782	I would love to see it consolidated to fewer days in my neighborhood. There are some many trucks going through was each week.	8/15/2021 9:52 AM
783	Their trucks leak evey time they are at the house they say it public property but the stains are all over and solids out on the street have flies and it stinks. We should have one contracted good hauler for the city like other cities of our size then it only comes once a week and the savings to roads ,air and traffic problems are less . This many haulers wasting fuel polluting the air and no way of controlling them is terrible. So unsightly trash cans and trucks out everyday every street everywhere please fix .	8/15/2021 9:52 AM
784	Our garbage would never get picked up if we didn't put it at the curb.	8/15/2021 9:51 AM
785	Inconspicuous area? Next to the building should be just fine. Shouldn't have to build-out an area to hide the container. Most residences do not.	8/15/2021 9:50 AM
786	I really don't have an opinion on the current ordinance. However, most haulers require customers move the bins to the curb or they won't pick the garbge up. So in my opinion, this "defiance" of the current ordinance falls more on the haulers than the public. And it has nothing to do with covid. Most required the bins be placed curbside BEFORE covid.	8/15/2021 9:49 AM
787	I think garbage should be placed in driveway day if arrive but not at street due to wind ect. I think the city should enforce a fee to customers who keep garbages in front of garage on normal basis. It's an eye sore.	8/15/2021 9:48 AM
788	I believe it should be an option for able bodied people to bring bins to the road to save time for the hauler. However, those with disabilities should not be penalized for not being able to do so.	8/15/2021 9:46 AM
789	Why does the city care so much about this. Please fix real issues. I do not pay taxes for you to hum and haw about the freakin garbage. Get real please.	8/15/2021 9:46 AM
790	It is not a big deal to place containers curbside. I would be nice if the would put the back by structure. It is a good compromise.	8/15/2021 9:46 AM
791	Garbage cans get tipped with the wind. What a mess. Cans need to be next to your house/garage to protect from the wind.	8/15/2021 9:46 AM
792	City needs to keep there nose out property owners business, we pay property taxes and the city should not tell homeowner what they can and can't do on there property	8/15/2021 9:45 AM
793	Let's help keep Sioux Falls a beautiful city, trash cans curbside not only look bad but they also hinder one's vision when watching for children.	8/15/2021 9:45 AM
794	I am disabled and shared many requests waste management not leave trash can in middle of street as difficult to pull up they said they would come up to get and return to house, That never happened even before covid.They are contracted through mobile home court,I would not choose.I think would be great if all collectors would do from home not curb then cans are not blowing over and would help disabled residents.	8/15/2021 9:45 AM
795	I have neighbors who struggled to get their garbage out. Younger folks I don't think care one way or the other but it is dangerous for an elderly person to move these bins around in both summer and winter. Which is why the ordinance is in place to begin with.	8/15/2021 9:44 AM
796	We never used to place our garbage near the curb, but we received a letter from the trash service asking us to do that. So I suggest the city let trash collectors know that if we aren't supposed to be doing it.	8/15/2021 9:42 AM
797	Curbside collection is more efficient and economical!	8/15/2021 9:42 AM

Garbage Container Placement and Collection Survey

798	Having garbage containers by the street a couple hours a week won't hurt anybody, plus it saves time for the collector.	8/15/2021 9:41 AM
799	If this is an ordinance, why is it not enforced? If it will not be enforced, get rid of it. There are other issues on properties that need stricter enforcement - Ex Abandoned vehicles, RVs in driveways, & unkept property	8/15/2021 9:40 AM
800	If my hauler can't put the trash back where it was it would be helpful to have them leave it in the street so it's not in my driveway. Also might just be nice to have one garbage truck so I don't get woken up 3 different days by different companies.	8/15/2021 9:37 AM
801	In the beginning it was picked up early now it can be anywhere from 7:30-5:00-if you put it out at the curb the night before-it may be out there along time -wind weather elements and the stupidity of people-puts in factors of why it needs to stay by the house- and our service is a truck that comes by-a device on the truck picks it up and slams the garbage out of it and then slams it to the ground-they don't even get out if the truck! Have broken a few containers!	8/15/2021 9:35 AM
802	I believe that if customers/haulers are not required to haul their containers back to the house, we will become a city where the receptacles are always on the curb. And I find that to be unsightly.	8/15/2021 9:34 AM
803	Placement of garbage cans near street by customer should be a voluntary act of kindness but not a requirement. Imposing a requirement to place cans at end of driveway places an additional burden on the elderly especially in winter.	8/15/2021 9:33 AM
804	It doesn't make any sense to force the poor garbage haulers to have to run up and down driveways to grab barrage bins and then have to put them back. The work is difficult enough and I don't want a garbage worker collapsing on my driveway during a heat wave or ice storm. It would be far safer for the haulers not to have to do all the extra work of taking bins to the structure and it would also decrease noise pollution on the block because the hauler wouldn't have to have the truck sit on the street as long. Please repeal this idiotic garbage collection ordinance.	8/15/2021 9:28 AM
805	there is little good reason to have multiple collectors for the same block with no actual differentiation in service. this is the most inefficient administration of a health service in a city. multiple trucks on the same street burn excess fuel, add wear and tear to city streets and inconvenience residents navigating around all the trash trucks on residential streets. a serious discussion and analysis of this city policy is needed to maintain price levels and add other services like bulk collection or tree debris after storms.	8/15/2021 9:27 AM
806	Our hauler required it. Was not our choice. Fees should not go up for a service we had prior to covid.	8/15/2021 9:25 AM
807	During Covid garbage was curbside and their rates still went up so if there is no savings from putting them curbside the haulers should get them from structure.	8/15/2021 9:23 AM
808	I know there is an ordinance on what time they can start picking up but some start earlier than allowed. Might want to remind the companies of that as well.	8/15/2021 9:17 AM
809	I am happy they put the containers back near the house when done and I don't mind having to place them at the curb.	8/15/2021 9:17 AM
810	place a screen around your container so it is out of sight, thats the law!	8/15/2021 9:17 AM
811	The recycle bins should have latches on them.	8/15/2021 9:16 AM
812	Container at curb on day of collecting is ok but not mandatory (elderly, handicapped, personal preference) , return to structure (eyesore, advertises no one is at home therefore increase crime/theft) , no structural fee schedule for collecting	8/15/2021 9:08 AM
813	I think on pick up day containers should be allowed out by curb. Resident brings to curb full and hauler returns empty to house structure. This way we work together. However, residents that have extra waste or recycle OUTSIDE container(s) they need to make sure waste does NOT blow around neighborhood. If placed by curb extra waste tends to blow around neighborhood on windy days causing a mess and extra work for residents. If haulers will consider keeping fees as low as possible then saving haulers "walking" time should justify low or reduced fees. Having containers out by curb constantly should continue to be prohibited. In bigger cities (Omaha) containers are placed by curb on pick up day as trucks with automated pick up arms grab container, lift, and empty. Resident needs to place at curb and also return to	8/15/2021 9:08 AM

Garbage Container Placement and Collection Survey

their house structure. If this truck technology comes to SF then we will need to have residents place by curb regardless AND return after pick up. To sum up, curb placement on pick up day as long as waste is not able to blow around saves hauler time and resident should qualify for lower fee or discount.

814	If we as customers have to bring containers to the street to save the garbage company time because of labor shortages, saved fuel and maintenance costs I think it should reflect on our bill. About like people doing self checkout. Saving the grocery store money and paying full price.	8/15/2021 9:07 AM
815	I am 75 years old and would like to be assured that I don't have to pull the container to the street. I have had one hip replacement.	8/15/2021 9:05 AM
816	Most in our neighborhood keep containers in garages. It's easiest for us to all put them at the curb on collection morning. This limits the amount of time they are out and visible. Also limits the time they are affected by wind, weather and accessed by animals.	8/15/2021 9:04 AM
817	No comment	8/15/2021 9:02 AM
818	I moved from a place where bins had to be placed by the curb. Often, bins fell over causing a hazard on the streets; garbage flew out if the bins fell over before pickup and people would dump their garbage in our bins since it was on the road, including liquids and sometimes illegal substances. I love the way SF has this ordinance. The streets look better, it is a great service and I reward my drivers with little gifts every once in a while because I know they do that extra work retrieving and replacing my bins. They are great!	8/15/2021 9:02 AM
819	I'm the winter there are times where my driveway gets icy overnight and I don't have time to clear the ice in the morning before collection. By me bringing the garbage to the curb for the hauler the risk of them falling on an icy driveway is greatly reduced.	8/15/2021 9:00 AM
820	Within the past month I was getting notices stuck on my garbage container by Waste Management stating I needed to put my container at the curb. Interesting considering the ordinance against it. I would rather keep my container near my house and have them haul it back and forth. A street full of containers looks trashy and most of the time the haulers block my driveway with my container after they empty it.	8/15/2021 9:00 AM
821	Recyclables need to be picked up weekly, too. Our recycling bin is overflowing after the first week almost every cycle while the trash bin is barely half full.	8/15/2021 8:58 AM
822	Would be nice to have an ordinance that cans are stored in an inconspicuous location instead of driveways. I like the idea of a single pickup day too.	8/15/2021 8:58 AM
823	Winter time is the hardest time for me if there is a lot of snow. Our driveway slops had get very icy. I don't mind at all taking them to the curb 3/4 of the year but winter is a different story.	8/15/2021 8:55 AM
824	I think a good placement would be on the drive on the property's side of walk . That would be less time for haulers. And not much more work for home owner, because most of them put it in front of garage anyway and most drives are not that long.	8/15/2021 8:54 AM
825	I don't like trash cans placed in the sidewalk, they are in the way of people walking. The lids fly open or they tip over and trash flies everywhere.	8/15/2021 8:51 AM
826	Only at curb on day of collection, not all the time.	8/15/2021 8:49 AM
827	On non collection days customers should be required to ensure their cans are not visible from passers by and it should be enforced.	8/15/2021 8:47 AM
828	I only use a locally owner collection service.	8/15/2021 8:45 AM
829	The reason I went with my garbage provider was that they would collect the containers from my home and not having to put them at the end of my driveway. Also with obesity being a problem in our country, the physical exercise is good for people.	8/15/2021 8:45 AM
830	Waste management placed a sticker on my bin telling me i had to pull it to the curb. That irritates me now knowing they are supposed to get the bins.	8/15/2021 8:44 AM
831	Containers should be kept clean.	8/15/2021 8:44 AM
832	this is really a non issue. Trash collection isnt the most glamorous job in the world so make it	8/15/2021 8:44 AM

Garbage Container Placement and Collection Survey

as easy as possible for them. Make curbside an option.

833	8 different companies collect in my neighborhood--how wasteful and inefficient. Put zones out to bid and select 1 hauler per zone.	8/15/2021 8:42 AM
834	No collection prior to 7:00 am. I totally object to putting garbage out the night before!	8/15/2021 8:41 AM
835	We get SO many trash bins that get blown over with the wind and trash is everywhere when we take it to the street. When it is up against the house or garage it's not as bad with more protection from the wind.	8/15/2021 8:40 AM
836	My garbage collector requested we bring garbage to the curb when snow is present- workers struggling with shoulder injuries pulling carts through snow- curbside collection may be a seasonal thing-	8/15/2021 8:38 AM
837	With how many haulers we have in the city, we will have garbage bins at the end of the driveway constantly, if we don't keep the ordinance as-is. Plus, if a customer forgets to take it to the end of the driveway and they miss a trash pick up day, we have more risk for garbage to end up overflowing in waste cans.	8/15/2021 8:31 AM
838	I feel if I am paying for the service. The haulers should retrieve and return the garbage cans	8/15/2021 8:31 AM
839	The curb is not the place. I have seen containers tipped over and garbage and recyclables all over the street and yard	8/15/2021 8:30 AM
840	Some of us are not able to move trash containers to the curb due to physical limitations.	8/15/2021 8:30 AM
841	The city needs to patrol this, my neighbor leaves his trash containers on his driveway 7 days a week. 4604 Hanna Circle.	8/15/2021 8:29 AM
842	Sioux Falls should operate a city owned garbage collection company with automated trucks that use arms to lift and dump cans, we are tired of all the garbage trucks driving around town ruining our city streets! Watertown SD has an excellent waste service	8/15/2021 8:23 AM
843	RBs does not bring it back to original position/ leaves it on the curb unless it's also recycle day- he brings it back	8/15/2021 8:20 AM
844	During COVID and for a period following, containers lined the streets on nearly every day of the week. Making that practice legal or an option is not acceptable.	8/15/2021 8:19 AM
845	People put garbage in backyard. Dogs bite. Can on curb better	8/15/2021 8:02 AM
846	As a senior citizen it would be difficult and at times impossible to have to put cans curbside and retrieve them	8/15/2021 8:01 AM
847	The current placement of garbage by road is good the night before pickup. Safer for all	8/15/2021 7:56 AM
848	our cul de sac has "13" different garbage trucks on our street each week,, 13. This is crazy from my standpoint,, It creates a LOT of wear and unnecessary tear,, Our garbage service did a great job of picking up our garbage before the pandemic,, they can surely go back and do the same as before. The city should, I believe, limit servers somehow to areas etc. so we have less truck traffic.	8/15/2021 7:56 AM
849	Everyone in our neighborhood leaves the containers at the curb on garbage day and retrieves them same day. It is easier for the garbage collector and not an issue for the homeowners. I don't understand the reason for the ordinance as it stands.	8/15/2021 7:47 AM
850	Nothing wrong with curb placement for collection. Just so they can't stay there all week. Placing at the curb reminds me to get my garbage out.	8/15/2021 7:09 AM
851	In addition to home owner placing it on the curb, services should be bid out so that all services take place on one day each week. The noise, traffic, and wear and tear on the streets could be greatly eliminated versus the current model. This could also be billed through property taxes. Some might say this will squeeze out the "smaller" providers but ultimately this would be more efficient and productive than the current model.	8/15/2021 7:08 AM
852	I have waste management because they purchased my previous provider. Their costs to leave are outrageous. I know many residents that would love help fighting \$120 fee to leave to a local provider.	8/15/2021 6:54 AM
853	This was to be a temporary concession for the haulers. When the emergency order expired	8/15/2021 6:43 AM

Garbage Container Placement and Collection Survey

there should have been no question about going back to following the ordinance. My hauler was one of the biggest advocates for the original ordinance many years ago and now still leaves my containers at the curb all day. Covid has become an excuse.

854	Garbage cans should be in a secured place when stored next to home so wind doesn't blow them over and garbage blows all over.	8/15/2021 6:01 AM
855	curbside placement makes sense, some trucks are set up to lift right from the street	8/15/2021 4:37 AM
856	I had no idea curbside/COVID had expired. Was that ever announced?	8/15/2021 1:03 AM
857	Haulers with 2 companies (I switched from one to another recently) have still been insisting I put the containers at the end of the driveway and then they leave them there. This is unsafe for people who go out of town overnight, as the containers announce that the house's occupants are not home and invites theft or mayhem.	8/14/2021 11:07 PM
858	I see no reason why we should have to pay an additional fee to have our trash picked up from the structure and return back to the structure. This would just be another financial burden to those of us who already struggle with the high cost of living. Also, many people have medical conditions which make it difficult for them to bring the trash cans to the curb or even to haul them back to the structure.	8/14/2021 10:58 PM
859	When it's not collection day, I agree that the cans should be placed in an inconspicuous place. In collection day, residents should bring them curbside. Haulers can decide if they bring back up to home or not.	8/14/2021 10:55 PM
860	Leave it as is! Otherwise, are rates will go up. I don't think this is a "big concern. Apparently some folks don't have enough to do!!!	8/14/2021 10:33 PM
861	At curbside they will tip over in the wind and if it is icy and snowy out hard to get it placed at the curb with piles of snow.	8/14/2021 10:33 PM
862	Having garbage containers curbside looks trashy. Pun intended. And with so many haulers, the streets would be lined with garbage cans virtually every day, all day. People would have to put them out on their way to work, and they'd remain there until they got home. Also, South Dakota winds would often blow trash around the neighborhood, including the empty garbage cans.	8/14/2021 10:32 PM
863	Since the city started this with requiring us to take garbage cans to curb due to covid the city needs to correct the problem and not allow garbage haulers to dictate rules that oppose what the law states.	8/14/2021 10:28 PM
864	Neighbors put out their containers & garbage can end up in our yard if windy. Then they take several days to return to their house & it's unsightly to look at them. We travel often & it's so nice to come home & our cans are in their correct place. If they weren't it would be a sign for a thief that no one is home.	8/14/2021 10:25 PM
865	Many people do not place bins at curbside, but instead place them on the sidewalk, blocking it.	8/14/2021 10:25 PM
866	Ummm....I know it is hard to believe, given the timidity of our elected officials, but COVID is still going on. Let's keep the haulers safer.	8/14/2021 10:24 PM
867	I have no problem bringing my garbage can to the curb once a week, it's no big deal.	8/14/2021 10:23 PM
868	Leave this to the hauler/customer relationship! If a customer doesn't like their service, there are PLENTY of haulers from which to choose.	8/14/2021 10:21 PM
869	The City of Sioux Falls needs to pull their head out of their ass and delete this ordinance!! I have had waste pick-up with 2 separate waste transport companies, and BOTH companies told us that on trash pick up day the waste bins MUST be placed curbside. So Companies are saying one thing and the City is saying something completely opposite!!! Honestly and actually--why does the City of Sioux Falls have this dumbass ordinance in place?? It's safer, quicker, and more efficient for the waste compnies to pick up waste street side and NOT have to waste time and effort to go to a location next to a garge or house! Obviously the Waste Management Dept. and the Sioux Falls Council that developed this regulation is a special kind of stupid!!!!	8/14/2021 10:21 PM
870	Garbage containers at curbs is unsightly, garbage blows around the neighborhood in the wind, as do the empty containers. If no one is home, containers can be at the curb for multiple days.	8/14/2021 10:20 PM
871	Our garbage container cannot be retrieved from our house via our driveway because we have a	8/14/2021 10:20 PM

Garbage Container Placement and Collection Survey

tuck under garage with a shared driveway with our next-door neighbor. The only way to haul our garbage container out is via our neighbor's driveway when their car is not parked there. If their car is in the driveway, the only choice is to carry it over the flower bed or very very carefully down the edge of their driveway, putting their car in danger of getting scratched. We would strongly prefer to take care of this ourselves as we can take it out the night before while their car is gone.

872	I'm really concerned about trash containers being at the end of the driveway because on windy days, cans tip over and then there is trash all over the neighborhood. I put my cans where they will not roll away nor be blown over by wind. Also, I know that my elderly parents are unable to put their cans at the end of their driveway. What would you propose they do if you require it with an ordinance? The haulers are not going to adjust their prices if you make this change. They never reduce prices, only increase. You really need to start enforcing the "inconspicuous" place because there are MANY homeowners throughout the city who always leave their cans outside their garage. It is an eyesore to a neighborhood. I'm not sure how you will do it with so many haulers in this city, but it would be nice if an entire neighborhood had garbage pickup on the same day. We have so many trucks coming down our street all week long. They drive way too fast especially when they only have one or two pickups on the street.	8/14/2021 10:20 PM
873	Surprised this is even an issue. Containers should be stored away from sight until 12-24 hours before pickup. Bring containers to the street curb. More efficient for haulers (should result in lower fees or at least not increased) and less emissions for all of us. Please, figure this out and move on to other issue that are more critical	8/14/2021 10:19 PM
874	Make sure the container is not in the street	8/14/2021 10:18 PM
875	Keep Sioux Falls clean and neat garbage containers detract from the neighborhood	8/14/2021 10:17 PM
876	Especially for those of us who are older, this can be an issue of safety, especially in the winter. It is also a matter of keeping the neighborhood looking nice at all times.	8/14/2021 10:17 PM
877	There is also a security issue, possibly overlooked. If a container is left at the curbside and the owner is away for whatever reason it gives criminals an advantage that the house maybe occupied!	8/14/2021 10:16 PM
878	The garbage men do not get out of there truck and clean up excess waist leaving it in the street for numerous days	8/14/2021 10:15 PM
879	City of Sioux Falls should have their own city garbage department. It would keep cost low.	8/14/2021 10:14 PM
880	1. Garbage cans placed curbside create a significant safety hazard for my young children. The cans block drivers' view of my small children, who may either get hit by a car backing in or out of a driveway, or on the road if my child runs out into it. Also, as a driver, I notice the risk of small kids darting out from behind cans right at the road in front of my car. 3. Before I can pull back into my driveway, I have to leave my young children inside my running vehicle to quickly move my garbage cans, which our garbage men place at the end of my one lane driveway. They try to set them to the side but it just isn't enough room. 3. More cans tip over in the wind curbside on my street than they did up by our homes, due to the openness of the road. 4. Curbside cans that tip over on my street create neighborly tension as loose recycling and garbage blows down the open street; no one knows which tipped can it came from and who is responsible to pick it up. When cans were placed near our homes the trash didn't drift as far and it was obvious who needed to pick up the mess. 5. Aesthetically the curbside cans have become an eyesore in our city's beautiful neighborhoods. My daily walks with the kids and our dog aren't very pleasant walking past rotting garbage and heaps of excess cardboard boxes.	8/14/2021 9:53 PM
881	When we travel, we used to be able leave the containers in front of our garage for a few days. If we have to bring them to the curb, we can't do that because they can't sit at the curb for several days. In that case, we have to hire a neighbor kid to take them down and bring them back up, or we just have to miss pick up. If we miss pickup, our recycling container is too full and we end up putting recycling in the trash. Please discontinue the requirement to put the cans at the curb.	8/14/2021 9:27 PM
882	Taking can to street in winter is dangerous for older people.	8/14/2021 8:52 PM
883	Please repeal the ordinance but also don't force people to bring it curb side either	8/14/2021 8:30 PM
884	I think the ordinance should be changed to allow customers to decide what method of garbage placement is best for them. There should be no incentive or disincentive for either choice.	8/14/2021 8:19 PM

Garbage Container Placement and Collection Survey

885	Waste Management is the worst at following city ordinances and they throw my recycling in the garbage.	8/14/2021 8:18 PM
886	Haulers should retrieve and replace containers, not curb side pickup.	8/14/2021 7:34 PM
887	Let's keep Sioux Falls the beautiful city it presently is. Garbage toters curbside detracts from neighborhood orderliness in good weather, not to mention with our winter winds and snow., Currently, our hauler is not returning our toters to the structure after collection, even though we place them near our structure prior to collection. I would like to think elderly customers appreciate the toters near the structure both before and after collection.	8/14/2021 6:51 PM
888	Leave it as is. It has worked for years this way. The cost keeps going up and they want to provide less service	8/14/2021 6:16 PM
889	Allow curb side in order that haulers can use technology equipment that allows mechanical arms to grab the containers. Faster, efficient, safer for drivers, and minimizes human interaction (drivers) with containers. This is the smart decision.	8/14/2021 6:16 PM
890	I would like to see a spring clean up timeframe when people can put items out for pick up and to be taken to the dump. Many people do not have the needed resources to be able to haul things to the landfill.	8/14/2021 5:48 PM
891	Trash and trash cans make the city look "trashy". Weather/wind tip containers over which results trash scattering around and possibly end up in sewer/ drain infrastructure. Scatter trash can harm the environment/ animals and pets alike, this is why we have the service, so people aren't scattering trash everywhere. Employees and employers know the work conditions and should have/provide the necessary "equipment/tools" to make the "work place" safe.	8/14/2021 3:30 PM
892	Cans Should not be left outside except collection day because everyone let's their trash blow all over and don't pick it up	8/14/2021 3:17 PM
893	I began bringing my cans curbside as a courtesy early in pandemic. Less courteously, haulers tend to leave cans blocking my driveway haphazardly after collection. If I leave cans against my house, haulers will still leave empty cans near curb, blocking my entire driveway. Need solution on both ends.	8/14/2021 1:22 PM
894	No	8/14/2021 1:00 PM
895	I think it would be an interesting idea for a neighborhood to get a collective bid for garbage service. This could allow for more efficient service leading to lower costs and less traffic. In my neighborhood we live on a long dead-end and on Mondays there are often 3-4 garbage trucks from various companies all blocking traffic at once. I appreciate they generally are all the same day and it's over but it seems silly to me that we use so many haulers when one truck could do it all. It would be more convenient for the garbage companies also to pick up at every house rather than drive into a neighborhood to get one receptacle.	8/14/2021 12:59 PM
896	You cannot mandate "one size fits all" on where garbage cans are placed. I am able to place them either at the garage door or at the curb. But I have older friends who are not able to do that. Give them some leeway and don't allow extra charges for the few extra steps it may take.	8/14/2021 11:28 AM
897	Why does it even matter if the cans are set at the curb? I understand for those with disabilities need assistance and should receive that but anyone capable of doing so should do what is best. Cans at the end of a driveway don't offend me. What type of person is offended by this?	8/14/2021 9:38 AM
898	Please enforce the rule for garbage containers to not be stored in a visible area when it is not collection day.	8/14/2021 9:32 AM
899	Please don't allow containers be in the front or out in plain site on non collection days. I have neighbors who leave the cans on the front yard every day. It's unsightly.	8/14/2021 9:11 AM
900	I would like the option for compost or food waste collection.	8/14/2021 9:11 AM
901	Elderly/disabled persons struggle with getting garbage to curbside and back again. I don't mind taking my garbage to curbside and retrieving to help the haulers out. I'm 100% for that, but the disabled/elderly should not be required so do this and should not be charged more because they are typically on a very limited income.	8/14/2021 9:02 AM
902	I don't mind bringing my container to the curb. It saves the hauler labor costs by saving a few minutes at every stop. However there are people, especially elderly or mildly disabled, that can't pull the container up and down the driveway. Or if people are going to be gone that the	8/14/2021 6:20 AM

Garbage Container Placement and Collection Survey

container isn't sitting at the curb for a few days. It should be on the honor system to bring cans to the curb and encouraged by the city and hauler.

903	No curbside is easier for the hauler	8/14/2021 12:08 AM
904	This survey did not address guidelines for trash bin placement on noncollection days. Please be more vigilant about keeping Sioux Falls attractive by requiring the bins to be out of sight.	8/13/2021 11:19 PM
905	This may be an important issue for people living with disabilities. I am not disabled and I am capable of retrieving my own waste containers from the curb, but the impact to the elderly and disabled should definitely be factored into this proposed ordinance.	8/13/2021 10:37 PM
906	I want an easy free way to get rid of grass clippings, leaves, and branches. The fall leaf drop is great. Need access all the year.	8/13/2021 9:52 PM
907	Renter here there is no structure in which to place the cans anywhere in the neighborhood. We are in a rental community. There's no choice but to either keep them in the garage or out in front of the home.	8/13/2021 8:57 PM
908	For those of us who are health compromised, it is hard to move the cans. I use a walker and a cane. In the winter, it would be impossible. My driveway also is at an angle.	8/13/2021 8:42 PM
909	If it's against the law to have curbside service, why are you letting haulers break the law??? Enforce the law you gutless bastards!	8/13/2021 7:58 PM
910	There are so many different haulers that the mess of various cans at the end of the driveways and the daily noise of hit trucks needs to be reduced.	8/13/2021 7:54 PM
911	We chose our company (A-ok) because they return our trash cans to the house. It is convenient AND it lets me know they have already picked up at my home. I did not know we weren't supposed to be placing the cans curbside. I do this as a courtesy to the haulers. I do NOT like it when people leave trash cans out in plain sight. Yuck.	8/13/2021 7:34 PM
912	It can be very dangerous for individuals who may have diminished physical ability due to age or serious medical conditions.	8/13/2021 5:09 PM
913	Municipal collection or territory-based private collection to reduce the number of trucks visiting a particular street during the week seems like it could be more efficient and environmentally friendly.	8/13/2021 4:58 PM
914	Worried with all the wind we get that containers will blow over and spill frequently if curbside placement is allowed. Also there will be lots of people who will park their containers curbside permanently and never return them to the house.	8/13/2021 4:29 PM
915	It seems to me to be common courtesy to move my garbage can to the curb, if I'm able, but people of different abilities (elderly or disabled) shouldn't have to pay more if they're unable to bring their garbage can to the curb.	8/13/2021 3:17 PM
916	My hauler (Waste Management) currently requires containers on curb or they will not pick up. They said they don't care what the city ordinance is and they city told them they could do whatever they want.	8/13/2021 2:25 PM
917	I think that all garbage should be picked up on the same day in the neighborhood by the same company and prices should be the same throughout the city.	8/13/2021 1:48 PM
918	If I have to place my bins "in an inconspicuous place beside or behind the structure" that means, the haulers will be either walking in my landscape or behind my house. I do not want either of those. I personally bring out my bins to the sidewalk and bring them back in my garage.	8/13/2021 1:39 PM
919	It just makes the most sense to put our containers at the curb!	8/13/2021 1:24 PM
920	I'm a forgetful person. And I recently moved to a neighborhood whose collection day is different than the one I had. This all combines into one big "oh crap! I forgot to take my cans!" I would hate to think I would be "punished" with my trash not being collected simply because I forgot. At the end of the day, the job is trash collection regardless of whether or not the cans are curbside. This may not always be convenient for the individual drivers, but there are inconveniences in every job across every industry and should just be considered part and parcel of the job.	8/13/2021 1:23 PM

Garbage Container Placement and Collection Survey

921	I have lived in other communities outside the state and many require residents to bring to curbside and a truck with an arm picks up trash can and dumps it in truck without driver ever leaving truck. Works well and never notifi any issues with it.	8/13/2021 12:48 PM
922	I like that if I take my garbage to the curb that they bring it back up to the house. I would be fine having to retrieve my own garbage as well after it has been picked up!	8/13/2021 12:42 PM
923	We are all here to help everyone So if we all do a little we'll help	8/13/2021 12:22 PM
924	Curbside placement should not be prohibited. As long as it is only done on the day of collection, then there is no reason not practice it.	8/13/2021 11:35 AM
925	Prohibit collection before 7a.m. Allow customers container corral by or near curbside	8/13/2021 11:08 AM
926	Please please please work to develop a curbside or hauler service for foodwaste/compost. Our city desperately needs this, and this department can make this transition a smooth one with their garbage routines already in place. Please consider developing this and perhaps piloting it at central locations to measure interest/use (example, I work at the library; perhaps one or more of our locations could serve as a pilot compost drop off location to see how popular it is). Thank you for all the service that this department provides for our community.	8/13/2021 10:35 AM
927	I don't think setting my garbage out to the curb is a big imposition, so am glad to help them out. At the same time I think it should be flexible - if I don't get it out to the curb for some reason, they should still pick it up and return it to the same spot.	8/13/2021 10:17 AM
928	I pay for garbage service. I expect hauler to retrieve container and return to outside my home.	8/13/2021 10:11 AM
929	I think there should be a hauler cap put in place and that neighborhoods should be districted such that only one hauler goes down each street once a week	8/13/2021 10:06 AM
930	Don't you think the council more important business than getting involved with garbage business and haulers. Lived in Sioux Falls many years and never had a problem with the garbage business. As seniors why are you guy's trying to make it harder on everyone..We are fortunate to have garbage and recycling pickup. Do you have to get involved in everyone's business. Give us a break. More important items for you guys to discuss	8/13/2021 9:58 AM
931	Our garbage haulers do a great job	8/13/2021 9:28 AM
932	some people are physically unable to move to containers to the curb, because of age or health reasons. Containers may be knocked over by vandals, leaving garbage strewn every where, snow plows can hit/damage containers, snow thrown by snow plows can knock containers over.	8/13/2021 9:16 AM
933	I appreciate it but don't expect it if they pickup/return from structure. On non collection days, containers should be inconspicuous.	8/13/2021 9:06 AM
934	Commercial grade residential waste containers can withstand the wind better than those cans bought from a hardware store. Leaving can purchased at a big box store on the street may cause issues with blowing litter in the neighborhood.	8/13/2021 8:53 AM
935	Garbage cans in neighborhood have tipped over many many times causing garbage all over neighborhood. Messy. Garbage hauler refuses to get garbage if not at curbside. We have been out of town and garbage was not picked up for weeks. We get notes that we have to place it at curbside. I've called and they say I'm wrong and want to increase my fees if getting from structure to over \$144 a year! Please help us as citizens. Garbage service should not be so expensive and cause litter all over especially in the winter. Or if we are out of town we can't bring cans to the curb. Garbage will overflow. Keep the City of Sioux falls clean. We should not have to pay for a service that is required by city ordinance. Please stand up for the citizens of Sioux falls. Thanks so much.	8/13/2021 8:50 AM
936	It really isn't that big of a deal to put garbage cans near the curb to make it easier for haulers to pick up! It makes it easier for them to grab and easier to see so they don't miss you!	8/13/2021 8:43 AM
937	I am ok with having my garbage at the curb on collection day. The hauler I use brings my can back up, next to my garage, after they dump it. This allows me to know when I can return my can back into my garage. What I do not want is garbage cans placed all over, all the time. I hope we keep the rule that cans must be in an inconspicuous place on non-collection days.	8/13/2021 8:26 AM
938	I have always placed my trash container at the curb to make it easier for our collector to pick up our cans. I always thought it was just an act of service that they return your can to your	8/13/2021 8:15 AM

Garbage Container Placement and Collection Survey

	house.	
939	waste management has refused and has not collected my garbage when its not placed at the curb. Many times the garbage containers get blown over and litter and trash gets scattered all over property. Sometimes we go out of down on Fridays (our pick up date) and are unable to place cans at curbside, then garbage is not picked up.	8/13/2021 8:15 AM
940	Omaha has a very efficient process. Check it out! City operated not independent haulers.	8/13/2021 8:13 AM
941	I would like to limit the number of garbage hauling companies in my neighbor hood to 2-3 max. I have noticed that with all the 3-axle trucks driving through the residential neighborhoods, the road conditions are getting much worse. I believe fewer trucks would greatly increase road conditions and decrease future maintenance costs, as well as keeping our city looking beautiful.	8/13/2021 8:12 AM
942	I would prefer only 1 or 2 max garbage haulers be able to service a neighborhood to help prevent street damage. Garbage trucks I believe are one of the major reasons why our streets are damaged in my neighborhood.	8/13/2021 8:10 AM
943	I really like that the trash and recycling cans are out of the wind. Plus, with my travel schedule for work, I would be unable to retrieve my cans from the curb for a week if I didn't have a supportive neighbor.	8/13/2021 8:09 AM
944	It would be great if the city could get the companies to install a strap on the cans to avoid the wind blowing them open or over and spilling the trash everywhere while at the curb. This is my only concern on curbside pickup given our winds in this area. It is easily remedied with an integrated strap.	8/13/2021 8:06 AM
945	My driveway is not flat so in the wintertime I feel that it is safer for them to pick up at the curb.	8/13/2021 7:49 AM
946	Curbside has multiple negatives such as items you listed but also safety. When someone is gone, it will be much more noticeable if their cans are on the curb for a week rather than next to their house. its telling criminals that no one is home there.	8/13/2021 7:44 AM
947	Why doesn't the city do garbage collection. Other city's I have lived in it is a municipal service and done at a fraction of the cost. Plus it is uniform and consistent across the entire city. We shouldn't be paying a premium for an essential service. Has there ever been a cost analysis done to determine what it would cost homeowners if it was a city service. Ours system is a mess with all these fly by night pick up haulers, etc. If you are concerned about aesthetics look at all of the crappy truck driving throughout city trying to haul garbage. At least find one hauler and bid it out every seven years so they can recoup their investment in the event they aren't selected again.	8/13/2021 7:41 AM
948	All residences can't place bins in inconspicuous spaces around the house. This forces aims to make expensive changes to exterior components for little value. Forcing some to put garbage bins inside which can cause other issues (such as unwanted smells from hot garages, etc.)	8/13/2021 7:28 AM
949	Residents should be allowed to store containers on the outside of their garage next to the structure.	8/13/2021 7:22 AM
950	I don't see the purpose of this as it is for a few hours normally that my containers would be sitting curb side. And it is not an Eye sore if that is what your saying it is. Seems like a waste of my tax payer money to even be talking about this to be honest we have bigger issues to work on than this. Not sure who brought this up to make it an ordinance but waste of time and my money. Work on all the crappy looking streets we have in this town.	8/13/2021 7:08 AM
951	I've lived in several different locations and it makes no sense to me to have the hauler bring the trash to the curb and back up to the house. Every time I meet someone who moves to Sioux Falls and we discuss this topic, they always have the same opinion. It doesn't make sense, especially when you make it a city ordinance that garbage bins can't be placed on the curb on garbage day. Insane! I also find it dangerous in the winter time, thinking they have to walk up and down everyone's icy driveway. City is creating a lot of waste for garbage collection companies.	8/13/2021 6:51 AM
952	in the winter there are piles of snow that would make putting the containers curbside next to impossible, in the summer it would be possible but inconvenient.	8/13/2021 6:38 AM
953	When there is snow, placement at the curb makes the most sense.	8/13/2021 6:29 AM

Garbage Container Placement and Collection Survey

954	My tiny 94 year old Mother In Law lives alone in her home, weighs 85 lbs & uses a walker. She is unable to physically take her trash can to & from the curb. Waste Management "sometimes" will walk to get here cans but always will leave them at the curb. They want her to pay \$13.00 xtra for their valet service to retrieve & return cans. She lives on Social Security only. We have Novak which will do this at no charge but would have to indicate it on her pickup order. We will be switching her to Novak.	8/13/2021 6:12 AM
955	I dont think that haulers should be able to mandate that containers are placed curbside for pickup or charge extra fees if they are not placed curbside, but I dont think homeowners should be prohibited from placing them curbside as a courtesy either. The provider should then place them back near the structure.	8/13/2021 6:05 AM
956	Do not let garbage cans be stored in front of house or garage.	8/13/2021 5:58 AM
957	The haulers don't seem to know there is an ordinance and put nasty notes on the cans when I quit taking them curbside and didn't pick up trash that week. I put them curbside since then. Also, it's unreasonable for the city to make the cans be behind a barrier during collection day or any other time. I'm fortunate I'm mobile and able to move them!	8/12/2021 11:01 PM
958	A half full container seems to blow over every now and then if containers are close to street. Garbage personnel do not pick up garbage, garbage blow around neighborhood, not good. This didn't happen when companies returned containers back by house.	8/12/2021 10:55 PM
959	It's also more sanitary to keep the container at the curb as opposed to the side of a home, especially in Summer.	8/12/2021 10:44 PM
960	I like that if I forget to put my can on the curb they'll grab it, but we shouldn't get in trouble for taking it to the curb by the city. Now if someone leaves it out all the time like one of my neighbors, I think that shouldn't be allowed.	8/12/2021 10:33 PM
961	On my street (short street sandwiched between 2 roads) alone, there are 5 different garbage companies with collections on different days. Every day of the week there is a garbage truck and maybe a recycling truck driving on our street. Some go way too fast and there are many small children that live in our neighborhood.	8/12/2021 10:27 PM
962	I feel the curbside placement has simply been convenient to the hauler and customer.	8/12/2021 10:26 PM
963	We should go with a service plan that is the most efficient and effective while reducing impact on the environment.	8/12/2021 10:21 PM
964	There are a lot of people who are elderly and have some disabilities. Our garbage man is younger than we are.	8/12/2021 10:15 PM
965	Being handicap having to haul my trash cans to the curb is extremely hard for me.	8/12/2021 10:04 PM
966	Communication is key. Must communicate with customers about service changes or interruptions.	8/12/2021 9:39 PM
967	All garbage containers should be out of sight when not out for collection.	8/12/2021 9:35 PM
968	They should not be able to keep there garbage cans setting in front of there house. Why can't they put them alongside of there house or garage or better yet inside of the garage	8/12/2021 9:34 PM
969	I think seeing garbage containers in front of a house is absolutely disgusting. Let's NOT become THAT city!	8/12/2021 9:27 PM
970	Curbside collection makes sense	8/12/2021 9:25 PM
971	I think the haulers work hard and in no way hauling my garbage curbside really hurts me or my neighbors nor is it unsightly at all as long as garbage is enclosed in can.	8/12/2021 9:22 PM
972	I put my trash cans out in my driveway near the sideway. The trash guy puts it back near the middle of driveway when empty. If I forget to put it out they still grab it because I keep out next to the garage. Very good CS	8/12/2021 9:18 PM
973	Should go back to getting from structure not curbside.	8/12/2021 9:08 PM
974	Long ago there were Alley's to access trash from your back yard. Worse thing the city did was to close off 3/4 of thos alley,s	8/12/2021 8:59 PM
975	You need to start sending fines for those that keep their trash cans by the curb all week. It is	8/12/2021 8:49 PM

Garbage Container Placement and Collection Survey

going to be a mess once the snow starts falling if we allow people to keep the garbage cans out by the curb.

976	All neighborhoods and houses are different. There is no one best rule for every house, especially in older neighborhoods.	8/12/2021 8:44 PM
977	Not placing the container at the curb forces the driver to get out of the truck. Also, Sioux Falls landscape policy is overbearing for a free state.	8/12/2021 8:41 PM
978	Containers should be allowed to be placed curbside the evening before collection and should be removed by the evening the day of collection. Our townhomes association required our curbside placement after several of the individual collectors suffered shoulder injuries from dragging the containers over snow and ice or uneven driveway surfaces. I so appreciate that "my" collector brings my container up to the garage after collection from my driveway. Huge kudos to Josh and Ace Garbage	8/12/2021 8:38 PM
979	Nothing junks up a neighborhood like trash cans in sight sitting along the road. windy days have cans flipping with trash going all over neighboring yards, some people will just let their cans sit by the curb permanently. We shouldn't have to put up with it for the sake of the haulers. Tired of hearing the COVID excuse. I also think the haulers need to switch to smaller trucks as multiple trucks per day are ruining our residential street. Should be mandated smaller trucks similar to was Mayor Gary Hanson mandated years ago.	8/12/2021 8:35 PM
980	To much garbage blows around and some people wont pick up	8/12/2021 8:33 PM
981	I realize free enterprise is viable important, but having 4-5 different haulers come down my street on the same day seems like it would cause excessive wear and tear on streets which increases street maintenance and thus higher taxes.	8/12/2021 8:32 PM
982	A-OK Sanitary Service knows the right way to haul garbage. Ask them for advice.	8/12/2021 8:29 PM
983	Containers should not be left outside all the time as garbage is every where when wind blows it over. Tired of trucks up and down my street each day. All in neighborhood should be collected same day.	8/12/2021 8:27 PM
984	What is the big deal-put out your container on your collection day, and put it in a structure after it has been collected. Can't go wrong with that!	8/12/2021 8:22 PM
985	Cans at the curb seem to blow over during storms and make a mess of the neighborhood.	8/12/2021 8:16 PM
986	With so many garbage hauling companies, we have garbage by the street five days a week in our neighborhood and it looks terrible. It would be great if all garbage companies could pick up on the same day and garbage should be kept near the house.	8/12/2021 7:59 PM
987	A OK said they require containers to be brought down toward curb. They do bring them back to house	8/12/2021 7:52 PM
988	It is frustrating when they put the container back in the middle of your driveway and you have to get out of your car before you pull into the garage.	8/12/2021 7:47 PM
989	6 of my neighbors have the containers in the front of their home or garage which is an eye sore from the front Windows of my home. I think in meeting halfway I take it to the curb, they put back by my home, so it doesn't get blown into the street when empty. saves time and fuel and less chance of injuries to workers especially in adverse weather.	8/12/2021 7:46 PM
990	Limit one carrier/provider for less traffic on the road. Assign them a service area..	8/12/2021 7:39 PM
991	Trash is always blowing around. Requiring latched containers or placing indoors would help immensely. I always have to pick up others trash in my yard.	8/12/2021 7:38 PM
992	The number of haulers that cover a particular area is ridiculous. The amount of recycling that needs to be done to offset 5 different haulers covering one neighborhood (10 on recycling week) can not be achieved. not to mention the wear and tear on our streets. Break the town up and put it out to bid with the city standardizing the regulations.	8/12/2021 7:32 PM
993	Garbage collection should be by the curb if there is no alley. On that same day the owner of the residence should return the containers to the structure out of sight from the street.	8/12/2021 7:32 PM
994	there are to many houses in SF that putting in the backyard or side of the house would be very difficult for the homeowner and the garbage hauler. Keeping cans in front of the house by the	8/12/2021 7:31 PM

Garbage Container Placement and Collection Survey

garage should be more than acceptable. To many homeowners have boats, and campers etc that block up the drive way, plus half of the year weather is an issue, and the more haulers have to go up drives that are not cleared or full of cars makes its more difficult to retrieve cans. Its a liability, and allowing cans to be placed at the end of the drive way should be the least people can do to assist in a safer and quicker stop. the quicker stops means the garbage trucks can get off the road that much sooner.

995	Every other city that I have lived in has required residents to bring their bins to the curb and to return them and I never had an issue with that. It would also be nice to not have multiple garbage trucks driving through our neighborhood every day.	8/12/2021 7:31 PM
996	People should have to make sure on noncollection days that their garbage is secured and can't tip over.	8/12/2021 7:21 PM
997	If it isn't broke, don't fix it.	8/12/2021 7:16 PM
998	Have waste management. Used to pick cans up at top of driveway and place at top of driveway when done but no longer do. I don't think this is a Covid change. All the neighbors started doing it and now no garbages get hauled back up the driveways. Also, we have been told by WM to set the cans out the night prior so there is always garbage blowing around (thank you SD winds)	8/12/2021 7:05 PM
999	Containers should never be left out in front of structures when it is not trash day.	8/12/2021 6:50 PM
1000	some of these questions were not really relevant. Let the companies decide. Who cares where the garbage can is on the day of pick up?	8/12/2021 6:47 PM
1001	Make it as easy for us older folks as possible!	8/12/2021 6:32 PM
1002	Waste managements always picked up my garbage by my house, but when the pandemic hit they wanted it on the street.	8/12/2021 6:30 PM
1003	I am tired of garbage trucks in the neighborhood everyday; I am tired of blown over containers with the resulting mess in the neighborhood; and I dislike that the containers are so often front of the house decoration.	8/12/2021 6:26 PM
1004	Single day a week pick-up works	8/12/2021 6:16 PM
1005	Handicapped so helps when I don't have to take containers so far from structure. Our hauler returns to where placed-before pandemic	8/12/2021 6:15 PM
1006	The garbage containers are generally in our neighborhood place by the curb late in the evening and pickup early in the morning. It is a non-issue.	8/12/2021 6:11 PM
1007	Too many garbage haulers licensed. Garbage trucks driving up and down the street all the time. Competition has made neighborhood and streets more dangerous, more noisy and less desirable	8/12/2021 6:05 PM
1008	I have no problem putting my containers at the edge of the driveway the night before pickup. I don't think it's an eyesore at all. But I want them returned to the house after collection. My biggest pet peeve is that the containers are light enough that on windy days, they blow around and sometimes into the neighbor's yard after being emptied regardless of where they are placed after collection.	8/12/2021 6:05 PM
1009	No	8/12/2021 6:04 PM
1010	this is absolutely ridiculous. It would be safer and more efficient for my containers to be curbside permanently. I don't enjoy people walking on my property and I want to make it easier and more efficient for the garbage hauler	8/12/2021 5:56 PM
1011	I feel that the garbage haulers are very busy and shouldn't have to retrieve our garbage so far away. Especially because we still have COVID situations. My garbage haulers always bring the cans all the way back to my house. I don't feel that it is a problem to see garbage cans curbside for one day. My neighbors are very kind and have their garbage cans neatly by the curb when necessary.	8/12/2021 5:52 PM
1012	My life of crime began in 2013 when I purchased a home in southwest Sioux Falls. Once a week, I placed my garbage cans on the curbside, brazenly thumbing my nose at the local authorities. Until one day I went too far and placed the garbage too close to my neighbor's yard. I regret the loss of my left ring finger, but not my efforts to help out the garbage man. All a joke	8/12/2021 5:46 PM

Garbage Container Placement and Collection Survey

of course. I never knew about curbside guidelines until the city started allowing placement on curbs during the pandemic. I had always done this, not knowing the rules. I only placed it the night before or morning of delivery, and put the cans back in the garage when I got home. I never left them out for longer than that. I also didn't realize this rule changed in April, so I have once again been living in sin since then. FYI, I'm fairly certain a large proportion of the city doesn't know about these rules. I guess I don't want to see garbage cans in every yard all the time, but I feel what I do is a reasonable compromise - helping out the garbage folks while not creating an eyesore. Would it be possible to both allow people to place garbage cans on the curbside, but make it illegal for them to sit there more than 2-3 days? I doubt many people would break this rule, but if there were some repeat offenders out there neighbors would have some recourse with the city to get them to hide their cans.

1013	I don't have the funds to build a structure to "hide" my garbage cans. I also don't want them in the garage, as garbage can stink. There's NO reason that cans cannot be left by the house during the week and at the curb on collection day. Why is it such a secret that we have garbage? Ridiculous. Make this an ordinance in the upper-end neighborhoods, not my crappy neighborhood.	8/12/2021 5:43 PM
1014	I do not take my cans to the curb but do take them halfway down my driveway. My hauler generally returns my can close to my garage. When cans are placed curbside, empty or full, it is too easy for wind to blow them over. There is a house in my neighborhood & several on my way to work that put the cans in the street. This has been a practice since prior to COVID and the haulers have not informed the residents of the ordinance.	8/12/2021 5:42 PM
1015	I will be charged more for them to pick up and return to the house. \$15 more per month. I think this is another example of covid being an excuse to charge more for services that were free prior to covid.	8/12/2021 5:39 PM
1016	Container should be stored where wind will not blow contents out of container	8/12/2021 5:39 PM
1017	Garbage containers left on side walks are annoying . CARS parked on sidewalks are exponentially more annoying	8/12/2021 5:36 PM
1018	It is very annoying and wasteful to have multiple garbage trucks go through neighborhoods 6 days a week. Get everyone in neighborhood on same hauler on same day. Will be much more efficient than trucks running over same route multiple times a day picking up every 3rd house.	8/12/2021 5:31 PM
1019	Just wanted to repeat: Allowing the hauler to establish different levels of collection service with different rates associated with each level of service	8/12/2021 5:29 PM
1020	The current ordinance does not have any means to deal with houses that only have the option of either A) placing their containers in front of their house, or B) placing them inside their garage. The past and current location location I live at is on a corner lot and there isn't a way to conspicuously hide the containers yet keep them easily accessible for the collector. Luckily, I have yet to receive any flack from the city on having my containers in front of the garage so my assumption is this ordinance has some wiggle room on enforcement.	8/12/2021 5:28 PM
1021	Allow curb side placement	8/12/2021 5:24 PM
1022	I knew they could no longer be placed at the curb, so I didn't but my hauler left me a note saying I needed to place it at the curb. This was the beginning of Aug 2021.	8/12/2021 5:23 PM
1023	The last thing this city needs are streets full of tipped over garbage cans after a storm	8/12/2021 5:17 PM
1024	I don't know if the containers need to go curbside but at least to the end of the driveway for worker convenience. Sometimes they can weigh a ton and that could risk injury. I do however think they can take the empty can back but I'm ok either way If we go to curb side, there has to be flexibility if people forget or are gone on vacation.	8/12/2021 5:17 PM
1025	All of my neighbors have the garbage cans located in the same place against the front of the garage.	8/12/2021 5:12 PM
1026	I strongly believe city should contract for collection services by area like other communities do. All residents need the service and it's ridiculous to have so many different providers driving through the same neighborhood!	8/12/2021 5:10 PM
1027	We often have to strategically place our cans alongside our house on garbage day due to the wind. If cans have to be at the curb, we will have garbage blown all over the neighborhood from tipped-over garbage cans.	8/12/2021 5:03 PM

Garbage Container Placement and Collection Survey

1028	Everyone has garbage to be thrown out, as long as it isn't piling up everywhere and not be collected by a hauler, garbage cans should be able to be placed in an easy to access area. Even if it's in the driveway up by the garage, so be it.	8/12/2021 5:01 PM
1029	In older neighborhoods there is less space to maneuver and store cans. I prefer to set them out on the curb so the hauler does not have to navigate the steep driveway with parked cars and little spare room.	8/12/2021 5:00 PM
1030	It really does not matter to me if I or the hauler gets/puts back the bins. However if the cost of my collection remains the same (somewhat expensive in my opinion) then I will expect the haulers to retrieve and put back the bins as that is a service I am paying for. If the cost of collection were to go down, then I am happy to bring the containers to the curb and put them back after. I would love it if all of the collection were the same day on my street as the trucks several times a week are a bit noisy. It also seems like it would be much more efficient.	8/12/2021 4:50 PM
1031	I have alley access service	8/12/2021 4:49 PM
1032	I don't believe that garbage containers need to stay on the curb at all times, but I believe they can be placed at the curb on collection days for ease and safety reasons for the garbage haulers. We all have garbage cans. We do not need to get upset if we see them from time to time.	8/12/2021 4:43 PM
1033	I don't believe it is about a labor shortage. The haulers must obviously be lobbying the city council again to allow curb side pick up; I think that it looks terrible. Especially since they never pick up on the same day. The last time they wanted special treatment to allow the use of overweight trucks. I don't think this is about labor shortage at all but more about the bottom line which is obvious by question 10. And they are using this as an opening. Also, the drivers get route pay; that is why they are always driving too fast and running to get off early. They are also telling people to bring their cans out on pickup day.	8/12/2021 4:28 PM
1034	I KEEP MY CONTAINERS IN MY LOKCED GARAGE, AND SET THEM OUTSIDE (NEXT TO THE DOOR) ON COLLECTION DAY, AND PUT THEM BACK IN THE GARAGE AFTER TRASH IS COLLECTED. THAT IS HOW ALL OUR NEIGHBOOD HANDLES TRASH DAY. I DON'T WANT MY HAULER HAVING ACCESS TO MY GARAGE, BUT I DON'T WANT THE CANS DOWN BY THE STREET BECAUSE MANY DAYS ARE WINDY AND NO ONE WANTS TRASH CANS TIPPING AND BLOWING TRASH ALL AROUND.	8/12/2021 4:26 PM
1035	The town looks like shit with trash cans strewn about everywhere.	8/12/2021 4:23 PM
1036	I don't think garbage should be retrieved from inside the structure. The ordinance should be written to allow the customer to place the garbage in an acceptable location next to the structure that is also accessible to the hauler. Screening may or may not be required based on the type of structure, property and the location of the garbage.	8/12/2021 4:23 PM
1037	Same garbage service in neighborhood not tons a of trucks on same streets/neighborhoods	8/12/2021 4:22 PM
1038	I don't understand that "inconspicuous" part of the ordinance. So it's not OK for my cans to be in front of my house? Where else are they supposed to go then?	8/12/2021 4:17 PM
1039	Recycling should be picked up each week not just every other week.	8/12/2021 4:14 PM
1040	My 80 year old neighbor has a sloped driveway. She raises her garage door and puts the bins just outside. If she had to wheel them down to the curb and back a again it would be a hardship on her. Watching a hauler get it from the curb versus by the house seems like a negligible amount of time saved for the convenience to the home owner - plus it looks better and less chance of blowing over in the wind. If every hauler had the trucks that grab the can and dump it automatically I could maybe see allowing some curbside as an option only.	8/12/2021 4:14 PM
1041	Without seeing some kind of data on whether or not time was saved, which in turn saved money for companies/customers, during curb pickup, I do not think it's unreasonable to have the collectors retrieve the garbage bins closer to the structures. It helps to have bins closer to structures during high winds so that they don't tip over and release garbage all over the neighborhood. Citizens should NOT need to pay more to have their bins collected if they aren't by the curb.	8/12/2021 4:14 PM
1042	It is difficult if not impossible for the elderly to take their containers to the curb for pickup and then bring them back to be placed by their home	8/12/2021 4:13 PM
1043	No, garbage containers should not be left curbside or near street on driveway beyond a day or	8/12/2021 4:13 PM

Garbage Container Placement and Collection Survey

so before/after pickup. Yes, the hauler and customer should be allowed to set garbage streetside if they choose. My garbage pickup is around 6 a.m. It is often dark at that time, and in winter the conditions may be slippery. I will sometimes put my garbage close to the street or at edge of my driveway because of slippery surfaces, or because the container(s) is quite full, quite heavy, or because there are additional trash bags beyond what will fit in the container.

1044	It is safer and more efficient to place the garbage and recycling bins by the curb. Then pick up won't be missed.	8/12/2021 4:12 PM
1045	Being a garbage hauler is hard enough, if it makes it easy on them for us to bring to curb, then what does it hurt. I will return my cans to my spot when I return home at the end of the day. It's just a garbage can, all the containers look decent now days anyways.	8/12/2021 4:11 PM
1046	Our HOA chose a garbage hauler from Brandon. They have a smaller truck and don't break up our street.	8/12/2021 4:10 PM
1047	Allow people to put recyclables in plastic garbage bags. Doing this would reduce the amount of pollution because loose garbage is less likely to fall out.	8/12/2021 4:09 PM
1048	no	8/12/2021 4:05 PM
1049	Curb side is the way it should be and have been.	8/12/2021 4:04 PM
1050	Please go back to what we had before Covid-19. I am tired of picking my neighbors trash out of my yard when wind blows full or semi empty cans over. It also looks better for our community as well-neater-if the cans are put back where they belong.	8/12/2021 4:04 PM
1051	In my neighborhood, people are very confused about what to do with their garbage containers, and most people are still rolling them out to the curb.	8/12/2021 4:03 PM
1052	In my opinion, there is no problem with our garbage cans being placed for curbside pickup the evening before or the morning of our garbage hauler arriving for pick-up. Our neighborhood has adjusted appropriately to this and there have not been any considerable issues.	8/12/2021 4:03 PM
1053	age and health do not always allow for ability to move and retrieve containers.	8/12/2021 4:02 PM
1054	I wish the city controlled garbage services and pre-negotiated pricing. It would make way more sense for my neighborhood to all be collected on the same day and the city just assigns sections of the city to haulers. This is what my previous city did and it seemed to make more sense plus it allows the haulers to price accordingly since they aren't driving everywhere in the city anymore.	8/12/2021 4:02 PM
1055	I like ability to put containers curbside, so I remember to put them out.	8/12/2021 4:01 PM
1056	Everyone in my area (W 16th between Western and Kiwanis) everyone puts the receptacles at the curb.	8/12/2021 4:01 PM
1057	Hauling trash cans to the curb is difficult for the elderly and those with other health issues, especially in the winter months when it's icy.	8/12/2021 2:46 PM
1058	Garbage containers are on wheels. It's easy to place them curbside on collection day and then return the empty container back into garage. Keep curbside collection!	8/12/2021 2:05 PM
1059	I don't necessarily think garbage should be curbside but placing your garbage containers closer to the street is being considerate to your hauler.	8/12/2021 1:43 PM
1060	Current fees were based on hauler costs associated with full service (collecting containers from and returning them to the structure). I would be fine with haulers offering a discount for customers who consistently bring their garbage to the curb, but should still be required to collect it regardless of whether it is at the curb or not. E.g. the customer could be charged a base fee and if they opt not to bring their garbage to the curb, they could pay a couple dollars more on their bill each month (which they're already paying). If residents are to be required to bring their garbage to the curb, haulers should be required to reduce rates corresponding to the savings they'd gain.	8/12/2021 1:17 PM
1061	I don't always have room in my garage to store my large containers, especially in winter when both cars parked inside. And with snow it is not easy to place the containers along side of house to avoid being seen from street. Or sometimes by end of week the garbage is simply too stinky don't want the container inside the garage. I appreciate the overall goal of keeping the views from street nice, but sometimes it's just practical. Having said that, I strive to keep	8/12/2021 12:52 PM

Garbage Container Placement and Collection Survey

them inside the garage as much as possible as I think it does look better. Maybe "encourage" as opposed to "require".

1062	We moved here from WA and I was shocked to hear that collectors walked up to the structure to collect the bins. I think it's silly that this is even a big debate. It takes 2 mins to roll my bins to end of the driveway and roll them back after pick-up. I just don't understand the issue. I appreciate the service and the work the collector's do! One of the many jobs that don't get enough credit so Thank you!	8/12/2021 12:20 PM
1063	Hauler needs to confirm that the bins are out of the driveway and in a safe place after they are empty	8/12/2021 12:16 PM
1064	I think residents should be able to make the decision as to whether they would like to place their garbage bins next to their residence or bring it to the curbside. However, I do not think it is reasonable for the hauler to charge different fees based on whether the hauler has to retrieve the waste containers from the residence or curbside.	8/12/2021 11:46 AM
1065	It takes very little time for us to roll to curb while we are out and about, and it makes the collection process much more efficient. Helps me keep a bit more active too since I have a desk job.	8/12/2021 11:38 AM
1066	It is efficient and saving to place container at or close to curbside on collection day.	8/12/2021 11:23 AM
1067	I prefer not to mandate containers be placed curbside, but have it outside the garage, etc. If I'm not home the day of pickup, then it would get missed. Also for older or physically impaired people, it is difficult to haul full contao all the way to curb.	8/12/2021 10:57 AM
1068	With construction on my street, it was difficult to bring garbage down the block. I switched to a company who would come to my house.	8/12/2021 10:55 AM
1069	I am okay with seeing containers at the roadside as long as all of the trash is inside the container. I don't think containers should be prohibited from being set by the curb. I think it is more convenient for the trash hauler. I prefer to put my container right in front of my garage and have the hauler collect them and return them to that location. I don't have a location outside of my garage where I can store the containers that is out of view of the street and still accessible to the trash hauler.	8/12/2021 10:55 AM
1070	Allow curbside pickup to help ensure safety and ease of pickup for the haulers. There are much bigger areas to focus on.	8/12/2021 10:21 AM
1071	If garbage container is placed curbside on a snowy day the plowers either go around it and leave snow piled there or have to move the garbage container. Secondly, advanced age people, such as an 80-year-old, find it difficult and hazardous on an icy snowy sidewalk during the winter to take the container to the end of the driveway. Having said the reasons we'd like to keep from taking the containers to the curb, we do want to say "a Great Big Thank you"to the haulers for their hard work and excellent service!!!	8/12/2021 10:19 AM
1072	The worst part about this is asking the home owner to do the right thing. In todays climate, that just doesn't happen anymore. I try to bring my garbage to the curb in the morning before the crew arrives, but there are times where they beat me to it. I bring the can to the curb to be nice because our driveway has an incline and I don't want them to slip in the winter. I have no opinion on container placement, as it won't change what I do. To be honest, I didn't know there was an ordinance on placement to begin with. Regardless of the refuse hauler, I would continue doing what I do as a courtesy to the crews.	8/12/2021 10:14 AM
1073	While I am able to move the containers, my older neighbors are not able to do so as well. Also, if my neighbor tra h i at the curb and blow over in the SD wind I am going to be the one that has to pick up the trash that has blown into my yard. Keep the City clean. Curb appeal of a neighborhood matters.	8/12/2021 10:08 AM
1074	If it goes up anymore we will switch wind to strong in our area to take curbside	8/12/2021 10:05 AM
1075	Placing containers at the curb is a safer option for haulers. In particular, wintry ice and snow on driveways can create slip hazards with potential injuries.	8/12/2021 9:54 AM
1076	Hauler should make sure container is not placed in the driveway in a way that would prohibit a homeowner from parking my vehicle on my property, i.e. in front of garage doors	8/12/2021 9:46 AM
1077	Taking our containers to the curb makes sense.	8/12/2021 9:45 AM

Garbage Container Placement and Collection Survey

1078	No,we have had your company for almost 56 years. So obviously we like the services you provide.	8/12/2021 9:34 AM
1079	I moved to sioux falls from Denver and on trash days the streets would be lined with cans and trash it takes just one can to be knocked off to make a huge mess I loved that Sioux falls didn't have these issues	8/12/2021 9:27 AM
1080	Our garbage guy is awesome!!	8/12/2021 9:17 AM
1081	Hauler safety is most important.	8/12/2021 9:17 AM
1082	Containers being curbside is more convenient for haulers	8/12/2021 9:16 AM
1083	We need to auction city blocks by hauler instead of having 50 something garbage haulers in the city all traveling down the same neighborhood streets. Better roads, better environmental impact, better efficiency (and, hypothetically, rates).	8/12/2021 9:16 AM
1084	I remember about a decade or so ago the city made an effort to keep all neighborhood garbage collection on the same day to reduce wear and tear on the streets. Obviously, that isn't enforced or was straight up forgotten. Depending on the hauler, my neighborhood sees garbage trucks at least two days a week.	8/12/2021 9:14 AM
1085	No	8/12/2021 9:10 AM
1086	I feel it is a courtesy to the hauler to have the garbage at the curb for collection therefore in return the hauler shows courtesy to the home owner by returning the can up to the home. That way when it is windy outside the can isn't in the street.	8/12/2021 9:01 AM
1087	We have always had Novak and have always had great service	8/12/2021 8:54 AM
1088	We are part of an HOA. Thus what is charged and done is part of our contract and its good. Being older we appreciate the drivers hailing to and from espec in winter.	8/12/2021 8:51 AM
1089	Our HOA told us where to place the garbage containers. I would be happy to place where best for everyone. Thank you, you all do a great job.	8/12/2021 8:51 AM
1090	This survey assumes that you own a home or a business and that you get to choose who your hauler is instead of many of us who live in apartment buildings that have no say in this matter. Additionally, this survey also forced me to choose no opinion on many questions, not because I didn't have an opinion, but because the answer choices were so limited. It is my opinion that rather than the sole decision being up to the hauler or the property owner, it should be whatever makes the most sense for the location to fulfill the services in a safe and timely manner while also being as little of an eyecore as possible.	8/12/2021 8:50 AM
1091	A rule restricting garbage cans from being by the curb is the dumbest rule ever. Why you would even think of going back to it is beyond me.	8/12/2021 8:49 AM
1092	I have never lived anywhere where we didn't put our containers at the curb on collection day. We have been doing that since we moved to town. Didn't know we were not supposed to do it. lur neighbors all put their's out as well.	8/12/2021 8:48 AM
1093	Since I live in an association, my service is selected by management.	8/12/2021 8:47 AM
1094	Curbside works buut maybe they could place empty container at house?	8/12/2021 8:46 AM
1095	Since i have a very narrow driveway, i do not like when i have to place the garbage containers near the curb (potentially blocks my driveway). It is also a hassle during winter.. In addition, it is a lot more protected from the elements (wind) when I place the containers near my garage.	8/12/2021 8:43 AM
1096	This kind of constant discussion is a waste (no pun intended) of time. The City of Sioux Falls is always striving to find efficiencies in their daily operations, and I think it is necessary for their ordinances to do the same for the businesses that provide services to their residents.	8/12/2021 8:42 AM
1097	I think that curbside placement ON COLLECTION DAY should be allowed by the City and should be a decision made between the hauler and the customer.	8/12/2021 8:39 AM
1098	The company I use A-Ok Sanitation is far and away the best company in the city for fees and for customer service and it's not even close.	8/12/2021 8:35 AM
1099	I live in mobil home court & we have no choice who the carrier is. They decide as it is part of our lot rent. That is why II chose recommended from someone else. It wasn't recommended,	8/12/2021 8:33 AM

Garbage Container Placement and Collection Survey

simply advised that is who would be collecting our garbage

1100	My HOA has my provider.	8/12/2021 8:25 AM
1101	Considered elder customers, Any customer out of town could ask for retriever containers in and out.	8/12/2021 8:25 AM
1102	No	8/12/2021 8:22 AM
1103	The city should require a uniformed size for waste receptacles. Residents should be required to conceal receptacles on all days except for collection days. On collection days the receptacles should be placed at the end of the driveway and that should be returned near to the structure after it has been collected, homeowners should then return to concealing receptacles until the next collection.	8/12/2021 8:22 AM
1104	More efficient & safe for haulers to collect curbside.	8/12/2021 8:17 AM
1105	The safety of those providing this necessary service is paramount to the continuation of low cost efficient service.	8/12/2021 8:17 AM
1106	There's no reason to not allow a can to be at the curb on the day of collection.	8/12/2021 8:16 AM
1107	I could see retrieval from the structure as a more premium service if people want it and the structure allows for it.	8/12/2021 8:15 AM
1108	Our collection guys are so great!	8/12/2021 8:15 AM
1109	I think all containers when its not pick up day should be placed in garage if room. If garage is not big enough or no garage container should be placed side of house out of site. I think having garbage cans standing out front looks tacky.	8/12/2021 8:14 AM
1110	It is sometimes difficult for seniors to bring container to the curb, especially in the winter. When it is slippery it can be dangerous. Wind in SD can move containers and even topple them over. I'm sure my neighbors don't want my garbage in their yard.	8/12/2021 8:14 AM
1111	Make sure collector DOES NOT return empty container in a manner the blocks customer driveway!!	8/12/2021 8:13 AM
1112	The only thing that is bothersome to me is when it's windy and they blow over causing garbage to go everywhere.	8/12/2021 8:13 AM
1113	Thank you for your hard work.	8/12/2021 8:12 AM
1114	Containers should still be placed out of sight from the street, but folks ought to be responsible for taking their containers to the curb. Some folks aren't able to move their container in which case special arrangements could be made. I lived in NYC where people just throw their trash bags in enormous piles on the curb on collection day. SF will never be as bad as that!	8/12/2021 8:11 AM
1115	I would say curbside placement should be on a case by case basis because myself I am able to retrieve my cans but some aren't able to do so. And the other issues with curbside is on windy days the cans can tip over and cause a hazard for those driving down the street if the cans go in the road, empty and full ones.	8/12/2021 8:10 AM
1116	I like my garbage kept in mygarage, and putting it back as soon as I can. I can put it out any place you want. Leaving it over night curbside if a storm comes (wind) makes me concerned. Don't want garbage to pick up.	8/12/2021 8:10 AM
1117	This isn't something out government needs to decide. You aren't the service provider.	8/12/2021 8:09 AM
1118	It is pure laziness that people will not bring their containers to the curb. Get right with yourself.	8/12/2021 8:08 AM
1119	It is absolutely not feasible for every home to be able to place their garbage cans at the curb. For instance I live at an HOA property. We do not have city boulevards as we live on a private drive. We share very small driveways with our neighbor. Nobody in my community is able to put garbage cans out to the curb or we wouldn't even be able to back out of our driveways, there's no room. Hence why nobody does it to this day. We can't. Also, think of the elderly, the disabled, the people who work overnights (like myself) who can't get the garbage can to the curb at 7am when the garbage haulers arrive because we work until mid-morning.	8/12/2021 8:08 AM
1120	Having the garbage can close to the street has made it so much easier for Novak. They are able to pick up garbage in our development (townhouses) so much faster.	8/12/2021 8:07 AM

Garbage Container Placement and Collection Survey

1121	Curbside only on collection day and then must be returned to an inconspicuous place	8/12/2021 8:05 AM
1122	Your service is expensive. I would not stay with Novak if I had to haul out my containers and out them away every day.	8/12/2021 8:05 AM
1123	Not sure why placing your containers curbside is such a big issue. Being a retired military person I have lived in many different places, placing containers curbside is the norm in most cities.	8/12/2021 8:05 AM
1124	I know I will forget to put my cans out and get skipped if the rule changes. And I doubt very much that my rates would go down if the rule changes.	8/12/2021 8:05 AM
1125	All garbage collection companies should pick up garbage on our street on the same day in order to minimize the truck traffic on multiple days	8/12/2021 8:05 AM
1126	Novak sanitary was amazing and the hauler would knock on our door if we didn't have our garbage can out of our garage which was very helpful so we didn't miss a day. We also had a text message system set up that notified us the evening prior to garbage pickup which was a helpful reminder to get the cans out to the curb	8/12/2021 8:05 AM
1127	Being elderly, it can be a struggle to take the garbage and recycling containers to the curb. Also, I have seen containers blown over on very windy days. I have someone clean snow off my driveway in the winter. It is not clean at 6 am when I have to take out the containers. It is hard for me to get the containers to the curb with the snow on the ground. Thanks for the survey.	8/12/2021 8:05 AM
1128	Novak does an excellent job!	8/12/2021 8:03 AM
1129	We currently live in a HOA neighborhood and I feel like they never relay garbage "rules" to us so it would be nice to receive updates directly from companies to ensure the safety for all.	8/12/2021 8:03 AM
1130	We have no objection to curbside placement of containers on collection day.	8/12/2021 8:03 AM
1131	When it was allowed to be curbside, the haulers blocked my driveway instead of putting it off to the side.	8/12/2021 8:03 AM
1132	I'm tired of having to pick up garbage that has blown out of others garbage cans. People put the cans at the curb and leave them for weeks. It looks tacky.	8/12/2021 5:52 AM
1133	It falls on us the customer to make sure our can is out and to bring it back in after it is picked but will be safer since trucks won't spend as much time on the streets which can be a safety issue for those on the road and the driver themselves	8/12/2021 5:24 AM
1134	I have seen neighbors that don't bag garbage (containers blow open and items blow out), place at curbside (Novak) for Friday am pickup and then leave for the weekend and the containers sit there the entire weekend and sometimes into the following week.	8/11/2021 5:55 PM
1135	the haulers should not have to get out of their trucks as that can pose a safety issue, with cars driving or speeding by and the driver accidentally takes a step back and bam now they are struck by a car! it should be the residents responsibility to make sure their container is out and ready for collection on their collection day. my reason for this is that if you didn't have any trash that week because you were on vacation, your hauler shouldn't waste their time walking to get an empty container.	8/11/2021 4:23 PM
1136	I don't want someone coming up my driveway where I have parked cars, my dog and kids playing.	8/11/2021 1:14 PM
1137	I use to take my wife to the mayo clinic and they had city garbage with cans at the curb. garbage cans everywhere with garbage cans tipped over garbage blowing around with home owners having to pick it up. Curb side is a bad bad idea and we can not be held hostage by garbage haulers.	8/11/2021 8:53 AM
1138	This survey is garbage. You are looking for a problem that does not exist. I take my cans out the night before which works great, but it is never reported and literally impossible to enforce. Stop bowing to larger out of state companies like Novak - they sold out years ago.	8/10/2021 10:08 PM
1139	Cans should be on the curb so garbage trucks are sitting on busy streets longer while they walk up and down driveways.	8/10/2021 4:18 PM
1140	Why is this an issue garbage haulers have always retrieved the containers at the residences. I	8/10/2021 3:45 PM

Garbage Container Placement and Collection Survey

	have grown up in Sioux Falls and seems this can by the curb issue has been created for what reason I dont know.	
1141	I have noticed some people place their garbage cans in the street, this should be prohibited.	8/10/2021 2:53 PM
1142	I don't mind the containers on the curb day of collection, with the goal of neighborhoods having the same collection day for all haulers. We have 3 days of cans on curbs.	8/10/2021 2:16 PM
1143	municipal garbage so we don't have 7 different haulers on the same street several times a day. Those trucks are heavy and no need to have them go down the street multiple times a day.	8/10/2021 2:15 PM
1144	I think that the communication regarding the placement of containers could be much more effective. I suggest stickers placed by haulers on containers.	8/10/2021 2:08 PM
1145	I would advocate for haulers to still retrieve from the side of the house or someone does not have it at the curb. People may be elderly, hurt, sick, on vacation, or simply forgot to place it at the curb. Not picking it up would cause issues for them and the neighborhood if bags of trash accumulate because the container is full.	8/10/2021 11:50 AM
1146	I am tired of seeing 3-4 garbage trucks running up and down our streets to pick up garbage. All of our neighborhood streets are falling apart due to these heavy trucks running up and down them several times a week. Neighborhoods should be separated into blocks and then the haulers can bid o each section of town.	8/10/2021 11:44 AM
1147	When we are forced to put garbage and recyclables at the curb any sort of wind knocks our recyclables over and they end up scattered all over the neighborhood. I've had to walk the neighborhood and into neighbors backyards to retrieve recyclables due to curb placement multiple times. It's very annoying. If we could leave them by our house protected by wind that would be ideal.	8/10/2021 11:26 AM
1148	I do not think it should be mandatory. If you want to place it down at the curb, go for it. But it shall be returned how it was received. If you place it at the curb, expect it to stay at the curb when emptied. Etc. I do not think it should cost anymore than it does.	8/10/2021 11:03 AM
1149	due to our winters and people not doing snow removal properly the customer should be placing containers curb side for the safety of our haulers	8/10/2021 10:53 AM
1150	Would LOVE for our neighborhood to get together and use same hauler. We live on the corner of a cul de sac. It seems like every house just even on our cul de sac must use a different hauler and unfortunately since we are at the entrance, we hear every single one of them! Would also cut down on traffic and street wear/tear from the big trucks, also safer for children playing in/around/near the cul de sac	8/10/2021 10:40 AM
1151	I have heard that recycled items are not actually recycled but are simply taken to the landfill with the rest of the garbage. Is this true?	8/10/2021 10:39 AM
1152	I don't think that it should be an ordinance violation to put the cans curbside as a courtesy to the garbage company employees but I don't think the garbage company should be able to deny services if you forget to put it curbside.	8/10/2021 10:37 AM
1153	In favor of curbside but on some windy or snowy days there needs to be some flexibility in the ordinance that allows for near structure pickup too. I live on an emergency snow route and the containers may be a challenge if placed curbside. Curbside may also imply that they are placed in the street by the curb. There needs to be some clarification on this once a plan is decided.	8/10/2021 10:31 AM
1154	none	8/10/2021 9:23 AM
1155	I don't mind bringing my waste container to the curb, but it is nice to have the hauler bring the waste container up to my home after it is empty.	8/10/2021 7:24 AM
1156	Think haulers should compete fairly and openly and placement of cans is one of those market differentiators.	8/10/2021 6:34 AM
1157	People have gone through our trash when it was at the curbside. Wind frequently blew recycling items out. Very displeased with that.	8/9/2021 8:29 PM
1158	Not sure why this is an issue all of the sudden. Ordinance says what to do and it's been that way for a long time. Now after covid it's an issue. If this is about haulers getting spoiled during the temporary ordinance I couldn't care less about that. The 7 years I've lived here my hauler	8/9/2021 7:05 PM

Garbage Container Placement and Collection Survey

has picked up my garbage from the house and brought it back. I really don't care either way, what the ordinance is, but don't let haulers use the "cost savings" argument because I guarantee no matter how much you help them our prices are not coming down.

1159	What takes me seconds in time can save the hauler hours and money	8/9/2021 5:48 PM
1160	Maybe the city should look into it's own garbage collection to be more environmentally friendly. I see dozens of garbage trucks all week long and not only from a fuel or manpower level but a wear and tear on roads this seems like something we should really consider.	8/9/2021 2:51 PM
1161	Curbside standard with the option of valet for set price.	8/9/2021 1:47 PM
1162	Doesn't it seem wasteful that multiple garbage haulers drive the same streets every day? With so many companies there are many trucks on our street multiple days of the week. what is the point of hiding your garbage cans when your neighbor is having theirs picked up? There are too many haulers in this town.	8/9/2021 1:29 PM
1163	Only providers that follow the law are local firms. The out of state firms do as they please without regard to the city ordinance.	8/9/2021 12:47 PM
1164	Placing along the curb last year resulted in much more trash being blown around the neighborhood on windy days. It was common in winter months for garbage and recycling containers to have lids blown open, and sometimes bins tipped over, which resulted in significant amounts of trash in the streets and neighborhoods.	8/9/2021 11:57 AM
1165	Our hauler has informed us that their insurance only allows them to retrieve garbage cans that are at the curb or in the driveway. Anywhere else, they cannot retrieve, so behind a structure, etc. would not allow them to retrieve. Also, it's a courtesy to put cans out on trash day and put them back the remainder of the time.	8/9/2021 11:44 AM
1166	When the haulers required containers to be curbside during covid, our containers were picked through twice that we know of. I think it is a safety issue in addition to the mess that happens because it is always windy here. Placing the containers next to the home helps prevent them from blowing over.	8/9/2021 11:15 AM
1167	I don't want to have to think about my trash getting to the curb. Its one more thing I need to keep track of and I would hope the garbage service would be willing to serve the customer in this way.	8/9/2021 9:59 AM
1168	I agree with keeping garbage containers out of the way for aesthetic reasons, but having a garbage collection day where garbage cans are curbside is fine by me. Also, different collection days for different areas of town is fine.	8/9/2021 9:41 AM
1169	I moved here from a city where you could leave your cans on the curb, i thought it was great when i lived there. Now that i live here and i see how much cleaner the area looks with the cans on the side of my home, i am much happier and don't want to go back to cans at the curb, in the road, looks like crap.	8/9/2021 9:26 AM
1170	The less the hauler has to come up and down my driveway the lower the chance of a slip and fall on my property, thus reducing workers compensation and personal liability claims.	8/9/2021 7:23 AM
1171	I prefer residents store their containers out of site (from both front and sides of property, such as inside a garage or enclosed in a fence) with exception of garbage collection day (starting night before collection day if puck-up time is early). Containers should be returned to out of site location as soon as reasonably practical.	8/8/2021 11:54 PM
1172	I think they should put the can back where they got it. If it's windy they should always put the can close by the house so it doesn't blow away.	8/8/2021 7:47 PM
1173	Curb placement would allow the garbage haulers to utilize the hydraulic arm to lift and empty containers improving efficiency and shortening the time each truck would be idling in each neighborhood. Make it each homeowners responsibility to bring out the containers on delivery day and then return them to the structure. Have an ordinance in effect not allowing to leave containers curbside longer than the day of pickup.	8/8/2021 6:56 PM
1174	In speaking to people I know in different neighborhoods, few were aware of this. Let the haulers decide. IF there are issues with blowing trash, then cite the homeowner.	8/8/2021 5:41 PM
1175	Would really like to see 1 hauler per part of town or at least each neighborhood having Same collection day.	8/8/2021 2:55 PM

Garbage Container Placement and Collection Survey

1176	I am hoping this process with help remind garbage collectors to be in compliance with whatever the requirements are for the city. I feel caught between two entities at this time.	8/8/2021 12:57 PM
1177	My hauler left me a note on my garbage can that they would not pick up my garbage if I did not put the garbage can at curbside...this was after the city when back to the original ordinance.	8/8/2021 11:21 AM
1178	Residents of Sioux Falls should have the option to place their garbage containers at curbside or ask their provider to pick them up alongside of the house. For disabled and senior citizens moving a garbage container to the curb can be an impossible task. I guess I believe that we pay for the service and that the containers should be placed where they belong when they are done being emptied.	8/8/2021 8:56 AM
1179	I don't think the carrier should have to retrieve from a structure, the customer can move it to a convenient place on pick up day. However I don't like it on the curb. It has a greater chance of tipping over spreading garbage around the neighborhood. I like leaving my cans next to the front of my garage and they take and return from there.	8/8/2021 8:25 AM
1180	Suggestions for acceptable alternate location of garbage canisters during the winter months would be welcome.	8/8/2021 3:16 AM
1181	I don't mind taking the containers to the curb, but I would like them to bring them farther back up the driveway. Even just on my side of the sidewalk as opposed to leaving them half on the street/half on the driveway would be preferred. It's windy in our area of the city and there's been multiple times that we've come home from work and had to go collect our garbage/recycling cans from down the street in the middle of the road because of them blowing away after being emptied. I've seen this happen a lot in our neighborhood.	8/8/2021 2:43 AM
1182	In the winter driveways can be icy and I don't want my garbage hauler to slip and get hurt. In the summer it's hot and I don't want them to overheat. My garbage collector usually puts my can back against the house after they collect it.	8/7/2021 9:48 PM
1183	Curbside cans look junky	8/7/2021 8:43 PM
1184	One truck. Same day. Garbage at curb. Very simple. Get a backbone and make it happen	8/7/2021 7:30 PM
1185	I don't mind if my neighbors want to put their garbage cans curbside, but I don't want to be required to do so. I wish the haulers would do both trash and recycling at the same time rather than hours apart.	8/7/2021 6:20 PM
1186	My elderly neighbors are not able to drag the containers all over the place. Why are you changing this???? Are the garbage companies running this town now? You say what they are doing is prohibited. Then stop them!!	8/7/2021 12:43 PM
1187	If curbside pickup is prohibited, why the hell are you letting the haulers violate the ordinance???? Enforce the law!!!	8/7/2021 12:33 PM
1188	Stop the mafia garbage haulers from harassing us and enforce the damn laws!	8/7/2021 12:05 PM
1189	THIS IS NOT A SURVEY... just a stupid online poll. If the city truly wishes to learn the public's opinion, then they need to have someone who knows what they are doing administer a real, scientific survey. Otherwise, I can assure you that there is no way the results can be considered a valid sample of public opinion. How are you going to prevent multiple submissions from biased parties (garbage haulers and their employees)? Unless there is widespread knowledge of, and voluntary citizen participation in a legitimate survey, the results will be useless. I've heard nothing in the local media informing citizens of this poll. Nice job of hiding this! I can tell you that there are many people I've spoken with who are confused and frustrated by the intimidating tactics of haulers, threatening "service interruption" if they don't drag their containers to the curb and back to their house. Instead of informing the public, you choose to conduct a stupid poll. Meanwhile, our streets are littered with garbage cans! There was a time when residents would never put up with such an unsightly mess – nor would their municipal government. But residents remain uninformed as to what the current rules are, and it appears to me that city government's position is to simply allow garbage haulers to do whatever they please.	8/7/2021 11:56 AM
1190	I have up to 10 garbage trucks, six days per week on my street. What a waste of natural resources and hard on our roads.	8/7/2021 11:19 AM
1191	Providers have to follow city ordinances, plain and simple. If they want the ordinance changed,	8/7/2021 11:11 AM

Garbage Container Placement and Collection Survey

then they need to go through the proper channels.

1192	I appreciate that if I forget to put my garbage container on the curb they the hauler will go to structure and grab it especially if it's windy because when windy sometimes will blow over before garbage service comes. I do not expect the hauler to put the garbage back against the structure even did they initially retrieved it from there	8/7/2021 9:54 AM
1193	Go Sweeny!	8/7/2021 8:19 AM
1194	Would like to see garbage collection be more uniform throughout the city - neighborhood pickup on the same day, possibly even making it a municipal service or contracted by the city to a small number of carriers.	8/7/2021 8:16 AM
1195	NA	8/7/2021 7:49 AM
1196	Make it clear that neighbors should not store their garbage and recycling containers in the front or on the side of the structure during the rest of the week when it is not garbage collection day. When people leave them out, the neighborhood looks messy.	8/6/2021 11:03 PM
1197	Why is this even a question? Should be between the customer and the hauler. The city is involved in too much.	8/6/2021 10:57 PM
1198	The Vast junction boxes, crumbly curbs, and patchwork of asphalt are more of an eyesore than 50 collection bins.	8/6/2021 10:06 PM
1199	I put the container on the curb to be nice to the hauler and they are nice to bring it back to the garage	8/6/2021 9:50 PM
1200	I'm indifferent about seeing them curbside. I think keeping them in the garage keeps them from potentially being blown over in the storms we have.	8/6/2021 9:25 PM
1201	It shouldn't matter if we leave it by the house or help the hauler and take it to the curb. What matters more is getting it back by the house when empty, so back out of driveway and sidewalk view/way.	8/6/2021 9:19 PM
1202	Each hauler should be able to select where their customers put their carts. The driver should be able to get carts from safe place especially when winter months roll around.. Some haulers look at safety first especially for their drivers	8/6/2021 9:12 PM
1203	The easier the better for both customer and the hauler.	8/6/2021 7:17 PM
1204	I've NEVER lived anywhere where you don't put your own garbage on the curb.	8/6/2021 6:52 PM
1205	I wouldn't mind garbage at the curb in neighborhoods if it is all picked up on the same day and the containers had to be put away on the property that same day after being emptied (I would say 90% of my neighborhood already does curbside and it is not being enforced!) Our winters are so harsh that I wouldn't mind helping improve the carriers safety on slippery driveways in the morning by allowing curbside. If it is also a cost thing, we will not pay extra for them to pick up from our structure. We would rather make it as easy as the mail carriers have it and allow curbside service. But if homeowners trash becomes unruly, they should also be fined for it.	8/6/2021 6:24 PM
1206	I have always kept my recycle and garbage containers in garage. On garbage day I put them out in driveway by road. My garbage service always put the containers in front of 3rd garage door. Perfect	8/6/2021 5:58 PM
1207	No	8/6/2021 5:31 PM
1208	You might want to tell the haulers about this rule.	8/6/2021 4:42 PM
1209	It is hard enough to find employees. Seems like curbside is better use of a haulers time.	8/6/2021 4:42 PM
1210	Please keep Sioux Falls clean by maintaining garbage containers out of site except on pick up days. Also, establish a limit on hauler licenses and assign haulers to regions of the City. We have at least two haulers in our neighborhood on the same day, within 1-2 hours of each other. This is wasteful and not environmental friendly.	8/6/2021 4:38 PM
1211	I think the customer should bring the containers to the curb on collection day. The hauler should return the container to the house or business after completing collection. The wind is a problem in Sioux Falls and a distinguishing feature from other cities. Due to the wind, make	8/6/2021 4:17 PM

Garbage Container Placement and Collection Survey

haulers take the containers back up to the house or business immediately after completing collection. Customer can bring them curbside the morning of collection.

1212	The way the current ordinance is worded is utterly ridiculous. The way my property is setup, garbage bins would need to be on the side of my house. To retrieve and replace the bins would require dragging the bin across landscape rock, over grass and over a sump pump hose. The same procedure would then be reversed to put the bin back. Also, garbage haulers shouldn't be required to play 'hide and seek' trying to locate my bins.	8/6/2021 4:16 PM
1213	I don't feel that cans placed at the curb is a big deal. It's temporary. Garbage collection is part of living in a city. Placing them at the curb helps the haulers. It's fine if they return them curbside as well.	8/6/2021 4:11 PM
1214	Why are some compaines like waste managemet not following this new law? They are still requiring curbside pickup.	8/6/2021 4:10 PM
1215	Please add a curbside composting option. With how many farmers we have around here, we really should be composting and using our resources!	8/6/2021 4:08 PM
1216	If i put my cans inside my fence so they are hidden according to the ordinance the trash company will not pick them up. They must be visible from the road according to the hauler. I say Sioux falls gets rid of all the haulers and just have one that the city runs.	8/6/2021 4:06 PM
1217	I wish the city would offer more options to collect bulk items. I'm aware that the city provides free dump passes in the spring, but not everyone has the transportation to drive that far out of town to be able to dispose of bigger items. City wide clean up would be great for the entire city of Sioux Falls instead of just certain locations that change each year.	8/6/2021 3:36 PM
1218	- Curbside is the norm in similar size communities. - It is safer - especially in the winter - as our hauler wouldn't have to walk up and down icy driveways all season long. - Other communities also have haulers that utilize trucks with retrieval arms. The fees are lower and the service is far more efficient. - In a forward-moving community, it only makes sense that curbside is to be permitted here as well.	8/6/2021 3:31 PM
1219	It should be ok for the garbage containers to sit in front of the house or on the side. There should never be an ordinance that it needs to be hidden from view	8/6/2021 3:25 PM
1220	Would love to see city wide garbage where we all use the same garbage haulers. What a waste of resources to see multiple haulers on our street. One hauler for the whole sections of town would be best or city wide same hauler.	8/6/2021 3:21 PM
1221	I think it is difficult to place the container in a inconspicuous place. My neighbors would not appreciate my smelly garbage next to my house because their windows are there. It is smelly in the garage. I	8/6/2021 3:05 PM
1222	This is not a big problem. While its nice that our hauler gets the containers and returns them, I think they can determine what works best for them.	8/6/2021 2:59 PM
1223	Everyone has garbage - every town, every home, every business. It's really not that big of deal to see containers out in the open.	8/6/2021 2:44 PM
1224	If it's required to move them ourselves- it's likely I would forget to do so.	8/6/2021 2:43 PM
1225	It should be ok to leave container on driveway near garage on non pick up days. Yard waste especially due to smell in summer	8/6/2021 2:43 PM
1226	No	8/6/2021 2:34 PM
1227	I really wish the city would work on bigger problem they have and not where people put their trash cans! Also I can't believe the city make the garbage haulers have so much percent of recycling! I love my local garbage company and now buying plastic bottles of water verses using my reuse able ones and getting paper bags at the groceries store instead of my fabric one. I'm doing more harm to the environment, all so a family owned local business can stay in business!!	8/6/2021 2:33 PM
1228	We have had notes on can saying if not at the curb they will not pick up.	8/6/2021 2:22 PM
1229	Buy trucks that pick up the container and dump it . Easier for the waste hauler	8/6/2021 2:13 PM
1230	The city should not be involved in these decisions, should be between hauler and customers	8/6/2021 2:09 PM

Garbage Container Placement and Collection Survey

1231	Haulers should be allowed to provide various levels of service, including charging for special valet service, where they have to take the time to walk up to the residence for cart retrieval and replacement. Valet service should not be required by the city. There are no other known cities that require valet service nationally.	8/6/2021 2:08 PM
1232	We have had a back-up of three or four different garbage services on our street while the first collected trash. This caused cars to stop from both directions. We also have at least one garbage service per day going down our road In a previous community garbage was city ran. This would eliminate both issues. Preferable for city to run garbage services	8/6/2021 2:06 PM
1233	I dont bring mine down to the curb but it do put them almost down to the sidewalk.	8/6/2021 2:02 PM
1234	Why nothing about environmental impact, safety and liability? Misleading survey.	8/6/2021 2:01 PM
1235	Garbage containers need to be stored inside or behind a structure when it is NOT Collection Day. Too many people leave their garbage cans in their driveways & it looks tacky downgrading a neighborhood. Please advertise this ordinance!	8/6/2021 1:59 PM
1236	An idea is to give a company a contract each year and make it city based? Or maybe by location? SW side is _____ servicer, etc. I also think the Sioux falls city website should list all companies available for garbage service.	8/6/2021 1:58 PM
1237	When people put their garbage out the day or two before pickup and the wind comes up garbage is blown all over the place.	8/6/2021 1:49 PM
1238	If we keep as is and we don't put trash cans at the street fine but ensure all trash companies adhere to these rules.	8/6/2021 1:37 PM
1239	If you keep the current ordinance in place, explain why.	8/6/2021 1:15 PM
1240	This ordinance needs to be changed so that it stops people from storing their containers on the street all week, but otherwise does not specify where the container goes.	8/6/2021 12:42 PM
1241	I hated the curbside as the hauler I have barely returned my cans to my driveway. Most times they were half on the street half on the curbside. I would not mind a "behind the sidewalk but not houses ide" rule I think haulers should have to actually place the items fully on a curb/driveway should this ordinance change.	8/6/2021 12:18 PM
1242	I prefer to put on curb, but i forgot and containers were further up the driveway i was like them to still empty them.	8/6/2021 11:27 AM
1243	If I forget or am out of town on the day of collection should not exempt me from getting my garbage picked up if it is not brought to the curb. This could result in the recycle not being picked up for a month since it is on a biweekly pick up schedule	8/6/2021 10:56 AM
1244	I don't like the wind blowing over my containers at the curbside. I have found my container in the street when I come home. If you have paper sacks they are subject to sitting out in the rain. At least by my house they have some protection. The older I get the harder it gets to move my paper sacks to the curb. Some days I see 3 or 4 garbage haulers in my neighborhood. Wouldn't it be cheaper to have one hauler in the area? The downside is you have no choice if they give poor service or charge exorbitant fees.	8/6/2021 10:29 AM
1245	municipal collection, including yard waste!!!!	8/6/2021 10:22 AM
1246	If we're asked to bring our rubbish bins to the curbside, then I would ask that rubbish is collected for everyone in the neighbourhood on the same day so that I only have to see the eyesore of rubbish bins one day out of the week.	8/6/2021 10:16 AM
1247	I always figured it was the norm to put your garbage at the curb as some weeks I actually have no bags to be removed so I leave them in place. Same with recycling	8/6/2021 10:00 AM
1248	I don't mind putting garbage at the end of driveway nor do i mind having them left down by street for me to get. Cufs down on time and cost.	8/6/2021 9:52 AM
1249	Inform people to NOT place containers such that they block the sidewalk. This is a problem for walkers.	8/6/2021 9:01 AM
1250	It is hauler's jobs to collect the containers from or near the structure. Please enforce it and do not change it now.	8/6/2021 9:00 AM
1251	I'm tired of the garbage I pickup from my neighbors. They have there garbage cans out front all	8/6/2021 8:56 AM

Garbage Container Placement and Collection Survey

the time n there to small for there use bags are all over an they've started butting out other containers. It's a mess all the time

1252	Our garbage system is archaic. Why don't we have the trucks with arms that grab the cans and dump them?	8/6/2021 8:27 AM
1253	I have no concerns with having the homeowner place the garbage curbside. but I strongly feel the garbage hauler needs to place the garbage can back by the house. I have had to dodge too many wind-blown garbage cans in my past because of one of the garbage haulers leaving the cans alongside the road.	8/6/2021 8:20 AM
1254	Curbside is no problem.	8/6/2021 8:08 AM
1255	Garbage should be curbside. Everyone has garbage cans and there is no need to try and avoid the fact that they do.	8/6/2021 8:06 AM
1256	I think it is important that the cans are curbside. It is beneficial to both the customer and the hauler.	8/6/2021 8:02 AM
1257	I think there should always be the option that the hauler can get the van from the house and bring it back up to the house in order to help people with mobility issues.	8/6/2021 7:42 AM
1258	I don't want my garbage skipped if I'm out of town and don't put it out curbside on collection day. But when I'd love to make it as easy on the hauler and place it curbside as often as possible for them.	8/6/2021 7:18 AM
1259	Moving the cans to the curb helps the collectors move through their route more quickly.	8/6/2021 7:11 AM
1260	It should be everyone's goal to make another person's day easier.	8/6/2021 7:09 AM
1261	When is the city going to enforce the ordinance that residents have to conspicuously place their garbage cans in an out of sight location. Too many residences have their garbage cans in the front of their house. It makes everyone else's property look terrible. This IS A MUCH BIGGER issue than what this survey is about. Focus on the bigger problem please.	8/6/2021 6:56 AM
1262	No	8/6/2021 5:28 AM
1263	As a garbage hauler myself, my opinion may be skewed. Curbside pickup is much more environmentally friendly, safer, and less demanding in the person collection your waste. This is the only city I've worked in(over 8, all of which were quite larger) that doesn't actually enforce curbside pickup. I'm a time where the workforce pool is shallow, changing this is almost necessary. Help out the environment, your garbage collectors and let's move to curbside.	8/6/2021 4:41 AM
1264	Our decisions are based on the greenest options.	8/6/2021 2:45 AM
1265	Not all homes built in the past have an inconspicuous place for trash beside or behind the home that's accessible	8/6/2021 1:42 AM
1266	I wish the city just had one garbage hauler. It's so wasteful having many, many trucks driving all around town.	8/6/2021 1:19 AM
1267	We should not punish folks for taking cans curbside for their hauler as a courtesy, and there should be a reasonable limit go where the hauler should return the cans to. However, mandating explicit locations for collection and return of the bins seems like overreach.	8/5/2021 11:35 PM
1268	Just give garbage collectors the option of what they want to require	8/5/2021 11:35 PM
1269	We have family members who live in several other states, all have curb side pickup. We were glad Sx Falls started it, hope it continues.	8/5/2021 11:32 PM
1270	"From the structure" and "curbside" present only two options, instead of a third where the containers are outside but not within the structure. I don't understand how to have containers next to the house but not inside a structure within the options available.	8/5/2021 11:12 PM
1271	Containers should be stored out of sight.	8/5/2021 11:10 PM
1272	Just copy how Simi Valley, California does it. https://www.simivalley.org/departments/community-services/solid-waste-services/www-simivalley-org-departments-community-services-commercial	8/5/2021 11:09 PM

Garbage Container Placement and Collection Survey

1274	Receptacles should not be visible EXCEPT on scheduled pickup dates!	8/5/2021 10:55 PM
1275	I think the customer bringing containers to the street should be encouraged but not enforced. I think haulers should return containers to the structure on windy days.	8/5/2021 10:19 PM
1276	City needs To advise what can be recycled To Mich confusion. And companies adv if curbside Or not. My feiend has been getting charged wxtra si ce April for not curbside di g or they have not Picked up her garbage at all twlli g her \$14 More them come get from house not at curb	8/5/2021 10:06 PM
1277	I believe in helping others (or lightening the load) is far better than esthetic appearances.	8/5/2021 10:02 PM
1278	I think the city has bigger fish to fry than worrying about where citizens are placing their garbage bins. Is the city suddenly an HOA community? I get wanting the city to look clean, but we all have garbage bins and trying to cameoflague the fact is a waste of time and money for all. Having them placed at front of garage should not be an issue- afterall, that area is the PROPERTY OWNERS land. If there are instances where the trash is a constant buildup and an unGodly mess, than the city should address that case on an individual basis instead of making mountains out of molehills.	8/5/2021 9:48 PM
1279	Must not leave it out side during non pick up time. Pick up day should be the same day. I think I see more garbage truck down my street then cars	8/5/2021 9:41 PM
1280	My yard is uneven, placing cans on the curb ensures the hauler has easy access to them without risking injury.	8/5/2021 9:40 PM
1281	We have too many haulers tearing up our roads. Somehow they need to be given certain areas. I get it that's not fair to free Enterprise but I'm on a street that turns one corner and dead ends in a culda sac. There are a total of 10 houses with at least 5 different haulers. Makes zero sense when it comes to how the big trucks tear up our streets. We don't need that many trucks running the residential.	8/5/2021 9:32 PM
1282	I don't mind placing containers curbside on garbage day, but there needs to be some flexibility in whatever option is decided that allows for some it to be placed near the structure on windy days so containers don't tip or blow open (or over) spreading contents around. I may also place them out a day or two early if I'm planning to be out of town on pickup day. So, some flexibility would be nice in how this ordinance is written. Thanks	8/5/2021 9:26 PM
1283	Garbage collection day is one thing, how about enforcement of not being able to see the garbage cans on the other days of the week?	8/5/2021 9:25 PM
1284	If allowing customers to bring their trash to the ends of their driveways makes a postive impact environmentally (less idling garbage trucks) and time/cost for these local businesses/workers, then updating the ordinance makes perfect sense. Also, shout out to whoever was paying attention enough to the chatter about this subject online to do some research into changing this and getting this survey together. More of this!	8/5/2021 9:22 PM
1285	Waste Management refuses to college our garbage unless we place it at the curb, even though that is a violation of city policy.	8/5/2021 9:09 PM
1286	Whichever is easiest for the garbage collectors. They work hard.	8/5/2021 9:07 PM
1287	The city doesn't want us to put out cans out which is FINE but Waste Management says they won't collect or will fine us if we don't put it out!! Waste management is making us go against city ordinances!!	8/5/2021 9:03 PM
1288	Selfishly, I'd like it if I forgot to put the cans at the curbside for them to come get them, but I don't mind seeing cans one day and having them left on the curb for the day. We have put them curbside pre-COVID later at night for them to get in the morning when we've had extra recycling or garbage that didn't fit to make it easier for them. I didn't realize it was against ordinance.	8/5/2021 8:47 PM
1289	Let recycled materials be put in bags!! The amount of litter caused by not bagging creates an enormous amount of litter on windy days. No one picks it up!!	8/5/2021 8:46 PM
1290	Trash bins should be taken to the curb the night before for the maximum amount of darkness time. Trash bins should have the good food on top to make it easier for raccoons like me to eat out of it. Trash bins should be bear proof but not raccoon proof. Opossums are ok. Trash bins should have a ladder on the side.	8/5/2021 8:33 PM
1291	After the emergency ordinance was lifting. We left our cans by our garage door, the waste	8/5/2021 8:32 PM

Garbage Container Placement and Collection Survey

collector said we had to bring it to the curb. Otherwise they won't pick it up anymore. So not sure what to do.

1292	My old cit6had curbside and it looked terrible on garbage days, trash was in the streets and it's harder to see when backing out of driveways.	8/5/2021 8:28 PM
1293	Only allow one hauler in an area. Having multiple haulers on multiple days is ridiculous on many levels. One hauler/one day a week. It would save the taxpayers money with less wear and tear on the streets.	8/5/2021 8:17 PM
1294	There should be one day and hauler for each neighborhood. It's annoying to have five different garbage days because everyone has different haulers.	8/5/2021 8:15 PM
1295	For the love of god, socialize the garbage industry. At the very least greatly expand single stream recycling.	8/5/2021 8:12 PM
1296	Safety issues are a big concern. The garbages curbside can obstruct the view of children playing, walking to school, etc. not to mention, during pandemic when there was curbside, I saw big garbage bins tipped over but he wind in the street. Another safety issue.	8/5/2021 8:11 PM
1297	Curbside is a terrible idea. It makes the city look worse, it is a hassle for elderly and disabled, it causes trash to blow over all over yards and streets on windy days which are very common. It benefits no one except the trash haulers. If you switch to curbside I highly doubt they will be lowering prices. They are just complaining. I am thankful for them, but it is their job to pick up the trash from the structure. Like anything, if you don't like it, leave your job.	8/5/2021 8:05 PM
1298	Allowing driveway placement not by the curb. Curbside results in tipped bins and garbage everywhere. Placement in front of garage (not down the driveway) is a decent compromise	8/5/2021 8:04 PM
1299	Its a little crazy to have so many haulers going up and down a street all day long.	8/5/2021 8:04 PM
1300	Same day collection in my area would be AMAZING!	8/5/2021 8:02 PM
1301	Hauler should be required to bring containers back to the residence so they aren't falling over and blowing away when empty	8/5/2021 8:01 PM
1302	Too many sanitation companies. Make it a municipal service	8/5/2021 8:00 PM
1303	It's too windy to have curbside for garbage. I have even seen empty cans blowing down the street. Bad idea. If it's full, recyclables are everywhere in the street. This happened all the time on my street during the pandemic when people were allowed to do this. Big mess! Garbage companies have been doing this for years with no issues. Do you think if we go curbside they will actually lower our prices?! They won't, so that shouldn't even be insinuated in this survey.	8/5/2021 7:59 PM
1304	It is windy in sf. Having the trash next to your home protects it from spilling, placing it on the curb causes blowing of trash out of the garbage, especially recyclables. Also, when people are gone for a week, the trash bins would stay sitting on the curb till they return the next week. This is not sight,y and also let's everyone know that no one is home there, causing safety issues with burglary. Disabled people have issues walking it out that far. It looks terrible. The only reason this is coming up is because you let the haulers do this for a year and now they act like they will have to raise prices by not doing it even though there wasn't a; issue before. Terrible idea that would literally trash up the city. Who wants t9 drive down the street and see trash cans all along the road. Please do not allow curbside.	8/5/2021 7:53 PM
1305	Waste Management was instructing me to place curbside, hated it. Looks trashy and blows garbage everywhere. They were also increasing to more than \$100 for 3 months of service	8/5/2021 7:49 PM
1306	Garbage haulers picked up garbage by garage for years and returned. Or one would bring container to street and 2nd driver would return them. Now they don't return them. Do you think rates will go down in containers are placed at cutb,?? I doubt it..this is waste mgmt	8/5/2021 7:44 PM
1307	I think garbage collection should be a treated as a tax funded utility so everyone has the same opportunity	8/5/2021 7:41 PM
1308	Main concern is trash blowing around the neighborhood if cans are left by the street as it gets pretty windy out here.	8/5/2021 7:39 PM
1309	I have no issues with taking garbage container to the curb except on windy days. Also would like the hauler to return them to the structure.	8/5/2021 7:33 PM

Garbage Container Placement and Collection Survey

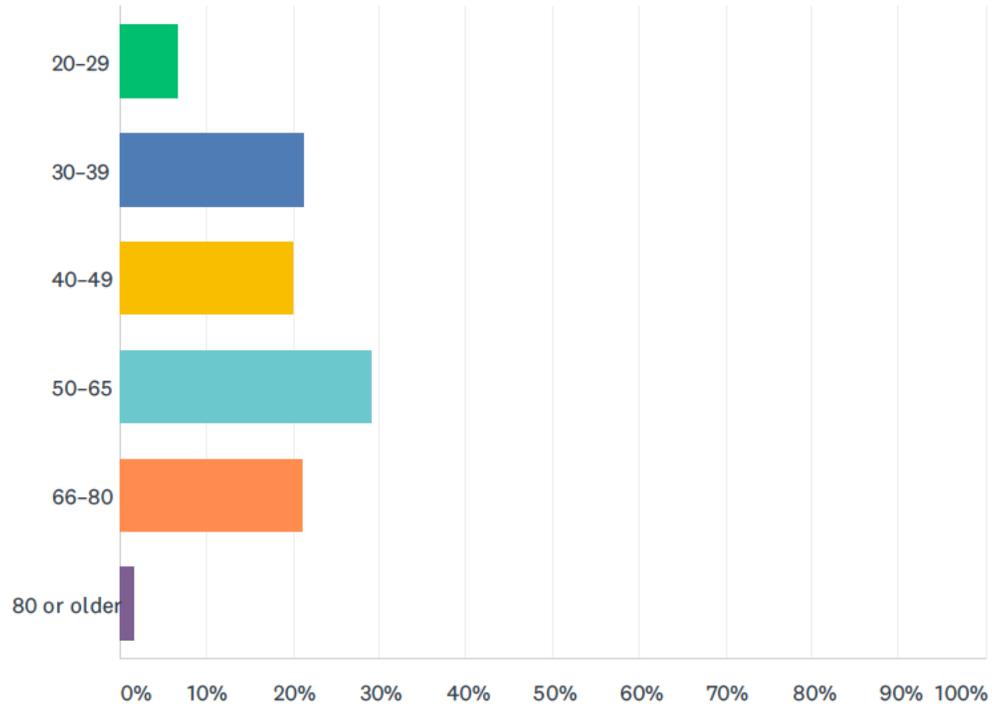

1310	Require all residents in a specific neighborhood or region of town to use the same hauler, competitively bid.	8/5/2021 7:26 PM
1311	Garbage containers should not be allowed to be kept outside in the front of houses. They are an eye sore and are easily blown over by the wind.	8/5/2021 7:20 PM
1312	Haulers need to be aware of the ordinance. We've gotten notes threatening missed service if containers are not on the curb weeks after the ordinance was brought back. Very confusing to get conflicting info from the hauler and the city.	8/5/2021 7:10 PM
1313	Haulers need to lower prices if they don't have to pickup at the structure and return container	8/5/2021 7:02 PM
1314	Other than collection day, all residents should have to have their containers hid in their garage. It makes the neighborhood look so ugly with people setting them out in driveway in front of garage door permanently. So ugly! I wish more could be done to report people for this.	8/5/2021 6:57 PM
1315	I think the customer should place their containers curbside on the day of collection and the hauler should return the container to the house when collection is complete.	8/5/2021 6:55 PM
1316	I don't think the current policy is well understood by the residents. I feel the biggest issue is containers left out in front of the garage/house. The curbside issue is secondary in my opinion. In our previous city, containers must be out of sight (as much as practical), but we needed to bring the container to the curb (no earlier than the day prior to collection) and retrieve it once it was emptied. I understand the issue not every is capable of doing this, but it worked for a city of 45K (Golden Valley, MN) and other surrounding cities. This allowed for very efficient, mechanized collection (truck with claw arm). Good luck with this project ... you will never please everyone. Sioux Falls is a great city because we have a great staff! Thank you!	8/5/2021 6:50 PM
1317	Yes please tell [REDACTED] to get another hobby!	8/5/2021 6:41 PM
1318	The last place we lived had collection day. All haulers collected on the same day in that neighborhood. I'd love that! I'd also rally like a hauler to offer a neighborhood discount. Example if x% of the homes on the block have [hauler] then an x% discount. Helps hauler, helps homeowner, helps environment.	8/5/2021 6:35 PM
1319	We don't have an inconspicuous place beside or behind the garage that is safe to haul garbage containers to from the driveway. We would like to be able to place or containers in front of an unused stall of our garage and have it meet the requirements of city ordinance. We aren't picky about whether the hauler retrieves/returns or if we need to. One thing to keep in mind, though, is that haulers start their routes very early, so many households prepare their garbage the night before for early pick up. Having containers at the curb overnight or for long periods of time causes a more issues with blown over containers and garbage or recycling flying around the neighborhood.	8/5/2021 6:31 PM
1320	I live in an area where there is no protection from the wind. Having the carts at the curb ends up with garbage blowing everywhere. Horrible idea that leaves the neighborhoods with trash everywhere.	8/5/2021 6:21 PM
1321	I get mad when I come home and the garbage container is in the middle of the driveway rather than off to the side where I had set it. When this happens I have to leave my vehicle in the middle of the street and take a chance on it getting hit.	8/5/2021 6:17 PM
1322	When people were asked to bring to curbside during covid, they received NO discount for helping to make more money for the haulers. That is why it should stay as it was.	8/5/2021 6:12 PM
1323	I wish some of the above questions were level of preference rather than yes/no, but I answered as well as I could.	8/5/2021 6:09 PM
1324	No	8/5/2021 5:55 PM
1325	The existing ordinance has never been followed in any neighborhood I have lived in or driven through in Sioux Falls. Cans should continue to be placed curbside on collection day, as has been the standard practice, despite this little-known ordinance. Homeowners should be responsible for bringing cans back in by the end of the day on their assigned collection day.	8/5/2021 5:53 PM
1326	Make it a municipal franchise agreement with one or few haulers! We have way too many trucks going down the same streets every day.	8/5/2021 5:37 PM
1327	Our neighborhood had been putting containers by the curb for several years. No one complains. It speeds up garbage service.	8/5/2021 5:34 PM

Garbage Container Placement and Collection Survey

1328	Some customers may have jobs that take them out of state before, during, after collection day and are unable to bring their cans curbside or retrieve them.	8/5/2021 5:32 PM
1329	We normally keep our containers in our attached garage. On the night before garbage pickup, we remove and put them in front of the garage (next to garage door). We do not oit curbside, but we also have no place ti out beside our house without ruining our landscaping. This ordinance seems to be too strict. Dont keep garbage cans all week at the curb, but 1 day for ease is not out of line.	8/5/2021 5:21 PM
1330	The garbage can should be outside, visible & returned to same location on collection day. Too windy here to require cans on curb. During pandemic garbage was blown all over the block & looked junky, plus unhealthy.	8/5/2021 5:11 PM
1331	Keep it simple for homeowner. Haulers will transfer as much work to the customers as you allow them too. And, we want to be able to drive down the street without garbage everywhere.	8/5/2021 5:08 PM
1332	I can't believe we are wasting time on this trivial issue. Place the container near the curb on collection day. Put the container back once emptied. It's not complicated.	8/5/2021 5:08 PM
1333	Leave alone, appears only complainers are a few haulers	8/5/2021 5:03 PM
1334	Containers should be allowed to stay next to driveways.	8/5/2021 4:58 PM
1335	I'm in the middle... I want it easy for my hauler but lately my hauler leaves our cans right in the middle of the driveway. There's got to be a happy medium for the hauler and homeowner.	8/5/2021 4:58 PM
1336	Containers can be placed curbside as long as they don't interfere with streets	8/5/2021 4:53 PM
1337	I'm not picky about this--my current hauler moves my trash bin and it's nice, but I'm ok with doing it if it lowers cost.	8/5/2021 4:51 PM

Q15 What is your age range?

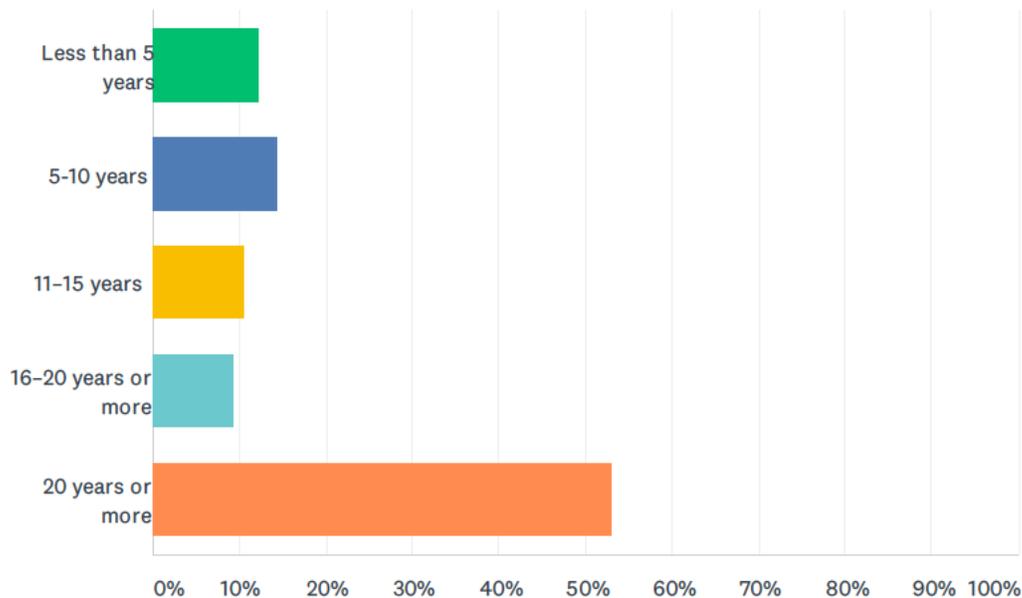

Answered: 3,813 Skipped: 281

ANSWER CHOICES	RESPONSES	
20-29	6.69%	255
